FIBERGLASS BOTTOMKOTE® NT

PRODUCT DESCRIPTION: Fiberglass Bottomkote NT™ uses a dual resin technology that provides a universal, durable, fast-dry antifouling paint that delivers the benefits of both hard and soft antifouling paints for use on all power and sailboats. The universal formula of Fiberglass Bottomkote NT has durability of a traditional hard paint but has a slow-polymerizing mechanism built in to continuously smooths and renews the active surface avoiding the heavy build-up of paint layers much like a polishing paint. The fast-dry formula allows the boat to be painted and launched in the same day. Fiberglass Bottomkote NT provides cleanable surfaces for effective seasonal long protection. Fiberglass Bottomkote NT is recommended for use on the underwater areas of fiberglass, wood, and properly primed metal (except aluminum) boats hulls. It can be used in fresh, salt and brackish waters.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

COMPATIBILITY: Fiberglass Bottomkote NT can be applied over most other antifouling paints provided the old coating is tightly adhered, in sound condition and has been thoroughly sanded with 80 grit wet-or-dry sandpaper. Fiberglass Bottomkote NT can be applied by brush, roller, or spray.

THEORETICAL COVERAGE: 400 sq. ft. (40 m²) yields 2 mls dry film thickness.

THINNING: Thin only when necessary. Do not exceed 10% maximum.

APPLICATION TEMPERATURE: 50°F (10°C) and above (air and hull).

ESTIMATED DRY TIMES:

All the air temperature falls below 50°F (10°C) during the dry time extend the dry time by 12 hours minimum.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as gloves, long-sleeved cover, short, long pants, and hat. May be fatal if swallowed or inhaled. Do not breathe dust, vapor or spray mist. While spraying paint or sanding or sandblasting boat surfaces, wear a mask or a respirator jointly approved by the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health. Remove any contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If Swallowed:
- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.
- Call a poison control center or doctor for further treatment advice if swallowed.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

Note to Physician: Contains petroleum distillate — vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by careless disposal or release of wastes. Do not allow chips and dust generated during paint removal to enter water. Do not dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, oceans, or other waters unless in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray mixture, or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into an equipment application or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¾ full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FIRE CHEMICAL EMERGENCY: LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMTEC 1-800-424-3300 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-854-6813.

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION:

Resand all traces of bare paint and contamination by sanding the entire surface with 80 grit wet-or-dry sandpaper; wipe surface clean with Special Thinner 216. Apply at least 2 coats of Fiberglass Bottomkote NT.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION:

Completely remove all old antifouling paint, using Interlux Intersip 299E for fiberglass, and wood, and by sandblasting or grinding to near white metal for steel. Follow application systems below.

BARE FIBERGLASS:

It is very important that bare fiberglass be properly prepared to prevent delamination of the antifouling paint. Remove mold release wax and surface contamination by using one of the following interlux products: Fiberglass Surface Prep M4W01 or Fiberglass Solvent Wash 292 following the product label instructions. Fill any surface imperfections with Interlux Waterfill W471 before applying the label instructions. After the surface has been properly cleaned, proceed with one of the application systems below.

APPLICATION SYSTEMS

BARE FIBERGLASS - NO SAND SYSTEM:

Clean the surface following the preparation procedure above. Apply one coat of Interlux InterProtect® 2000 or Fiberglass No-Sand Primer V4002 following the label instructions for applying the primer and ever coating with antifouling paint. Apply two coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

BARE FIBERGLASS - SANDING SYSTEM:

Clean the surface following the preparation procedure above for bare fiberglass. Sand the entire surface with 80 grit sandpaper until a flat matte finish is obtained. Wipe the sanding residue off the surface with Fiberglass Solvent Wash 292. Sand and wipe clean. Apply two coats of Fiberglass Bottomkote NT allowing for appropriate dry times.

BARE FIBERGLASS - BLISTER PREVENTION SYSTEM:

Apply the InterProtect system for the prevention of blisters. Contact the Interlux Technical Service Department at 1-800-668-7589 or visit yachts.com for complete instructions on the application of the InterProtect System.

BARE WOOD:

Sand the entire surface with 80 grit sandpaper. Wipe the sanding residue off the surface with Special Thinner 216. Apply the first coat of Fiberglass Bottomkote NT Thinner 10% with Special Thinner 216 or Brush-Ease 433. Fill seams with Interlux Seam Compound 30 (if necessary). Apply two more coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

UNDERWATER METALS:

Contact the Interlux Technical Service Department at 1-800-668-7589 for full information on how to properly prime underwater metals or steel hulls. More systems and information available on www.yachts.com. Do not USE ON ALUMINUM.

Color difference may occur between actual paint and color swatch on front of can.

*The air temperatures listed above are 50°F (10°C) during the dry time and the dry times by 12 hours minimum.

