3. After dissolving this product, pour the solution around the edge of the pool while operating circulation pump.

NOTE: NEVER MIX THIS PRODUCT WITH ANY OTHER PRODUCT.

Re-entry into treated swimming pool is prohibited above levels of 4 ppm chlorine due to risk of bodily injury.

STORAGE AND DISPOSAL: Keep this product dry in its original unopened bag until use. Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use dry clean utensils. Do not add this product to any dispersing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will result in a chemical reaction and generate heat, hazardous gases, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use dry clean utensils. Do not add this product to any dispersing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will result in a chemical reaction and generate heat, hazardous gases, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

NOTE: Buyer assumes all responsibility for safety and use in accordance with directions.

FOR SWIMMING POOL SHOCK TREATMENT

Don’t let dull, cloudy water, strong odors and eye irritation affect your swimming experience! Use this product to keep your water brilliantly clear. As a part of a pool care system, this product destroys and removes contaminants—such as bacteria and organics—that can affect swimming comfort. There’s no need to pre-dissolve this product, and is compatible with chlorine or bromine sanitized pools.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

1. Check all pool equipment and be sure it is working properly.
2. Backwash or filter according to manufacturer’s directions.
3. Test pH and adjust to between 7.2-7.6.
4. In chlorinated pools, add a minimum of 30 - 40 ppm stabilizer level to reduce the effects of sunlight upon the chlorine residual.

NOTE: Do not add stabilizer to brominated pools.
5. Test pool water for the presence of metals prior to use of this product. If any metals are present, add a stain inhibiting product to prevent the deposition of metal stains on pool surfaces.
6. When using other products as directed in conjunction with this product, always follow label directions of those products.

DOSAGE DIRECTIONS

SHOCK

Following Applications Methods, apply 1 pound per 20,000 gallons of water every week or 1 pound per 10,000 gallons every 2 weeks when the pool is not in use (preferably at night). Rapidly after heavy rains or heavy bather loads.

Application Method A

When the maximum depth of the pool is less than 4 feet deep or when water is less than 6 feet deep, pre-dissolve using Application Method 8. For all other applications, use Application Method A.

Application Method A

1. Ensure pool circulation pump is operating. Continue to operate recirculation pump for 4 - 8 hours following product addition.
2. Broadcast the appropriate dosage of this product across the deep end of the pool. NOTE: In pools with potentially bleachable surfaces, such as vinyl, paint, fiberglass or colored plastic, brush the pool surface with a pool brush to ensure dissolution of the product. Never allow undissolved product to rest in contact with bleachable pool surfaces.

Application Method B

1. Ensure pool circulation pump is operating. Continue to operate recirculation pump for 4 - 8 hours after product addition.
2. Discharge this product outdoors using a clean plastic bucket. Fill bucket with water; then add product. Use a clear plastic or wooden spoon to stir. Never add more than 1 pound of this product to less than 3 gallons of cool water. Never add water to product.
