FIRST AID
Have Product Container or Label with You When Calling a Poison Control Center or Doctor or Going in for Treatment. Any person applying zinc phosphide products and experiencing signs and symptoms of toxicity should seek medical treatment immediately. If symptoms appear in the chest, or weakness, needs to be seen by a physician immediately.

If swallowed:
• Call a poison control center, doctor, or 1-800-498-5742, immediacy for treatment advice or transport the patient to the nearest hospital.
• Do not give any liquid to the patient.
• Do not administer anything by mouth.
• Do not induce vomiting unless told to do so by a poison control center or doctor.

If on skin or clothing:
• Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for further treatment advice.

If inhaled:
• Any person applying zinc phosphide products and experiencing signs and symptoms of toxicity should seek medical treatment immediately.
• Call a poison control center or doctor for further treatment advice.

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for further treatment advice.

TREATMENT FOR PET POISONING: If animal eats bait, call veterinarian at once.

NOTE: PHYSICIAN OR VETERINARIAN Contains the Phosphine-producing active Zinc Phosphide. Probable mucosal damage may contraindicate the use gastric lavage. For animals ingesting bait and/or showing pinpointing signs, induce vomiting by using hydrogen peroxide. Sodium bicarbonate can be given orally to neutralize the gastric acidity. The stomach and intestinal tract can be washed with activated oxygen administered and cardiac and circulatory stimulants given.

For 24-hour emergency information on this product, call 1-800-498-5742 (US & Canada) or 1-957-523-0818 (all other areas).

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS: Caution: Harmful if swallowed. Avoid contact with skin, or inhale. Avoid contact with eyes. Avoid dusting bait. Avoid contact with skin or eyes. Do not contaminate clothing, food, or water sources. Wash hands thoroughly with soap and water before eating, drinking, and chewing gum, using tobacco or using or touching hair. Remove contaminated clothing and wash clothing before reuse. Any person who recovers carcasses or unused bait following application of this product must wear waterproof gloves.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to birds, fish and other wildlife. Wildlife feeding on treated bait may be killed. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions, use restrictions and precautions.

LAWNS
Specific Directions for Moles:
• With a long-handled spoon carefully remove the center plug from each conical mound. Drop a teaspoon amount of this product into the underground tunnel. Close the opening with a rock or sod. Do not allow loose dirt to cover the bait. If mole activity persists after one treatment, a second treatment may be made. If mole activity persists after two treatments, abandon use of this product and seek another method for controlling moles.

• Flower Bait Bulb (Fall Planted): Pack about one-quarter inch of soil around each flower bulb. Place several pellets at sides of and around each flower bulb. Then cover.

SURFACE RIDGES: Prior to treatment determine which burrows are active using one of the following two methods. Either press down a small amount of the outer earth against each section of the tunnel’s roof. Mark these sections and recheck in 24 hours. The burrow is considered active if the flattened runway has been raised up if the roof has been repaired. Only treat active burrows. Carefully, with a long-handled spoon, punch a hole in the top of active tunnels, drop a teaspoon amount of this product and carefully close the hole with sod or stone. Do not collapse the runway or again allow loose soil to cover the bait. After a few days check to see if the burrows are still active according to one of the two methods described above. If so, repeat treatment.

Conical Mounds: With a long-handled spoon carefully remove the center plug from each conical mound. Drop a teaspoon amount of this product into the underground tunnel. Close the opening with a rock or sod. Do not allow loose dirt to cover the bait. If mole activity persists after one treatment, a second treatment may be made. If mole activity persists after two treatments, abandon use of this product and seek another method for controlling mules.

Bait must be applied directly into mole and pocket gopher burrows systems. Any person who recovers carcasses or unused bait following application of this product must wear waterproof gloves.

This product may only be used at the use sites and by the application methods indicated on this label.

Do not apply in gardens where food or feed may be contaminated.

Do not apply this product by use of an artificial burrow builder.

Specific Directions for Mole:
• The presence of moles may be indicated by a network of surface ridges in the turf, by a series of conical mounds of earth pushed up from deep burrows, or by damage to flower bulbs.

Specific Directions for Pocket Gophers:
• Burrowing pocket gophers (Thomomys spp. and Geomys spp.) throw out live, fir shaped mounts on either side of their undergound tunnel. These lateral tunnels coming to the surface are on the flat side of the land and are plugged with soil. With a long-handled spoon carefully remove the plug. Insert a teaspoon of this product as far down as possible. Reopen能让 careful not to cover with soil. Bulk Bait Bulb (Fall Planted): Pack about one-quarter inch of soil around each flower bulb. Place several pellets at sides of and around each flower bulb. Then cover.
