Nufarm

Diquat 2 L
Herbicide

Nufarm Diquat 2 L Herbicide contains diquat dibromide, the active ingredient used in Reglone®.

To prevent accidental poisoning, never put this product into food, drink, or other containers. Use this product strictly in accordance with the directions on this label.

ACTIVE INGREDIENT:
Diquat dibromide [6,7-dihydrodipyrido(1,2-a:2',1'-c)pyrazinium dibromide] ........................................... 37.3%

OTHER INGREDIENTS: .......................................................... 62.7%

TOTAL: ........................................................................ 100.0%

Contains 2 lbs. diquat cation per gallon (3.73 lbs. of diquat dibromide per gallon).

KEEP OUT OF REACH OF CHILDREN
CAUTION / PRECAUCIÓN

See Inside Label Booklet for FIRST AID and PRECAUTIONARY STATEMENTS

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION/PRECAUCIÓN
Harmful if inhaled. Harmful if swallowed. Causes moderate eye irritation. Avoid breathing spray mist. Avoid contact with eyes or clothing.

PERSONAL PROTECTIVE EQUIPMENT (PPE):
Some materials that are chemical-resistant to this product are barrier laminate, butyl rubber ≥ 14 mils, and nitrile rubber ≥ 14 mils. If you want more options, follow the instructions for Category A on an EPA chemical-resistant category selection chart.

Mixers, Loaders, Applicators and other handlers must wear:
• Coveralls over short-sleeved shirt and short pants or coveralls over long-sleeved shirt and long pants
• Chemical-resistant gloves
• Chemical-resistant footwear plus socks
• Protective eyewear
• Chemical-resistant headgear for overhead exposure
• Chemical-resistant apron when cleaning equipment, mixing, or loading
• Face shield when mixing or loading

Exception: After this product has been diluted to 0.50% or less in water (i.e., the labeled rate for some spot applications), applicators for AQUATIC SURFACE APPLICATIONS must, at a minimum, wear (Note – Mixers and Loaders for this application method must still wear the personal protective equipment (PPE) as described in the above section):
• Long-sleeved shirt and long pants
• Shoes plus socks
• Waterproof gloves
• Protective eyewear

Exception: At a minimum, applicators for AQUATIC SUBSURFACE APPLICATIONS must wear (Note – Mixers and Loaders for this application method must still wear the personal protective equipment (PPE) as described in the above section):
• Short-sleeved shirt and short pants
• Waterproof gloves
• Chemical-resistant footwear plus socks

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Control Statements
Mixers and loaders supporting aerial applications are required to use closed systems that provide dermal protection. The closed system must be used in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4)]. When using the closed system, mixers and loaders’ PPE requirements may be reduced or modified as specified in the WPS.

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

FIRST AID

IF IN EYES
• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF SWALLOWED
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.

IF INHALED
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment information.

NOTE TO PHYSICIAN
To be effective, treatment for diquat poisoning must begin IMMEDIATELY. Treatment consists of binding diquat in the gut with suspensions of activated charcoal or bentonite clay, administration of cathartics to enhance elimination, and removal of diquat from the blood by charcoal hemoperfusion or continuous hemodialysis.
ENVIRONMENTAL HAZARDS

This pesticide is toxic to aquatic invertebrates.

For Terrestrial Uses, do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water.

For Aquatic Uses, do not apply directly to water except as specified on this label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

Do not apply this product through any type of irrigation system.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls over short-sleeved shirt and short pants, or coveralls over long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material
- Chemical-resistant footwear plus socks
- Protective eyewear
- Chemical-resistant headgear for overhead exposure

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Keep all unprotected persons out of operating areas or vicinity where there may be drift.

For terrestrial uses, do not enter or allow entry of maintenance workers into treated areas, or allow contact with treated vegetation wet with spray, dew, or rain, without appropriate protective clothing until spray has dried.

