STAPLES

Virustat TBQ™
- Cleaner
- Deodorizer
- Mildewstat (on hard inanimate surfaces)
- Fungicide (against pathogenic fungi)
- Tuberculocidal
- Disinfectant
- Viricide

Meets OSHA Bloodborne Pathogen Standard for HIV, HBV & HCV

KEEP OUT OF REACH OF CHILDREN

CAUTION
See back panel for additional precautionary statements.

Active Ingredients:
- n-Alkyl (60% C₆₋₇, 30% C₈₋₉, 5% C₁₀₋₁₁) dimethyl benzyl ammonium chloride ............. 0.105%
- n-Alkyl (68% C₈₋₉, 32% C₁₀₋₁₁) dimethyl ethylbenzyl ammonium chloride ...................... 0.105%

Inert Ingredients.......................................................... 99.790%
Total................................................................. 100.000%

Net Contents: 1 QT (32 fl. oz.) / 946 ml

EPA Registration No. 1839-63-66226
EPA Establishment No. 8156-ON-1
PRECAUTIONARY STATEMENTS

EXPOSURE TO HUMANS AND DOMESTIC ANIMALS
CAUTION: KEEP OUT OF REACH OF CHILDREN. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

FIRST AID
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Visual TEG is designed specifically as a general ready to use cleaner and disinfectant for walls, floors, metal surfaces, glass, porcelain, laminate surfaces, kitchen and worksurfaces, and cabinets.

For plastic and painted surfaces, spot test on an inconspicuous area before use. A line with potable water is required for surfaces in direct contact with food. Visual TEG decontaminates these areas that generally are used to keep fresh-baked goods, such as garbage storage areas, empty garbage bins and carts, basements, restrooms and other areas which are prone to odors caused by microorganisms.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. The product is not for use on critical or semi-critical medical device surfaces. DISINFECTION, DEODORIZING AND CLEANING: Pour one gram (0.5 oz liquid) of powder or two fluid oz of liquid into a spray bottle, then add one gallon (4 liters) of water. Use a separate cloth to wipe down surfaces. Spot test on an inconspicuous area before using. Place treated area to wipe down an area that has been treated. Allow surface to remain wet for 3 minutes (1 minute for a light soiled surface) then remove residue. Cleaning surfaces with a solution of water after using this product. Do not use on eating utensils, glassware and cookware.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD, OR FEE BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE—Store in a dry place no lower than 70°F (21°C) or higher than 100°F (38°C).

Do not use on eating utensils, glassware and cookware. Read approved AADC test methods (under Food Laboratory Practice) in the presence of 5/16 inch water or 1 minute contact time, unless otherwise noted. Visual TEG does the following organisms on nondisposable laminate surfaces:

BACTERIAL ACTIVITY: Pseudomonas aeruginosa, Salmonella Senftenberg, Bacteroides fragilis, E. coli, Staphylococcus aureus, Staphylococcus epidermidis, Streptococcus pyogenes, Listeria monocytogenes, Yersinia enterocolitica, Salmonella dublin, and Salmonella typhi.

METABIC ACTIVITY: Methicillin-resistant Staphylococcus aureus (MRSA), Vancomycin-resistant Enterococcus faecalis (VRE), Vancomycin-intermediate resistant Staphylococcus aureus (VISA), Methicillin-resistant Staphylococcus epidermidis (MRSE), and Community-associated Methicillin-resistant Staphylococcus aureus (CA-MRSA), (MSSA 30)

TOBCOLOGICAL ACTIVITY: Visual TEG exhibits bactericidal efficacy against 4000 Colony forming units (CFU) at 20 degrees Centigrade when the treated surface is allowed to remain wet for 5 minutes.

MICROC ACTIVITY: Visual TEG on hard, non-porous hard surfaces when allowed to remain wet for a 3 minute contact time against enterorovirus. Hepatitis A Virus (HAV) and Poliovirus Type 1, H1N1 Pandemic 2009 A/H1N1 Influenza A Virus. Visual TEG on used as an environmental, non-irritating, surfacid solution against several microorganisms. Bacteroides fragilis, Peptostreptococcus, and other anaerobic bacteria. Visual TEG is not recommended for use on 4000 Colony forming units or 4000 Colony forming units (CFU) at 20 degrees Centigrade when the treated surface is allowed to remain wet for 5 minutes. Human Coronavirus, SARS associated Coronavirus (SARS-CoV), 2009 A/H1N1 Influenza A Virus, Visual TEG on used as an environmental, non-irritating, surfacid solution against several microorganisms. Bacteroides fragilis, Peptostreptococcus, and other anaerobic bacteria. Visual TEG is not recommended for use on 4000 Colony forming units or 4000 Colony forming units (CFU) at 20 degrees Centigrade when the treated surface is allowed to remain wet for 5 minutes.
