Aseptrol® S10-Tab
Oozing Tablets
Disinfectant/Vinulcid

For Use in Hospitals, Medical, Dental, Industrial, Manufacturing and Institutional Facilities

Aseptrol S10-Tab has demonstrated effectiveness against Influenza A virus and is expected to inactivate all influenza A viruses including Pandemic 2009 H1N1 (formerly called swine flu).

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PREPARATION OF USE SOLUTION:
25 ppm Chlorine Dioxide (for sanitization of hard, nonporous food contact surfaces, including surfaces containing Salmonella enterica and Listeria monocytogenes).

In a clean plastic bottle, place one (1) 5.0 gram Aseptrol S10-Tab for every 4 gallons of clean, potable water or in a plastic pigmented spray bottle, place one (1) 6.0 gram Aseptrol S10-Tab for every four gallon (15.4 liters) of clean, potable water. Prepare in a well-ventilated area. Wait 15 minutes for the 6.5 gram tab to completely dissolve. Once dissolved, this will yield a working solution of 25 ppm of free chlorine dioxide. Once mixed, this solution should be stored in a tightly-covered container and used within 7 days.

100 ppm Chlorine Dioxide (for control of Foot and Mouth Disease Virus, Human Influenza A Virus [Hong Kong], Avian Influenza A Virus (H9N2) virus and animal viruses).

In a clean plastic bottle or plastic pigmented 1 gallon bottle, place one (1) 8.0 gram Aseptrol S10-Tab for every gallon (4 liters) of clean, potable water. Prepare in a well-ventilated area. Once dissolved, this will yield a working solution of 100 ppm of free chlorine dioxide. Wait 15 minutes for the 6.5 gram tab to completely dissolve. Once mixed, this solution should be stored in a tightly-covered container and used within 7 days.

200 ppm Chlorine Dioxide (for disinfection of hard, nonporous surfaces and instruments, and to kill fowl to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS
HAZARDS TOKeyCode: DANGEROUS ANIMALS
DANGER: Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through the skin. Wear protective goggles or face shield. Wear coveralls, over-long-sleeved shirt and long pants, socks, chemical resistant footwear, and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, before going to the toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and other aquatic organisms.

STORAGE AND DISPOSAL
This product is toxic to fish and aquatic organisms. Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE: Store this product in a cool, dry area away from direct sunlight and heat to avoid deterioration and in an area inaccessible to children.

PESTICIDE DISPOSAL: Pesticide wastes are hazardous wastes. Improper disposal of pesticides, sprayer mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed-of-by-use-according-to-label instructions, contact your State Pest Control/Enforcement Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. If recycling is not available place empty pouch or bottle pack container in plastic bag and discard in trash.

*A 100 ppm use-solution of chlorine dioxide has been shown to be effective against: Vaccinia virus, Human Influenza A Virus [Hong Kong], Peromyscus Respiratory and Reproductive Syndrome Virus (PRRSV), Infectious Bursal disease virus (IBDV), Marek’s disease virus (MDV), Avian Influenza A virus (H5N1), Porcine circovirus type 2, Cattle Parvovirus, Herpesvirus, Minute Virus of Mouse (PVMV), Mouse Parvovirus type 1 (MVM-1), Murine Parainfluenza Virus Type 1 (Sendai), Sialodacryoadenitis Virus (Coronavirus) (SDAV), Thelid’s Mouse Encephalomyocarditis virus, Common cold bovine, and Helicobacter pylori after 10 minutes of contact and Foot and Mouth Disease Virus after 30 minutes of contact.

FOOD-CONTACT SURFACES
Use Aseptrol S10-Tab to sanitize hard, nonporous food-contact surfaces and utensils in food processing plants, breweries, bottling plants, restaurants and other food-handling establishments.

Prior to application, remove gross food particles and soil by a pre-brush, or pre-scrub and, when necessary, pre-scrub. Then thoroughly wash or flush surfaces with a pre-brush or deterrent cleaning solution by a potable water rinse before application of the sanitizer solution. Apply a use-solution of 25 ppm chlorine dioxide to pre-cleaned hard surfaces thoroughly washing surfaces with a pre-brush, mop, sponge, or coarse sprayer by immersion. Surfaces must remain wet for at least 90 seconds and then follow by appropriate drying and air drying. Do not rinse. Prepare a fresh solution for each use.