For aquatic uses, do not enter treated areas while treatments are in progress.

SPECIFIC USE DIRECTIONS

This product is a herbicide used to control weeds in the following sites:

- preharvest aid to desiccate labeled crops to facilitate harvesting
- labeled nonbearing crops
- noncrop or nonplanted areas on farms

This product works by being absorbed by the weed, and, within a few days, the weed shows signs of dying. Optimum results are seen if the weeds are young, actively growing, and free from stress.

To avoid injury to desired crops, ornamentals or desirable plants, use caution to prevent drift during application and clean all spray equipment thoroughly with water after use. Avoid application to muddy water or disturbing the water during application that reduce weed control. To avoid reduced herbicidal activity, do not use dirty or muddy water in preparing spray solutions of this product. Avoid application under conditions of high wind, water flow, or wave action.

SPRAY DRIFT MANAGEMENT

Avoiding spray drift at the application site is the responsibility of the applicator and the grower. The interaction of many equipment- and weather-related factors determine the potential for spray drift. The applicator and the grower are responsible for considering all these factors when making decisions.

The following drift management requirements must be followed to avoid off-target drift movement from aerial applications to agricultural field crops. These requirements do not apply to forestry applications, public health uses or to applications using dry formulations:

- The distance of the outermost nozzles on the boom must not exceed 3/4 the length of the wingspan or rotor. The nozzles must always point backward parallel with the airstream and never be pointed downward more than 45 degrees.

Where states have more stringent regulations, they must be observed.

DROPLET SIZE: The most effective way to reduce drift potential is to apply large droplets. The best drift management strategy is to apply the largest droplets that provide sufficient coverage and control. Applying larger droplets reduces drift potential, but will not prevent drift if applications are made improperly, or under unfavorable environmental conditions (see Wind, Temperature and Humidity, and Temperature Inversions sections of this label).

CONTROLLING DROPLET SIZE:

- Volume – Use high flow rate nozzles to apply the highest practical spray volume. Nozzles with higher rated flows produce larger droplets.
- Pressure – Do not exceed the nozzle manufacturer’s specified pressures. For many nozzle types, lower pressure produces larger droplets. When higher flow rates are needed, use higher flow rate nozzles instead of increasing pressure.

(continued)
• Number of Nozzles – Use the minimum number of nozzles that provide uniform coverage.
• Nozzle Orientation – Orienting nozzles so that the spray is released parallel to the airstream produces larger droplets than other orientations. Significant deflection from horizontal will reduce droplet size and increase drift potential.
• Nozzle Type – Use a nozzle type that is designed for the intended application. With most nozzle types, narrower spray angles produce larger droplets. Consider using low-drift nozzles. Solid stream nozzles oriented straight back produce the largest droplets and the lowest drift.

BOOM LENGTH: For some use patterns, reducing the effective boom length to less than 3/4 of the wingspan or rotor length that further reduces drift without reducing swath width.

APPLICATION HEIGHT: Applications should be made at a height greater than 10 feet above the top of the largest plants unless a greater height is required for aircraft safety. Making applications at the lowest height that is safe reduces exposure of droplets to evaporation and wind.

SWATH ADJUSTMENT: When applications are made with a crosswind, the swath will be displaced downwind. Therefore, on the up and downwind edges of the field, the applicator must compensate for this displacement by adjusting the path of the aircraft upwind. Increase swath adjustment distance with increasing drift potential (higher wind, smaller droplets, etc.).

WIND: Drift potential is lowest between winds speeds of 2 to 10 mph. However, many factors, including droplet size and equipment type, determine drift potential at any given speed. Avoid applications below 2 mph due to variable wind direction and high inversion potential. NOTE: Local terrain can influence wind patterns. Every applicator must be familiar with local wind patterns and how they affect spray drift.

TEMPERATURE AND HUMIDITY: When making applications in low relative humidity, set up equipment to produce larger droplets to compensate for evaporation. Droplet evaporation is most severe when conditions are both hot and dry.

