FIRST AID

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 to 20 minutes.
- Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-325-1840 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS
Do not contaminate water when disposing of equipment washwater. Do not contaminate water used for irrigation or domestic purposes. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark.
GENERAL USE PRECAUTIONS

In Arizona, The State of Arizona has not approved this product for use on plants grown for agricultural/commercial production, such as on designated grazing areas.

Do not contaminate irrigation ditches or water used for irrigation or domestic purposes.

Grazing: There are no restrictions on grazing following application of this product at labeled rates.

Do not transfer livestock from treated grazing areas to sensitive broadleaf crop areas without first allowing 7 days of grazing on an untreated pasture. Otherwise, young may contain enough glysophate to cause injury to sensitive broadleaf plants.

Avoid injury to non-target Plants:

This product can affect susceptible broadleaf plants directly through tissue contact and indirectly by root uptake from soil in treated areas. Do not allow spray drift to come in contact with vegetables, flowers, tomatoes, potatoes, beans, lentils, peas, alfalfa, sunflowers, soybeans, or other desirable broadleaf crops or ornamental plants.
BROADLEAF WEED CONTROL IN RANGELAND AND PERMANENT PASTURES (Including but not limited to Ranchette Pastures)

Use this product to control susceptible broadleaf weeds on rangeland areas or established forage grasses in permanent grass pastures. Best results on most weeds are obtained when weeds are small and actively growing (see specific information below).

There are no grazing restrictions following the product's applications when used at labeled rates.

Application Rates

Apply this product at a rate of 1/8 to 1/2 fl. oz. per 1,000 sq. ft. in 2 gallons of water when weeds are young and actively growing. This product may be applied as described below for control of spotted and diffuse knapweed, Canada thistle, musk thistle, yellow starthistle and suppression of Russian knapweed.
CONTAINER DISPOSAL: (continued) equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drop. Repeat this procedure two more times. Then allow for recycling or reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved by State and local authorities. Plastic containers are also disposable by incineration, or if allowed by State and local authorities, by burning. If turned stay out or stone.
