Item A20013
TotalPond Algaecide for Ponds & Fountains

DIRECTIONS FOR USE. It is a violation of federal law to use this product in a manner inconsistent with its labeling. For use in self-contained ornamental ponds and fountains without any outflow. For small ponds with heavy algae growth, clean the excess algae off the sides and ornaments before adding Total Pond Algaecide for Ponds & Fountains. This will reduce the amount of decaying organic matter.

Fountains. Small Ponds with goldfish and koi - Treat only those fountains and ponds which will have no outflow after treatment. High water temperatures cause more rapid natural decay of dead algae which can cause fish distress. If animals are present clean out excess algae as stated above or use before temperature exceeds 75°F (24°C). CAUTION: In ponds ensure that water is well aerated via waterfall, fountain or other method to prevent fish loss. Aeration must be continuous.

Caution: Not safe for use with snails, shrimp, clams and other crustaceans, or mollusks. Repeat dosage once per week for maintenance. To figure capacity of fountain or pond: Length x Width x Depth x 7.5 = gallons.