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION:

Remove all traces of loose paint and contamination by sanding the entire surface with 80 grit wet-or-dry sandpaper; wipe surface clean with Special Thinner 216. Apply at least 2 coats of Fiberglass Bottomkote NT.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION:

Completely remove all old antifouling paint, using Interlux Interstrip 295S for fiberglass, and wood, and by sandblasting or grinding to near white metal for steel. Follow application systems below.

BARE FIBERGLASS:

It is very important that bare fiberglass be properly prepared to prevent dematuration of the antifouling paint. Remove mold release wax and surface contamination by using one of the following Interlux products: Fiberglass Surface Prep 1MM/101 or Fiberglass Solvent Wash 202 following the product label instructions. Fill any surface imperfections with Interlux WaterKOat 135S following the label instructions. After the surface has been properly cleaned, proceed with one of the application systems below.

APPLICATION SYSTEMS:

BARE FIBERGLASS - NO SAND SYSTEM:

Clean the surface following the preparation procedure above. Apply one coat of Interlux IntProtec® 2000 or its equivalent, using 80 grit sandpaper. Wipe the entire surface with 80 grit sandpaper until a flat matte finish is obtained. Apply the flat matte finish with interlux primer or Fiberglass Smooth Wash 202 following the label instructions. Apply two coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

BARE FIBERGLASS - SANDING SYSTEM:

Clean the surface following the preparation procedure above for bare fiberglass. Sand the entire surface with 80 grit sandpaper until a flat matte finish is obtained. Wipe the sanding residue off the surface with Fiberglass Smooth Wash 202. Sand and wipe clean. Apply two coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

BARE FIBERGLASS - BLISTER PREVENTION SYSTEM:

Apply the IntProtec paint for the prevention of blisters. Contact the Interlux Technical Service Department at 1-800-469-7298 for more information on the application of the Int-Protec system.

BARE WOOD:

Sand the entire surface with 80 grit sandpaper. Wipe the sanding residue off the surface with Special Thinner 216. Apply one coat of Fiberglass Bottomkote NT Thinned 10% with Special Thinner 216 or Brush-Ease 433. Fill seams with Interlux Seam Compound 30 if necessary. Apply two coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

UNDERWATER METALS:

Contact the Interlux Technical Service Department at 1-800-469-7298 for more information on how to properly prime underwater metals or steel hulls. More systems and information available on www.yachtpaint.com. DO NOT USE ON ALUMINUM.

Color difference may occur between actual paint and color swatch on front of can.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be fatal if swallowed or inhaled. Do not breathe dust, vapor or spray mist. While spraying paint or sanding or sand blasting boat surfaces, use a mask or a respirator. Jointly approved by the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If Swallowed:

Immediately call a poison control center or doctor.

Do not induce vomiting unless told to do so by a poison control center or doctor.

Do not give any liquid to the person.

Do not give anything by mouth to an unconscious person.

If on skin or clothing:

Take off contaminated clothing.

Rinse skin immediately with plenty of water for 15-20 minutes.

Call a poison control center or doctor for treatment advice.

If Inhaled:

Move person to fresh air.

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

Call a poison control center or doctor for further treatment advice.

If in eyes:

Hold eyes open and rinse slowly and gently with water for 15-20 minutes.

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Call a poison control center or doctor for treatment advice.

Other:

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate; vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by mixing of equipment or disposal of waste. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waterways unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office in the EPA.

PHYSICAL OR CHEMICAL HAZARD

Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

PEC'TIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray mixtures, or rinsates is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recyle. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or trash rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

*The air temperature falls below 50°F (10°C) during the dry time exceed the dry times by 1/2 hours minimum.

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of old paint and contamination by sanding the entire surface with 80 grit wet-or-dry sandpaper; wipe surface clean with Special Thinner 216. Apply at least 2 coats of Fiberglass Bottomkote NT.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint, bottom paint, and old rime. Then sand the surface with 80 grit sandpaper; wipe surface clean with Special Thinner 216. Apply at least 2 coats of Fiberglass Bottomkote NT.

APPLICATION SYSTEMS

BARE FIBERGLASS: It is very important that bare fiberglass be properly prepared to prevent demineralization of the anti-fouling paint. Remove mold release wax and surface contamination by using one of the following Interlux products: Fiberglass Paint Prep YMS01 or Fiberglass Solvent Wash 202 following the product label instructions. After the surface has been properly cleaned, proceed with one of the application systems below.

BARE FIBERGLASS - NO SAND SYSTEM: Clean the surface following the preparation procedure above. Apply one coat of Interlux InterProtect® 2000 or Fiberglass No-Sand Epoxy Primer 500 following the label instructions for applying the primer and overcoating with antifouling paint. Apply two coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

BARE FIBERGLASS - SANDING SYSTEM: Clean the surface following the preparation procedures above for bare fiberglass. Sand the entire surface with 80 grit sandpaper until a flat matte finish is obtained. Wipe the sanding residue off the surface with Fiberglass Solvent Wash 202. Sand and wipe clean. Apply two coats of Fiberglass Bottomkote NT for the appropriate dry times.

