- Keeping Your Lawn Free Of Damaging Grubs Has Never Been Easier

- One application kills White Grubs, Mole Crickets and European Crane Flies All Year Round

Treats up to 5,000 sq. ft.)
KNOCKOUT

Grub Killer Granules

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if absorbed through skin. Causes minimal eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

FIRST AID

IF ON SKIN OR CLOTHING:

• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.

IF IN EYES:

• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF SWALLOWED:

• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

NOT HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-877-525-1840 for emergency medical treatment information.

NOTE TO PHYSICIAN

No specific antidote is available. Treat the patient symptomatically.

ENVIRONMENTAL HAZARDS

This product is highly toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street back onto the treated area of the lawn or garden will help to prevent runoff to water bodies or drainage systems.

DIRECTIONS AND GENERAL INFORMATION

NOT FOR SALE, USE OR DISTRIBUTION IN OR INTO MASSACHUSETTS, RHODES ISLAND, CONNECTICUT AND NEW YORK.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For use on lawns, landscaped areas and plantings such as around trees, shrubs, flower and ornamental beds. Do not apply near fish ponds, pools, streams or lakes.

GENERAL INFORMATION

This product can be used for control of soil pests such as mole crickets and white grubs, including the larvae of Japanese beetle, Oriental beetle, Chafer, Asian garden beetle, May beetle, June beetle and black turf borers as well as European crane fly larvae. This product can also be used to control billbugs, cutworms, grubs and European cranes fly larvae.

2.87 pounds

Treat when insects first appear. Apply this product evenly over the turfgrass area at the use rate indicated in the above table, using a properly calibrated drop or rotary spreader. A more uniform application may be achieved by spraying half of the required amount of product over the area and then applying the remaining half in swaths at a right angle to the first. For optimum control, irrigation or rainfall should occur within 24 hours after application to move the active ingredient through the thatch and down into the soil. Avoid lawn until after irrigation or rainfall has occurred so that uniformity of the application will not be affected.

This product works best when applied before mole crickets and grubs hatch. If necessary, consult your local State extension agent for the ideal times to apply this product in your area. Do not apply this product to potential treated areas that are waterlogged or saturated with water. This product may not work effectively in these times of conditions.

FLOWER BEDS, GROUND COVERS, TREES AND SHRUBS

Application Instructions

Apply this product at the rate of 2 tablespoons per 10 square feet of planting bed (1/4 cups per 100 square feet of planting bed). Evenly spread granules to the soil over flower beds, ground cover plantings, shrub beds and under trees. The use of a hand-held spreader is recommended. Mix granules into the soil around plants. Water thoroughly after application.

SPREADER SETTINGS

Broadcast Spreaders:

For best results, apply in a circular pattern starting on the outside and working toward the center. A little overlap of product will ensure complete coverage.

Drop Spreaders:

First, apply 2 border strips along the edge of each end of the lawn. Then apply product along the length of the lawn, overlapping slightly and shutting off the spreader before turning as you reach the edge of the border strips.

APPLICATIONS INSTRUCTIONS

See Spreader Settings chart below. Adjust spreader to the appropriate setting. Make sure that the spreader works properly and spreads granules uniformly. Apply to the border and then fill in the center to ensure the entire area is covered completely. To make sure that the product is evenly distributed, walk at a steady pace making parallel passes. Do not use a spreader that applies granules in narrow, concentrated or uneven bands. Water thoroughly after application.

IMPORTANT: It is important to follow the directions indicated on this quality lawn care product as over-application may cause injury to the lawn. Measure the size of the area to be treated and do not over or under apply. Spreader settings are approximate. Differences may occur due to condition of spreader, speed at which applied, and roughness of area treated. Calibrate spreader prior to use according to the manufacturer’s directions. Check frequency to be sure equipment is working properly and uniformly. Close spreader when filling, stopping or turning. Do not hand spread.
