Aseptrol® S10-Tab
Oxidizing Tablets
Disinfectant. Virucidal.*
For Use in Hospitals, Medical, Dental, Industrial, Manufacturing and Institutional Facilities

Active Ingredients:

Sodium Hypochlorite: ............ 20.8%  
Sodium Dichloroisocyanurate dinitratate .......... 7.0%  
Other Ingredients: .................. 12.2%  
Total: 100.0%  

EPA Reg. No. 70006-19 / EPA Est. No.: 70080-MS-001

KEEP OUT OF REACH OF CHILDREN
DANGER!/PELIGRO!

Si usted no entiende esta etiqueta, busque a alguien para que se la explique. (If you do not understand this label, find someone to explain it to you in detail.)

First Aid

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Have the container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS
Hazard to Human and Domestic Animals

DANGER: Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through the skin. Wear protective goggles or face shield. Wear coveralls, over long-sleeved shirt and long pants, socks, chemical resistant footwear, and rubber gloves. Wear thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco before going to the toilet. Remove contaminated clothing and wash clothing before reuse.

Environmental Hazards

This product is toxic to fish and other aquatic organisms.

Storage and Disposal

Store this product in a cool, dry area away from direct sunlight and heat to avoid decomposition, and in an area inaccessible to children. Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. If not, do not allow to Leach into soil or water bodies, wet or dry. Process waste from leach or dry. Process waste from leaching out. Manage waste in a manner consistent with the laws in the area of use. Do not treat waste as sewage or stormwater. Do not treat as sewage or stormwater. Do not apply waste to landfills.

A 100 ppm use-solution of chlorine dioxide has been shown to be effective against: Vaccinia virus, Human Influenza A virus (Hong Kong), Porcine Respiratory and Reproductive Syndrome Virus (PRRSV), Infectious Bursal disease virus (IBDV), Marlex’s disease virus (MDV), Avian Influenza A (H3N2) virus, Porcine circovirus type 2, Canine Parvovirus, Herpesviruses, Minute Virus of Mouse (Parvovirus) (MVM-m), Mouse Parvovirus (MVM-p), Mouse Hepatitis Virus (MHV-A59), Mouse hepatitis Virus (MHV-JHM), Mouse Parvovirus type (1) (MPV-1), Murine Parainfluenza Virus Type 1 (Sendai), Rabies Virus (Coronavirus) (SDAV), Thielers Virus (Coronavirus) (STAV), Canine Coronavirus, and Helicobacter pylori after 10 minutes of contact and Foot and Mouth Disease Virus after 30 minutes of contact.

Food-Contact Surface Sanitizer

Use Aseptrol S10-Tab to sanitize hard, nonporous food-contact surfaces and utensils in food-processing plants, breweries, bottlingplants, restaurants and other food-handling establishments. Prior to application, remove gross food particles and soil by a pre-flush, or pre-scrub and, when necessary, pre-scraper. Then thoroughly wash or flush surfaces with a good detergent or compatible cleaner followed by a potable water rinse before application of the sanitizer solution. Apply a use-solution of 25 ppm chlorine dioxide to pre-cleaned hard surfaces thoroughly wetting surfaces that are in contact, mop, sponge, or spray to prevent it from sticking. Surfaces must remain wet for at least 60 seconds and then followed by adequate draining and air drying. Do not rinse. Prepare a fresh solution for each use.

As Aseptrol S10-Tab has demonstrated effectiveness against Influenza A virus and is expected to inactivate all Influenza A viruses including Pandemic 2006 H1N1 (formerly called swine flu).

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Preparation of Use-solution:

25 ppm Chlorine Dioxide (for sanitisation of hard, nonporous food contact surfaces, including surfaces containing Salmonella enterica and Listeria monocytogenes).

In a clean plastic pail, place one (1) 1.5 gram Aseptrol S10-Tab for every gram of clean, potable water or in a plastic pigmented spray bottle, please one (1) 1.5 gram Aseptrol S10-Tab for every quart (or liter) of clean, potable water. Prepare in a well-ventilated area. Wait 10 minutes for the 1.5 gram tab to completely dissolve. Once dissolved, the will yield a working solution of 25 ppm of free chlorine dioxide. Once mixed, this solution should be stored in a tightly covered container and used within 7 days.

100 ppm Chlorine Dioxide (for control of Foot and Mouth Disease Virus, Human Influenza A virus (Hong Kong), Avian Influenza A (H3N2) virus and animal viruses).

