POWER POWDER PRO

STEP 3

SHOCK

DRY CHLORINATING GRANULES FOR SWIMMING POOLS

Bactericide • Algaecide • Low Residue • Fast Dissolving

KEEP OUT OF REACH OF CHILDREN

DANGER

Do not mix with any other chemicals, including any other pool chemicals of any kind. Mixing with other chemicals could cause a fire or explosion. Always add product to large quantities of water to fully dissolve product. Do not pour water into product, always add product to water. See additional precautionary statements on back label.

FIRST AID

CONTACT 1-412-434-6315 or your poison control center for 24-hour emergency medical treatment information. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

ACTIVE INGREDIENT:
Calcium Hypochlorite ...................... 73%

OTHER INGREDIENTS: .................. 27%

Total ......................................... 100%

Minimum 70% Available Chlorine

EPA Reg. No. 748-296
EPA Est. No. 748-WV-1
NET WT. 50 lbs. (22.68 kg)
LPM 14-181
OXIDIZER

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly Corrosive. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or going to the toilet. Remove and wash contaminated clothing and shoes before reuse. May be fatal if swallowed. Irritating to nose and throat. Avoid breathing dust.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, Streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without prior approval from the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Mix only with water. Do not mix this product with any other chemicals, including any other pool chemicals of any kind, such as other disinfectant or "shock" products. Always add product to large quantities of water to dissolve product. Do not pour water into product. Use only a clean, dry utensil made of metal or plastic each time product is poured into the water. Do not add this product to any dispensing device containing remnants of any other product or pool chemical. Such use may cause violent reaction leading to fire or explosion. Do not use this product with any other chemicals, including, but not limited to cleaning chemicals, and other pool chemicals, petroleum or paint products or other easily combustible materials may start a chemical reaction with generation of heat, liberation of hazardous gases and possible violent reaction leading to fire or explosion. If product becomes contaminated or decomposes do not reseal container. If possible isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary, to fully dissolve product.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SWIMMING POOL:

This calcium hypochlorite product is a dry granular, free-flowing material that contains a minimum of 70% available chlorine. It provides a rapid source of a chlorine-containing disinfectant that protects the pool against the growth of bacteria and algae to help keep the pool in a sanitary condition.

USE DIRECTIONS:

For any application method you choose: No one can be in the pool when chemicals are being added directly to the pool. Do not mix this product with other chemicals, including any other pool chemicals of any kind, such as other disinfectant or "shock" products. Mixing could cause a fire or explosion. Add this product into large quantities of water to fully dissolve. Never add water into product. Make sure to keep the pump and filter running during application and for at least 6 to 8 hours after application to allow for best product dispersion. For best results, test your pool water prior to addition of this product and maintain pool water parameters in the ranges noted below.

Table 1. Parameters for Water in Pools

<table>
<thead>
<tr>

Proper Water Balance and Use of Stabilizer:

Maintaining the proper pH, total alkalinity, and water hardness is necessary to obtain proper water balance, and help avoid problems such as cloudy water, scaling, corrosion and swimmer discomfort. Stabilizer (cyanuric acid) slows down the rate at which chlorine is destroyed by sunlight. Follow carefully the directions given with the product when using a stabilizer. Kits for testing free pH, total alkalinity, water hardness, and cyanuric acid concentration are an integral part of a proper program for controlling the quality of your pool water.

HOW TO DETERMINE THE CAPACITY OF YOUR POOL:

First: Approximate the average depth in feet by adding the depth to the deep end at the shallow end and divide the total by two.

Second: In rectangular or square pools: Multiply length (l) x width (w) x average depth (d) x 7.5 = capacity of gallons. For circular pools: Multiply diameter (d) x diameter (d) x average depth (d) x 5.9 = capacity of pool in gallons. For oval pools: Multiply long axis (l) x short axis (w) x average depth (d) x 5.9 = capacity of pool in gallons.

NOTE: If pool has sloping sides, multiply total gallons calculated by 0.85 to arrive at the capacity of your pool.

End of Season: At the end of the swimming pool season, or when the water is to be drained from the pool, chlorine must be allowed to dissipate from treated pool water before discharge. Do not chlorinate the pool within 24 hours prior to discharge.

HANDY REFERENCE GUIDE FOR SOLUTIONS:

1. lb. (16 oz.) of this product in 100 gallons of water is 1 ppm available chlorine. 1.25 lbs. (20 oz.) of this product in 100 gallons of water is 1,000 ppm available chlorine. 6.25 lbs. (100 oz.) of this product in 50 gallons of water is 1% available chlorine. (1 oz. of this product equals approximately 2 level tablespoons.)

OTHER USES: Calcium Hypochlorite is also used in the sanitation of water systems, municipal water mains, sewage and industrial waste treatment, pulp bleaching, sanitation in the food industry, restaurants, dietary, and hospitals, odor and taste control in potable water systems, algae control in industrial cooling water systems, and general industrial sanitizations. For specific literature on these and other accepted uses, write to the address on the front label.

For a complete copy of the master label for this product, contact Leslie’s or review the most current EPA stamped-accepted label available at www.epa.gov/pesticides/pestregist.
Children can fall into bucket and drown.
Keep children away from bucket with even a small amount of water.

Niños pueden caer adentro de el balde y ahogarse.
Retire los niños de el balde aunque solamente tenga un poco de agua.
