SUPPLEMENTAL LABEL FOR CRUISER® 5FS Insecticide

EPA Reg. No. 100-941

SUPPLEMENTAL LABEL FOR DIRECTIONS FOR USE ON RICE (DRY-SEEDED ONLY) AND SUGARBEETS

Active Ingredient:
Thiamethoxam (CAS No. 153719-23-4) .................................................. 47.6%
Other Ingredients: .............................................................................. 52.4%
Total: ......................................................................................... 100.0%

Cruiser 5FS contains 5 pounds thiamethoxam per gallon.

KEEP OUT OF REACH OF CHILDREN.

CAUTION

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This supplemental label expires on March 22, 2011, and must not be used or distributed after that date.

Before using Cruiser 5FS as permitted according to this supplemental label, read and follow all applicable directions, restrictions, and precautions on the label on or attached to the pesticide product container. This Supplemental Labeling contains revised use instructions and or restrictions that may be different from those that appear on the container label. This Supplemental Labeling must be in the possession of the user at the time of pesticide application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CROP USE DIRECTIONS

RICE (dry-seeded use only)
To provide early season protection of seedlings against injury by grape colaspis rice water weevil, chinchbugs, and thrips, apply Cruiser 5FS at a rate to achieve 0.03 milligrams thiamethoxam per seed* (each fluid ounce of Cruiser 5FS contains 17.7 grams thiamethoxam).

Cruiser 5FS is not labeled for use in water seeded rice production.
Do not plant or sow Cruiser 5FS treated rice seed by aerial application equipment.
Do not use treated fields for the aquaculture of edible fish and crustacean.

*Not to exceed 120 lb. seed/Acre Seeding Rate.

SUGARBEETS
Cruiser 5FS is a seed treatment insecticide that provides early season protection against injury from sugarbeet root maggot, leaf miners, wireworms, root aphids, white grubs, spring tails, and beet leaf hopper. Cruiser 5FS protects sugarbeets from beet leaf hoppers which may spread curly top virus. Thorough seed coverage will offer the best protection of the seed from insect damage.

Apply Cruiser 5FS at 3.39 to 3.95 fl. oz. (equivalent to 60 to 70 grams a.i. of thiamethoxam respectively) per unit of sugarbeet seed. A unit of sugarbeet seed is 100,000 seeds.

For protection against Pythium damping-off or Rhizoctonia species seed and seedling diseases in sugarbeets, Cruiser 5FS may be applied with Apron XL® and Maxim 4 FS and fungicide seed treatments.

Cruiser 5FS may be applied in conjunction with polymers, pelleting materials and seed coating materials that are approved as food-use inert ingredients by EPA and listed in 40 CFR 180.910-960. These materials must show safety on treated seed. The end product that combines Cruiser 5FS with labeled fungicides must be tested for seed safety without any detrimental effects on seed germination or plant stand establishment. Pre-test the germination of a small sample of seed lot with Cruiser 5FS prior to large scale commercial application.
