SWIMMING POOL SANITIZER

BioGuard® has a wide variety of products that are required to maintain a quality swimming environment. These products are designated as “Maintain.”

Killing bacteria in your pool calls for action. Turn to this product, from Bioguard, to do the job. Our multi-purpose sanitizer provides a source of residual chlorine to keep your water clean and clear. It also works great as a superchlorination treatment for everything from cloudy water to high combined chlorine levels and algae growth. This product is also extremely easy to use, simply apply as directed without the added hassle of pre-dissolving.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

1. Check all equipment and be sure it is working properly.
2. Backwash or clean filter according to manufacturer’s directions.
3. Test pH and adjust to between 7.2-7.6.
4. Add a minimum 30 - 40 ppm stabilizer to reduce the effects of sunlight upon the chlorine residual.
5. Test pool water for the presence of metals prior to use of this product. If any metals are present, add a chelating agent to prevent the deposition of metal stains on pool surfaces.
6. When using other products as directed and in conjunction with this product, always follow directions on those products.

Dosage Directions

Sanitization Application

Initial Chlorination: Use this dosage if you are opening your pool in the Spring, the pool has not been maintained for several weeks, or if the pool is freshly filled.
1. Ensure pool circulation pump is operating.
2. Add 1 oz of this product for each 1,000 gallons of water.
3. Wait for 24 hours, then check the free available chlorine residual.

Application Method A

1. If the free available chlorine residual is less than 1 ppm, repeat steps 3 and 4 until the free available chlorine residual is 1 - 4 ppm.

Regular Use Dosage: Use this dosage to maintain the free available chlorine residual at 1 - 4 ppm.
1. Ensure pool circulation pump is operating.
2. Using Application Methods, apply 4 - 10 oz of this product per 10,000 gallons of water.
3. Add this product daily, or as often as needed to maintain a free available chlorine residual of 1 - 4 ppm.

After use of this product add a preventative algicide to provide additional algae control.

Shock Application Methods, apply 1 pound per 20,000 gallons of water every 2 weeks or 1 pound per 5,000 gallons every 2 weeks when the pool is not in use (preferably at night). Reapply after heavy rain or heavy bather loads.

Superchlorination: Superchlorination is needed when cloudy water, strong chlorine odor, eye irritation, or high levels of combined chlorine are encountered.

Following Application Methods, apply this product at a rate of 2 pounds per 12,000 gallons of water when the pool is not in use (preferably at night).

Kill Algae: Kill algae when algae growth is evident in the pool.
1. Brush all pool surfaces with a surface compatible brush prior to application of product.
2. Following Application Methods, apply this product at a rate of 2 pounds per 12,000 gallons of water when the pool is not in use (preferably at night).
3. Keep the pool circulation pump on continuously for the next 24 hours. Then backwash or clean the filter.

Application Methods

Application Method A

1. Ensure pool circulation pump is operating. Continue to operate recirculating pump for 4 - 8 hours (24 hours for Algakill following product addition).

2. Broadcast the appropriate dosage of this product across the surface of the deep end of the pool.

NOTE: In pools with potentially bleachable surfaces such as vinyl, paint, fiberglass, or colored plaster, brush any undissolved product from pool surfaces. Never allow undissolved product to rest in contact with bleachable pool surfaces.

Application Method B

1. Before pool circulation pump is on. Continue to operate recirculating pump for 4 - 8 hours (24 hours for Algakill) following product addition.

2. Dissolve this product outdoors using a clean plastic bucket. Fill bucket with water, then add product. Use a clean plastic or wooden spoon to stir. Never add more than 1 pound of this product to less than 3 gallons of cool water. Never add water to product.

3. After dissolving this product, pour the solution around the edge of the pool with circulation pump on.

NOTE: NEVER MIX THIS PRODUCT WITH ANY OTHER PRODUCT.

Re-entry after treated swimming pool is prohibited above levels of 4 ppm chlorine due to risk of bodily injury.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposure, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal. CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.

PRECAUTIONARY STATEMENT:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:
DANGER: Corrosive. Causes irreversible eye damage and skin burns. Harmful if inhaled, swallowed or absorbed through the skin. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Do not get in eyes, on skin, or on clothing. Avoid breathing dust or fumes. Wear protective eyewear (goggles or face shield). Wear long-sleeved shirt and long pants. Wear thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Combustion with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.