In a clean plastic pail or plastic pigmented 1 gallon bottle, place four (4) (1.5 gram Aseptrol S10-Tab) for every gallon (4 liters) of clean, potable water or in a plastic pigmented spray bottle, please one (1) 1.5 gram Aseptrol S10-Tab for every quart (or liter) of clean, potable water. Prepare in a well-ventilated area. Wait 10 minutes for the 15 gram tab to completely dissolve. Once dissolved, this will yield a working solution of 100 ppm of free chlorine dioxide. Once mixed, this solution should be stored in a tightly covered container and used within 7 days.

200 ppm Chlorine Dioxide (for disinfection of healthcare facilities, medical equipment, surfaces and instruments, and to kill tuberculosis bacteria, human coronaviruses, HIV, Hepatitis B Virus, Hepatitis C Virus, Transmissible Gastroenteritis, Feline Panleukopenia Virus, New Castle Disease Virus, Norovirus, Pseudorabies, and Swine Influenza Virus A).

In a clean plastic pail or pigmented 1 gallon bottle, place eight (8) (1.5 gram Aseptrol S10-Tab) for every gallon (4 liters) or in a plastic pigmented spray bottle (200 ppm, please one (1) 1.5 gram Aseptrol S10-Tab for every 500 ml) of clean, potable water. Prepare in a well-ventilated area. Wait 10 minutes for the 1.5 gram tab. Once dissolved, this will yield a working solution containing 200 ppm of free chlorine dioxide. Once mixed, this solution should be stored in a tightly covered container and used within 7 days.

Institutional and Industrial Facilities

Use Aseptrol S10-Tab to disinfect pre-cleaned surfaces in institutional and industrial facilities such as office buildings, food-processing plants, offices, schools, hotels and motels, recreational facilities, recreational centers, institutional kitchens, supermarkets, grocery stores, boats, public facilities and military installations. Apply a 200 ppm chlorine dioxide use-solution to food, non-porous surfaces thoroughly wetting surfaces with a cloth, mop, sponge or spray to or by immersion. Treated surfaces must remain wet for 10 minutes (30 minutes for Foot and Mouth Disease Virus). Wipe dry with a cloth, sponge or mop or allow to air dry. For sprayer applications, use a coarse spray device. Spray at 6·8 inches from the surface and spray until wet. Do not disperse spray. Allow to air dry. A potable water rinse is required for any surface that may come into contact with food.

Healthcare

Use Aseptrol S10-Tab to disinfect pre-cleaned surfaces and to decontaminate instruments in hospitals, medical and dental offices. Apply a 200 ppm chlorine dioxide use-solution to hard, non-porous surfaces and/or instruments thoroughly wetting surfaces with a cloth, mop, sponge or spray or by immersion. Treated surfaces must remain wet for 10 minutes (30 minutes for Foot and Mouth Disease Virus). Wipe dry with a cloth, sponge or mop or allow to air dry. For sprayer applications, use a coarse spray device. Spray at 6·8 inches from the surface and spray until wet. Do not disperse spray. Allow to air dry. The 200 ppm chlorine dioxide use-solution is effective against gram negative and gram positive bacteria, human coronaviruses, Hepatitis B Virus, Hepatitis C Virus, New Castle Disease Virus, Norovirus, Foot and Mouth Disease Virus, Human Influenza A virus (Hong Kong), Avian Influenza A (H3N2) virus, animal viruses* and tuberculosis bacteria.

This product is not be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the body barrier or otherwise enter normally sterile areas of the body. This product may be used to decontaminate precooled critical or semi-critical medical devices prior to sterilization or high-level disinfection. Special Instructions for Cleaning and Decontamination Against HIV, HBV & HCV on Surfaces and Fluids in AIDS to Be Used with Blood/Body Fluids.

This product is intended for use in hospitals and other patient care settings where there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects soiled with blood or body fluids can be associated with the transmission of HIV, HBV and HCV. Aseptrol S10-Tab destroys HIV-1, HBV and HCV on pre-cleaned environmental surfaces/objects previously soiled with blood or other body fluids at 200 ppm and 1 minute contact (10 minutes for HIV and HCV). PERSONAL PROTECTION: The user should wear disposable latex gloves, gown, mask and eye protection to prevent contamination from soiled items.

Clean-up Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of Aseptrol S10-Tab solution.

Contact Time: Allow Aseptrol S10-Tab solution to contact treated items for 1 minute (10 minutes for HBV and HCV). A contact time of 1 minute will not control other common types of viruses and bacteria.

Disposal of Infectious Materials: Any blood and other body fluids should be autoclaved and disposed of according to federal, state, and local regulations for infectious waste disposal.
