(If you do not understand the label, find someone to explain it to you in detail.)

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lens, if present, after first five minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container with you when calling a poison control center or doctor or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CORROSIVE: Causes irreversible eye damage. Wear protective eyewear (goggles, face shield, or safety glasses). Do not get in eyes, or on clothing. Harmful if swallowed. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT:
Applicators and other handlers must wear long-sleeved shirt and long pants and shoes plus socks, chemical resistant gloves made of any waterproof material and protective eyewear. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Do not store near food or feed products. Store out of the weather.

USER SAFETY RECOMMENDATIONS:
Users should: Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS
Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water used by wildlife and aquatic life or for domestic and irrigation purposes. Do not apply where runoff is likely to occur.
The active ingredient, hexazinone, in this product is known to leach through soil into ground water under certain conditions as a result of agricultural use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

GENERAL INFORMATION
Pro-Serve’s PRONONE POWER PELLET HERBICIDE is a pellet of Hexazinone to be used for brush control in reforestation areas, rangeland, pastures, and noncropland areas.
PRONONE POWER PELLET is an effective general herbicide providing residual control of many woody plants. It is absorbed through the roots.
Moisture is required to activate PRONONE POWER PELLET in the soil. Best results are obtained when the soil is moist at time of application and 1/4 to 1/2 inch of rainfall occurs within 2 weeks after application.
Wddy plants usually respond within 3 to 6 weeks after sufficient rainfall has dissolved the pellet and carried the herbicide into the root zone where it is absorbed during periods of active plant growth. Defoliation and subsequent defoliation may occur, but susceptible plants are killed. The response to the treatment will vary with the amount applied, soil type, rainfall, timing and uniformity of application and other conditions.
DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Pro-Serve, Inc. will not be responsible for losses or damages resulting from the use of this product in any manner not specifically recommended by Pro-Serve, Inc. User assumes all risk associated with such nonrecommended use.

The correct use rates by crop and geographical area, specified on the label, and proper loading site considerations and application procedures must be followed to minimize potential for hexazinone movement into ground water. Consult with your state pesticide lead agency for information regarding soil permeability, aquifer vulnerability, and best management practices for your area.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard - 40 CFR part 170. This product contains hexazinone, a member of the family of agricultural workers on farms, forests, nurseries, and greenhouses, and of handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil or water is coveralls, chemical resistant gloves made of any waterproof material, shoes plus socks and protective eyewear.

USE PRECAUTIONS

Injury to or loss of desirable trees or other plants may result from failure to observe the following: Do not apply, drain or flush equipment on or near desirable trees or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. To prevent injury or loss of desirable trees or bushes, measure the distance from the base (trunk) to the dripline of the desirable plant. Multiply this distance by three and do not apply Power Pellets within this distance. DO NOT use on lawns, walkways, driveways, tennis courts or similar areas. Do not contact with desirable plants. Keep contact with fertilizers, insecticides, fungicides and seeds.

APPLICATION: Apply PRONONE POWER PELLET HERBICIDE by hand to the soil around specific plants or in a grid pattern for area control.

Make application just before or during the period of active growth of brush species to be controlled. For effective brush control and prevention of damage to desirable vegetation do not apply to brush standing in water.

Rangeland, Pasture:

TREE AND BRUSH CONTROL

SINGLE STEMMED PLANTS: For single stem plants, apply 1-2 pellets for every inch of stem diameter. When more than one pellet is needed, distribute the pellet uniformly around the stem out approximately half way between the stem and the canopy edge.

MULTI-STEMMED PLANTS: For multi-stemmed plants such as mesquite, huisache and miltiora Rose that are 2 to 3 ft tall, apply 1-2 pellets at the base of the plant. For plants 3 ft to 6 ft tall, apply 2-4 pellets at the base of the plant. For Red Berry Cedar (Juniper), apply 1-2 pellets for every 3 ft of plant height or every 3 ft of canopy diameter, whichever is greater. Apply the pellets uniformly around the plant approximately halfway between the plant’s stem and the canopy edge.

FENCE LINE TREE AND BRUSH CONTROL: For the control of trees and brush in Pasture and Rangeland fences, apply 1 pellet in the fence line for every 3 ft of fence length. For heavy infestations, double the rate to 1 pellet for every 1½ ft of fence length.

SMUTGRASS CONTROL

Apply 0.5 - 1 pellet per individual clump or plant. Apply by hand to the center (root) of the plant. Do not exceed 600 Power Pellets per acre per season. Power Pellets are not recommended for smutgrass control in pastures or rangeland where plant density exceeds 25% coverage. Application of Power Pellets in smutgrass infestations exceeding 25% can damage and/or kill surrounding desirable grasses and forage.

NOTE: Do not apply more than 600 pellets per acre per season. Late winter to early summer application is recommended for best results. Do not mow or cut treated brush or trees until 12 months after application. When treating regrowth from cut-off trees and brush, the regrowth must be at least one year old and the rate of application based upon the original plant size. Do not use on marshy or poorly drained sites or on soils classified as clays. For these use sites, there is no restriction on grazing by domestic animals or on cutting forage for hay.

FORESTRY:

PRONONE POWER PELLET HERBICIDE is recommended for use in forest site preparation, preharvest control of hardwoods and for residents in pine-hardwood stands for growth enhancement of loblolly, slash, shortleaf and longleaf pine. The treatment provides control of many woody plants such as black cherry, black gum*, dogwood*, elm, hornbeam, hickory*, oaks, red maple*, sweetgum and sumac*.

*Considered hard to kill.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store product in original container only, away from other pesticides, fertilizer, food or feed. Keep product dry.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

NOTICE OF WARRANTY

Pro-Serve warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. It is impossible to eliminate all risk inherently associated with use of this product. When used properly, this product will provide the intended results. Should this product not provide the intended results, consult Pro-Serve, Inc. for possible causes.

NOTICE TO BUYER

Purchase of this material does not confer any rights under patents of countries outside of the United States.