BARE FIBERGLASS - BLISTER PREVENTION SYSTEM: Apply the InterProtect system for the prevention of blisters. Contact the Interlux Technical Service Department at 1-800-408-7769 or visit yachtpaint.com for complete instructions on the application of the InterProtect system.

BARE WOOD: Sand the entire surface with 80 grit sandpaper. Wipe the sanding residue off the surface with Special Thinner 216. Apply the first coat of Fiberglass Bottomkote NT thinned 10% with Special Thickener 216 or Brush-Ease 433. Fill seams with Interlux Seam Compound 30 (if necessary). Apply two more coats of Fiberglass Bottomkote NT unthinned, allowing for the appropriate dry times.

UNDERWATER METALS: Contact the Interlux Technical Service Department at 1-800-408-7769 for full information on how to properly prime underwater metals or steel hulls. More systems and information available on yachtpaint.com.

DO NOT USE ON ALUMINUM.

Color difference may occur between actual paint and color swatch on front of can.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be fatal if swallowed or inhaled. Do not breathe dust, vapor or spray mist. Do not breathe dust, vapor or spray mist. PREVIOUSLY PAINTED SURFACES - GOOD CONDITION

Remove all traces of bare paint and contamination by sanding the entire surface with 80 grit wet or dry sandpaper; wipe surface clean with Special Thinner 216. Apply at least 2 coats of Fiberglass Bottomkote NT.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION

Completely remove all old antifouling paint utilizing Interlux thinners. 209E for fiberglass, and wood, and by sandblasting or grinding to near white metal for steel. Follow application systems below.

BARE FIBERGLASS:

It is very important that bare fiberglass be properly prepared to prevent contamination of the antifouling paint. Remove mold release wax and surface contamination by using one of the following Interlux products: Fiberglass Surface Prep 990 or Fiberglass Solvent Wash 202. After the surface has been properly cleaned, proceed with one of the application systems below.

APPLICATION SYSTEMS

BARE FIBERGLASS - NO SAND SYSTEM: Clean the surface following the preparation procedure above. Apply one coat of Interlux InterProtect® 2000 or Interlux Fiberglass No-Sand Primer VP 200 following the label instructions for applying the primer and over coating with antifouling paint. Apply two coats of Fiberglass Bottomkote NT, allowing for the appropriate dry times.

BARE FIBERGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure above for bare fiberglass. Sand the entire surface with 80-grit sandpaper until a flat matte finish is obtained. Wipe the sanding residue off the surface with Fiberglass Solvent Wash 202. Sand and wipe clean. Apply two coats of Fiberglass Bottomkote NT allowing for the appropriate dry times.

BARE FIBERGLASS - BLISTER PREVENTION SYSTEM: Apply the InterProtect system for the prevention of blisters. Contact the Interlux Technical Service Department at 1-800-408-7569 or visiting paintyard.com for complete instructions on the application of the InterProtect system.

BARE WOOD:

Sand the entire surface with 80-grit sandpaper. Wipe the sanding residue off the surface with Special Thinner 216. Apply one coat of Fiberglass Bottomkote NT followed by Special Thinner 216 or Brush-Ease 433. Fill seams with Interlux Seam Compound 30 (if necessary). Apply two more coats of Fiberglass Bottomkote NT allowing for the appropriate dry times.

UNDERWATER METALS:

Contact the Interlux Technical Service Department at 1-800-408-7569 for full information on how to properly prime underwater metals or steel hulls. More systems and information available on www.yachtpaint.com. DO NOT USE ON ALUMINUM.

Color difference may occur between actual paint and color swatch on front of can.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if inhaled. Avoid contact with skin, eyes, or clothing. Vapor protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be fatal if swallowed or inhaled. Do not breathe dust, vapor or spray mist. While spraying paint or sanding or sand blasting, boat surfaces, wear a mask or a respirator jointly approved by the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after sanding.

FIRST AID

If Swallowed:

- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If Inhaled:

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

Note to Physician: Contains petroleum distillate — vomiting may cause aspiration pneumoni la.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by cleaning of equipment or discharge of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waterbodies unless in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. PESTICIDE DISPOSAL: Paint waste is not a pesticide. Improper disposal of excess pesticides may cause contamination of water, fish, and wildlife. Paint waste is not hazardous. Improper disposal of excess paint is illegal. The manufacturer is not responsible for any hazardous waste generated as a result of the use of this product. Contacts your local government to determine proper methods of disposal. For information on proper disposal, call your local government or environmental authority.

For CHEMICAL EMERGENCY SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL-FREE: CHEMTEC
1-800-424-8930 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-222-1222.
