WEEDS CONTROLLED WITH WEED-A-WAY
IT IS BOTH A CONTACT & PRE-EMERGENCE HERBICIDE

Pre-Emergent:
When used as directed, this product will stop the following weeds from emerging:

DIRECTIONS FOR USE: Use only in accordance to label instructions. Read the entire label before using this product. It is a non-selective weed control in and around crops and non-crop areas. Apply Weed-a-Way directly to weeds. Best result when weeds are 1/2” to 2” in height, cover weeds thoroughly. Avoid contact to crops.
Spraying with hooded spray equipment is recommended to prevent the spray from contacting the crop, DAMAGE TO THE CROP WILL OCCUR.

GENERAL INFORMATION: Weed-a-Way is a non-selective, broad spectrum, foliar herbicide. This product will only control actively growing emerged green vegetation. For best control spray when weeds are small 1/2 to 1 in size. The degree of control is less when plants are mature. The product does NOT translocate. Weed-A Way will affect only those areas or the plant that coated with the spray solution.

Dilution Rates: 7 ounces/gallon of water for weeds under 2 inches 15 ounces/gallon of water for weeds 3 to 6 inches high. 1 to 1 is best for weeds larger than 6 inches high.
