KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID
Have the product container or label with you when calling a poison control center or doctor or going for treatment.

IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 for emergency medical aide. If breathing is difficult, give artificial respiration. If inhaled, call a poison control center or doctor for further treatment advice. For emergency information call 1-888-322-0912 (24-hours, 7 days a week).

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

See side panel for additional precautionary statements.

Net Contents: 1 GAL. (128 fl. oz.) / 3.78 L

**GENERAL DISINFECTION**
Add 3.5 volumes of 1686 Disinfectant per 5 gallons of water for disinfection against Pseudomonas aeruginosa and various intermediate resistant Staphylococcus aureus (MRSA), as well as the organisms listed under the GENERAL DISINFECTION section.

To disinfect food service establishment or restaurant food contact surfaces: scorching, scours, scours of appliances, tabletops, add 2.5 volumes of the product per 5 gallons of water for heavily soiled areas, a pre-cleaning step is required. Application should be with a cloth, sponge, or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow the surface to remain wet for 10 minutes, then remove excess liquid and rinse with soap and water. The use of soap and water is recommended to remove the product from the surface.

**HOSPITAL DISINFECTION**
Add 3.5 volumes of 1686 Disinfectant per 5 gallons of water for disinfection against Pseudomonas aeruginosa and various intermediate resistant Staphylococcus aureus (MRSA), as well as the organisms listed under the GENERAL DISINFECTION section.

Application should be with a cloth, sponge, or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow the surface to remain wet for 10 minutes, then remove excess liquid and rinse with soap and water. The use of soap and water is recommended to remove the product from the surface.

**VIRUCAL ACTIVITY**
This product, when used according to the instructions, inhibits the replication of a limited number of viruses.

**Lethal Viruses:**
- Influenza Type A (H3N2)
- Influenza Type B (H1N1)
- Poliovirus Type 1
- Hepatitis A Virus
- Norovirus
- Rotavirus

**Susceptible Viruses:**
- Human Immunodeficiency Virus (HIV)
- Human Herpes Simplex Virus Type 1
- Human Herpes Simplex Virus Type 2
- Varicella Zoster Virus
- Hepatitis B Virus (HBV)
- Hepatitis C Virus (HCV)
- Herpes Simplex Virus Type 1
- Herpes Simplex Virus Type 2
- Human Cytomegalovirus (CMV)
- Human Parvovirus (B19)

**Efficacy Tests**
This product is effective against the listed viruses and bacteria in less than 10 minutes. The product is recommended for use in restaurants, bars, and other food service establishments where there is a high risk of cross-contamination.

**SHIPPING & STORAGE**
Store at room temperature. Do not freeze. The product is stable for at least 12 months if stored under these conditions.
