FIRST AID

Have label with you when obtaining treatment advice. Any person applying zinc phosphide products and experiencing signs and symptoms such as nausea, abdominal pain, tightness in the chest, or weakness, should be seen by a physician immediately.

If swallowed:
- Call a poison control center, doctor, or 1-800-488-5743 immediately for treatment advice or transport the patient to the nearest hospital.
- Do not drink water.
- Do not administer anything by mouth.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled:
- Move person to fresh air.
- If person is not breathing call an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Call a poison control center, doctor, or 1-800-488-5743 immediately for treatment advice.

ENVIRONMENTAL HAZARDS

This product is toxic to birds and other wildlife. Do not allow pellets to be exposed on soil surface. Do not apply where runoff is likely to occur. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Check for and dispose of excess or spoiled pellets and carcasses daily until the pellets are expelled or are removed. Notice: It is a federal offense to use any pesticide in a manner that results in death of the member of an endangered species. The use of this product may pose a hazard to Federally designated endangered/threatened species. Suggested measures to protect endangered species in your county may exist in an EPA "Interim Measures" pamphlet. You may call EPA's Endangered Species Hotline, 1-800-447-3813, to find out if an "Interim Measures" pamphlet exists for your county and have one sent to you. You can also consult your local county extension office or pesticide state lead agency to determine whether they have imposed any requirements in your area to protect endangered and threatened species.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read this label: Read this entire label and follow all use directions and use precautions.

LAWNS, GOLF COURSES, NON-CROP AREAS

Use Restrictions: For use against moles and pocket gophers in lawns, golf courses, and other noncrop areas. Do not apply in gardens and areas where food or feed may be contaminated.

Only apply the bait underground.

Collect and bury all dead animals found above the ground. This product is to be used in manual applications only. Do not apply this product by use of an artificial burrow builder.

Specific Direction for Moles: The presence of moles may be indicated by a network of surface ridges in the turf, by a series of conical mounds of earth pushed up from deep burrows, or by damage to bulbs.

Surface Ridges: Prior to treatment determine which burrows are active according to one of the following two methods. Either press down a small section of the tunnel or remove a one inch section of the tunnel's roof. Mark these sections and recheck in 24 hours. The burrow is considered active if the flattened runway has been raised up or if the roof has been repaired. Only treat active burrows. Carefully, punch a hole in the top of active tunnels, drop a teaspoon amount of this product and carefully close the hole with sod or stone. Do not collapse the runway again or allow loose soil to cover the bait. After a few days check to see if the burrows are still active according to one of the two methods described above. If so, repeat treatment.

Conical Mounds: Remove center plug from the conical mound with aid of a long-handled spoon and drop a teaspoon amount of this product into the underground tunnel. Cloes opening with rock or soil. Do not allow loose dirt to cover bait.

Bulb Protection (Fall Planted): Pack about one-quarter inch of soil against each bulb. Place several pellets at sides of and around the bulb. Then cover.

Specific Directions for Pocket Gophers: Burrowing pocket gophers (Thomomys spp. and Geomys spp.) throw out low, fan shaped mounds on either side of their underground tunnel. These lateral tunnels coming to the surface are on the flat side of the fan and are plugged with soil. With a long-handled spoon carefully remove the plug. Insert a teaspoon of this product as far down as possible. Redo opening being careful not to cover bait with soil.

ST

Do not apply near water sources. Place in non-food grade containers.

Pesticide dry place closed.

Pesticide dry place closed. Place in non-food grade containers.