TEMPERATURE INVERSIONS: Do not make applications during a temperature inversion because drift potential is high. Temperature inversions restrict vertical air mixing, which causes small suspended droplets to remain in a concentrated cloud. This cloud can move in unpredictable directions due to the light variable winds common during inversions. Temperature inversions are characterized by increasing temperatures with altitude and are common on nights with limited cloud cover and light to no wind. They begin to form as the sun sets and often continue into the morning. Their presence can be indicated by ground fog; however, if fog is not present, inversions can also be identified by the movement of smoke from a ground source or an aircraft smoke generator. Smoke that is being lifted and moves laterally in a concentrated cloud (under low wind conditions) indicates an inversion, while smoke that moves upward and rapidly dissipates, indicates good vertical air mixing.

SENSITIVE AREAS: Apply the pesticide when the wind is blowing away from adjacent sensitive areas (e.g., residential areas, bodies of water, known habitat for threatened or endangered species, non-target crops).

AGRICULTURAL USES
Apply this product to desiccate certain crops as a preharvest aid to facilitate harvesting. This product can also be applied as a general herbicide to control weeds in nonbearing crops and noncrop areas.

This product acts on contact with actively growing green plant tissue and for effective control, complete coverage of all green plant tissue is required. Signs of herbical activity are usually apparent within a few days of application. Improper application technique and/or application to large, stressed, or mowed weeds will generally result in unacceptable control. Weeds that emerge after application of this product will not be controlled or suppressed. Weeds that are established or larger than 6" may require retreatment.

NOTE: Cool (below 55°F) or cloudy, overcast weather will slow this product activity but will not affect performance.

USE PRECAUTIONS
• Do NOT allow spray to contact or drift to desirable vegetation or severe plant injury or death will result.
• Do NOT use dirty or muddy water when diluting this product.
• Do NOT apply this product through any type of irrigation system.
• Rain or irrigation occurring within 30 minutes of application negatively impacts herbical activity.
• Be sure to rinse all spray equipment thoroughly with water after control.

APPLICATION INSTRUCTIONS
Apply this product to newly emerged weeds while actively growing and before they become too large (weeds 1 to 6 inches in height are easiest to control). Be sure to follow the specified rates listed in the specific crop instructions below, using the higher rates when weeds are large or dense or when applying for harvest aid and the crop vegetation is dense.

If weeds have been mowed or grazed (removing much of the green foliage) be sure to allow weeds to regrow to a height of 2 to 4 inches before application. For harvest aid applications, refer to the specific crop instructions below for application timing specifications.

NOTE: Because dust can coat target surfaces and reduce product activity, avoid applying to extremely dusty conditions (e.g., dust caused by high winds or the passage of equipment tires).

Spray Equipment
Be sure to follow the specific instructions for minimum spray volumes listed in the crop specific instructions below. Note that the specifications are minimum volumes only, and increase spray volumes as necessary to obtain complete coverage of the target weed or plant (without causing foliage runoff). For best results use flat fan nozzles. Other nozzles provide less than complete coverage resulting in reduced performance.

NOTE: When spraying less than 20 gals. of spray carrier per acre, target weeds must not exceed 6 inches in height.

Adjuvants
When applying this product, be sure to always add one of the following adjuvants:
Nonionic Surfactant (NIS) – Add a NIS containing 75% or greater surface active agent at 0.06 to 0.5% v/v (1/2 to 4 pts. per 100 gals.) of the finished spray volume.
Other Adjuvants – Use adjuvants other than NIS but that meet the following criteria:
• Contains only EPA exempt ingredients.
• Is compatible when mixed with this product (compatibility can be determined using a jar test).
• Is supported locally for use with this product through proven field trials and through university and extension recommendations.
SPECIFIC USE INSTRUCTIONS

ALFALFA (Seed Crop Only) – Apply to alfalfa for preharvest desiccation. Desiccation is typically complete within 3 to 10 days after application.

