FIRST AID

IF INGESTED:
If anything goes down the throat, do not induce vomiting. Contact a physician immediately.

IF INGESTED:
For adults and children over 12 years of age, swallow at least 1 fluid ounce (30 mL) of vegetable oil or mineral oil. Do not give anything by mouth if unconscious. Call physician immediately.

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic organisms and is harmful to fish and other aquatic wildlife. Avoid contact with water. Do not spread this product into water. This product is toxic to amphibians, birds, bees. Keep out of reach of children and pets. Do not allow this product to contact plants other than the desired plants. Do not contaminate surface waters containing aquatic life with this product.

APPLICATION TIME

This product may be applied either in the spring or in the fall at the correct of weeds.

When this product is applied in the fall, a sequential or sequential application may be made the following spring to provide a 4 to 6 month control of weeds.

If this product is applied in the fall, 60% of the active ingredient is applied in the fall with 40% of the active ingredient being applied in the spring. This product is known as biological activity in the fall and is applied in the spring to provide control of weeds.

LENGTH OF CONTROL

This product will provide control of weeds for at least 6 weeks after application. When applied according to label directions.

The actual length of control may vary depending on site conditions, including the density, accessibility of the target weed, and the weather at the time of application. The length of control may be increased by reducing the rate of application. The product is known as biological activity in the fall and is applied in the spring to provide control of weeds.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: CARRY EYE PROTECTION, MM, AND SHOES. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. Avoid breathing dust. Do not contaminate clothing and wash before reusing. Good hygiene practices are essential for all individuals.

APPLICATION EQUIPMENT AND INSTRUCTIONS

The product can be applied with a spray or a granular dispenser designed for spray application. For two rates, apply the product at the rate recommended on the label. For a sequential application, apply the product at the rate recommended on the label. A sequential application can be made by applying the recommended amount of this product, as shown on the label, in the fall and then applying the remaining amount of this product at spring to provide sequential application.

Check application equipment monthly to ensure that the equipment is functioning properly and applying a uniform distribution of this product.

SPREADER SETTINGS

Apply 2-3 lbs. of product per 1000 square feet of land. Each contains 5.89 lbs. of product.
