See insert for Directions for Use.
CuVerro™
Antimicrobial Copper Surface

Laboratory testing has shown that when cleaned regularly this surface:

- Kills more than 99.9% of bacteria* within 2 hours, and continues to kill 99% of bacteria* even after repeated contamination.
- Delivers continuous and ongoing antibacterial action, remaining effective in killing greater than 99.9% of bacteria* within 2 hours.
- Helps inhibit buildup and growth of bacteria* within 2 hours of exposure between routine cleaning and sanitizing steps.
- Kills greater than 99.0% of Gram-negative and Gram-positive bacteria* within 2 hours of exposure.
- Continuously reduces bacterial* contamination, achieving 99.9% reduction within 2 hours of exposure.

*Testing demonstrates effective antibacterial activity against Staphylococcus aureus, Enterobacter aerogenes, Methicillin-Resistant Staphylococcus aureus (MRSA), Escherichia coli 0187:H7, and Pseudomonas aeruginosa.

The use of this product is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination.

EPA Reg. No. 06369-3
EPA Est. No. 06369-1L-003

DIRECTIONS FOR USE:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PROPER CARE AND USE: The use of this product does not replace standard infection control procedures and good hygienic practices. Surfaces must be cleaned and sanitized according to standard practice. Health care facilities must maintain this product in accordance with infection control guidelines; users must continue to follow all current infection control practices, including those practices related to disinfection of environmental surfaces. Surface may be subject to recontamination and level of active bacteria at any particular time will depend on the frequency and timing of recontamination and cleanliness of the surface (among other factors). In order for the surface to have proper antimicrobial effect, the product must be cleaned and maintained according to the directions included in this label. THIS PRODUCT MUST NOT BE WAXED, PAINTED, LACQUERED, VARNISHED, OR OTHERWISE COATED. Routine cleaning to remove dirt and filth is necessary for good sanitation and to assure the effective antibacterial performance of this copper surface. Cleaning agents typically used for traditional touch surfaces are permissible if the appropriate cleaning agent depends on the type of soiling and the measure of sanitization required. Normal tarnishing or wear of this product will not impair the antimicrobial effectiveness of the product. This product can not be used for any direct food contact or food packaging uses. Surfaces that may be exposed to outdoor environmental conditions (e.g., handrails, shopping carts, child seats and ATM machines) are not representative of indoor laboratory test conditions, and therefore, may impact reduced efficacy if not cleaned when visibly soiled.

STORAGE AND DISPOSAL: This product should be disposed in a responsible manner, including recycling.

WARRANTY STATEMENT: If used as intended this product is warrantee resistant and the durable antibacterial properties will remain effective for as long as the product remains in place and is used as directed.