Use Precautions
- Do NOT graze or feed treated foliage to livestock.
- Do NOT use seed from treated plants for food, feed or oil purposes.
- Minimum preharvest interval is 3 days.

Application Instructions
Apply 1-1/2 to 2 pints of this product per acre as a broadcast spray using a minimum spray volume of 15 gallons/acre for ground or 5 gallons/acre for aerial applications. On thin stands of seed alfalfa, use 1 pint/acre.

CLOVER (Seed Crop Only) – Apply to clover for preharvest desiccation. Desiccation is typically complete within 3 to 10 days after application.

Use Precautions
- Do NOT graze or feed treated foliage to livestock.
- Do NOT use seed from treated plants for food, feed or oil purposes.
- Minimum preharvest interval is 3 days.

Application Instructions
Apply 1-1/2 to 2 pints of this product per acre as a broadcast spray using a minimum spray volume of 15 gallons/acre for ground or 5 gallons/acre for aerial applications.

POTATO – Apply to potato for preharvest desiccation.

Use Precautions
- Do NOT apply to potatoes that are drought stressed.
- Do NOT apply more than 4 pints of this product per acre.
- Minimum preharvest interval is 7 days.

Application Instructions
Apply 1 to 2 pints of this product per acre as a broadcast spray using a minimum spray volume of 20 gallons/acre for ground or 5 gallons/acre for aerial applications. Where vine growth is dense, make a second application. Obtain improved coverage of the vines by making the second application five days after the first one.

GRAIN SORGHUM (Seed Crop Only) – Apply to grain sorghum for preharvest desiccation.

Use Precautions
- Do NOT graze or feed treated foliage to livestock.
- Do NOT use seed from treated plants for food, feed or oil purposes.

Application Instructions
Apply 1-1/2 to 2 pints of this product per acre as a broadcast spray using a minimum spray volume of 15 gallons/acre for ground or 5 gallons/acre for aerial applications.

SOYBEAN (Seed Crop Only) – Apply to soybean for preharvest desiccation.

Use Precautions
- Do NOT graze or feed treated foliage to livestock.
- Do NOT use seed from treated plants for food, feed or oil purposes.

Application Instructions
Apply 1-1/2 to 2 pints of this product per acre one week before harvest as a broadcast spray using a minimum spray volume of 15 gallons/acre for ground or 5 gallons/acre for aerial applications.

TREE, VINE, SMALL FRUIT AND VEGETABLE CROPS (Nonbearing) – Apply to the following crops for site preparation prior to planting and for vegetation control up to one year of harvest.

Use Precautions
- Do NOT apply within one year prior to harvest.
- Do NOT graze treated areas.
- Do NOT allow spray to come into contact with green stems, foliage or fruit.
- When spraying around young trees or vines, use a shield or wrap the plant(s) to prevent injury.

Application Instructions
Apply 1-1/2 to 2 pints of this product per acre as a directed spray using a minimum spray volume of 15 gallons/acre. For complete control of grasses and/or older established weeds, retreat as necessary.
NONCROP OR NONPLANTED AREAS ON FARMS – Apply to the following areas for vegetation control.

Barrier Strips  Equipment Areas  Fence Lines
Farnyards  Farm Buildings  Fuel Storage Areas
Dry (non-flooded) areas around ponds, lakes, and drainage ditches

Use Precautions
• Do NOT allow spray to contact the foliage of food crops, ornamental plants or other desirable vegetation as injury or death will result.
• Be sure to add a surfactant as indicated in the application instructions below.

Application Instructions
NOTE: Established weeds require retreatment for control.

For Broadcast Applications: Apply 1 to 2 pints of this product per acre as a broadcast spray using a minimum spray volume of 15 gallons/acre. Be sure to achieve full coverage and thorough weed contact.

For Spot Treatments: Apply 1 to 2 quarts of this product with the labeled rate of a 75% or greater nonionic surfactant per 100 gallons of water (0.75 ounce or 22 ml with the labeled rate of a 75% or greater nonionic surfactant per 1 gallon of water).

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.
PESTICIDE STORAGE: Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers. Do not contaminate feed, foodsstuffs, or drinking water. Do not store or transport near feed or food. Store at temperatures above 32°F.
PESTICIDE DISPOSAL: Open dumping is prohibited. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. Clean container promptly after emptying. Triple-rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.
CONTAINER IS NOT SAFE FOR FOOD, FEED, OR DRINKING WATER!

WARRANTY DISCLAIMER
The directions for use of this product must be followed carefully. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, (1) THE GOODS DELIVERED TO YOU ARE FURNISHED "AS IS" BY MANUFACTURER OR SELLER AND (2) MANUFACTURER AND SELLER MAKE NO WARRANTIES, GUARANTEES, OR REPRESENTATIONS OF ANY KIND TO BUYER OR USER, EITHER EXPRESS OR IMPLIED, OR BY USAGE OF TRADE, STATUTORY OR OTHERWISE, WITH REGARD TO THE PRODUCT SOLD, INCLUDING, BUT NOT LIMITED TO MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, USE, OR ELIGIBILITY OF THE PRODUCT FOR ANY PARTICULAR TRADE USAGE. UNINTENDED CONSEQUENCES, INCLUDING BUT NOT LIMITED TO INEFFECTIVENESS, MAY RESULT BECAUSE OF SUCH FACTORS AS THE PRESENCE OR ABSENCE OF OTHER MATERIALS USED IN COMBINATION WITH THE GOODS, OR THE MANNER OF USE OR APPLICATION, INCLUDING WEATHER, ALL OF WHICH ARE BEYOND THE CONTROL OF MANUFACTURER OR SELLER AND ASSUMED BY BUYER OR USER. THIS WRITING CONTAINS ALL OF THE REPRESENTATIONS AND AGREEMENTS BETWEEN BUYER, MANUFACTURER AND SELLER, AND NO PERSON OR AGENT OF MANUFACTURER OR SELLER HAS ANY AUTHORITY TO MAKE ANY REPRESENTATION OR WARRANTY OR AGREEMENT RELATING IN ANY WAY TO THESE GOODS.

LIMITATION OF LIABILITY
TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO EVENT SHALL MANUFACTURER OR SELLER BE LIABLE FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, OR FOR DAMAGES IN THEIR NATURE OF PENALTIES RELATING TO THE GOODS SOLD, INCLUDING USE, APPLICATION, HANDLING, AND DISPOSAL, TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, MANUFACTURER OR SELLER SHALL NOT BE LIABLE TO BUYER OR USER BY WAY OF INDEMNIFICATION TO BUYER OR TO CUSTOMERS OF BUYER, IF ANY, OR FOR ANY DAMAGES OR SUMS OF MONEY, CLAIMS OR DEMANDS WHATSOEVER, RESULTING FROM OR BY REASON OF, OR RISING OUT OF THE MISUSE, OR FAILURE TO FOLLOW Labels WARNINGS OR INSTRUCTIONS FOR USE, OF THE GOODS SOLD BY MANUFACTURER OR SELLER TO BUYER, ALL SUCH RISKS SHALL BE ASSUMED BY THE BUYER, USER, OR ITS CUSTOMERS. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER'S OR USER'S EXCLUSIVE REMEDY, AND MANUFACTURER'S OR SELLER'S TOTAL LIABILITY SHALL BE FOR DAMAGES NOT EXCEEDING THE COST OF THE PRODUCT.

If you do not agree with or do not accept any of the directions for use, the warranty disclaimers, or limitations on liability, do not use the product, and return it unopened to the Seller, and the purchase price will be refunded.
