For control of certain diseases in almonds, berries, carrot, celery, cereals, citrus (non-bearing), corn, cranberry, filbert, mint, onions and bulb vegetables, peanut, pecan, pineapple, rice (including wild rice), sorghum, stone fruits, sugarcane, tree nuts, turfgrass grown for seed, turfgrass and ornamentals. (Not for Turf and Ornamental use in California)

ACTIVE INGREDIENT:
propiconazole: \([-\{2-(2,4\text{-dichlorophenyl})-4\text{-propyl}\}-1, 3\text{-dioxolan-2-yl}\}]\text{-methyl\}-1H-1,2,4\text{-triazole} \quad 41.8\%
OTHER INGREDIENTS: \quad 58.2\%

TOTAL \quad 100.0\%

Contains petroleum distillates.
Contains 3.6 pounds active ingredient per gallon.

KEEP OUT OF REACH OF CHILDREN

WARNING—AVISO

Si usted no entiende la etiqueta, busque a alguien para que se le explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

EPA REG. NO. 34704-1031
EPA EST. NO. 34704-MS-002
NET CONTENTS 2.5 GAL (9.46 L)
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING
Causes substantial but temporary eye injury. Harmful if swallowed. Do not get in eyes or on clothing.

Personal Protective Equipment (PPE):
Some materials that are chemical resistant to this product are listed below. If you want more options, follow the instructions for Category G on the EPA chemical resistance category selection chart.
Applicators and all other handlers must wear:
• Long-sleeved shirt and long pants,
• Chemical-resistant gloves, such as barrier laminate or viton,
• Shoes plus socks, and
• Protective eyewear.
Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Controls
When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 190.240(d)(4)(I)), the handler PPE requirements may be reduced or modified as specified in the WPS.

FIRST AID
If in eyes:
• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If swallowed:
• Immediately call a poison control center or doctor.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give any liquid to the person.
• Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.
FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL: 1-866-944-9565.
Note to Physician: Contains petroleum distillate — vomiting may cause aspiration pneumonia.

USER SAFETY RECOMMENDATIONS
Users should:
• Wash hands thoroughly with soap and water and before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove and wash contaminated clothing before reuse.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and shrimp. Do not apply directly to water, or to areas where surface water is present, or to inter-tidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwater or rinsate.

PHYSICAL OR CHEMICAL HAZARDS
Do not use, pour, spill or store near heat or open flame.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

RESTRICTIONS
Rotational Crops
To avoid possible illegal residues, do not plant any other crop intended for food, grazing, or any component of animal feed or bedding within 105 days of an application of Fitness® Fungicide to the preceding crop unless the second crop appears on this label. Alfalfa can be planted 75 days after the last application of Fitness Fungicide if the total application of propiconazole has not exceeded 0.22 pound active ingredient per acre during the previous year.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.
Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours. Exception: If the product is soil-injected or soil-incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact.
Product Information

Fitness Fungicide is a broad-spectrum fungicide for the control of certain diseases in almonds, berries, carrots, celery, cereals (wheat, barley, rye, oats, and rice), citrus (non-bearing), corn, cranberries, filberts, mint, onions and other bulb vegetables, sorghum, stone fruit (apricots, nectarines, peaches, plums, and prunes), peanuts, pecans, pineapple, sugarcane, tree nuts, turf grown for seed, and turfgrass and ornamentals.

Important: Do not use in greenhouses or as a tree injection. Failure to follow directions and precautions on this label may result in crop injury, poor disease control, or illegal residues.

Integrated Pest Management

Fitness Fungicide should be integrated into an overall disease and pest management (IPM) strategy whenever the use of a fungicide is required. Cultural practices known to reduce disease development should be followed. Consult your local agricultural authorities for additional IPM strategies established for your area. Fitness Fungicide may be used in state agricultural extension advisory (disease forecasting) programs using the recommend application timing based upon environmental factors favorable for disease development.

Fungicide Resistance Management

Fitness Fungicide belongs to the sterol demethylation inhibitor (DMI) class of fungicides and is classified as Group 3 Fungicide. Since certain fungi can develop resistance to this class of products, the use of Fitness Fungicide should be part of a resistance management strategy that includes alternation and/or tank mixing with another fungicide mode of action. Because resistance development cannot be predicted, use of this product should conform to resistance management strategies established for the crop and use area. Rotate to a product that is effective on the target pathogen and has a mode of action different from Fitness Fungicide. Apply the alternate products within the intervals specified on the label for Fitness Fungicide. Do not apply Fitness Fungicide at rates below those specified on the label. If tank mixing, use the full label rate of Fitness Fungicide with the full label rates of other products effective on the target pest. Consult your local or state agricultural authorities for resistance management strategies that are appropriate for your disease management program. Fitness Fungicide should not be alternated or tank mixed with any fungicide to which resistance has already developed.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard (WPS) for Agricultural Pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Entry Restrictions for Non-WPS Uses: Do not enter into treated until sprays have dried.

MIXING INSTRUCTIONS

Prepare no more spray mixture than is required for the immediate operation. Thoroughly clean spray equipment before using this product. Agitate the spray solution before and during application. Rinse spray tank thoroughly with clean water after each day’s use and dispose of pesticide rinseate by application to an already treated area.

Fitness Fungicide - Alone: Add 0.5 to 0.6 of the required amount of water to the spray or mixing tank. With the agitator running, add Fitness Fungicide to the tank. Continue agitation while adding the remainder of the water. Begin application of the spray solution after Fitness Fungicide has completely dispersed into the mix water. Maintain agitation until all of the mixture has been sprayed.

Fitness Fungicide - Tank Mixes: Fitness Fungicide is usually compatible with all tank mix partners listed on this label. To determine the physical compatibility of Fitness Fungicide with other products, use a jar test. Using a quart jar, add the proportionate amounts of the products to 1.0 quart of water. Add wettable powders and
Aerial Application:
Fitness Fungicide in a minimum of 10.0 gallons of water per acre unless otherwise specified. For all other crops, apply Fitness Fungicide in a minimum of 2.0 gallons of water per acre unless otherwise specified. Chemigation with excessive water rates, dilution ratios, precautions, and limitations required by the label of the tank mix product. No label dosage rate should be exceeded and the most restrictive label precautions and limitations must be followed. Do not tank mix this product with any product that prohibits such mixing. Tank mixes or other applications of products referenced on this label are permitted only in those states in which the referenced products are registered.

Application Instructions
Fitness Fungicide is most effective when applied and allowed to dry before a rainfall. Avoid applying Fitness Fungicide under conditions when uniform coverage cannot be obtained or when excessive spray drift may occur. Do not apply in a manner which results in exposure to humans or animals.

Ground Application: For tree crops, apply Fitness Fungicide in a minimum of 50.0 gallons of water per acre unless otherwise specified. For all other crops, apply Fitness Fungicide in a minimum of 10.0 gallons of water per acre unless otherwise specified. For tree crops, apply Fitness Fungicide in a minimum of 10.0 gallons of water per acre unless otherwise specified. For all other crops, apply Fitness Fungicide in a minimum of 2.0 gallons of water per acre unless otherwise specified.

Aerial Application: For tree crops, apply Fitness Fungicide in a minimum of 10.0 gallons of water per acre unless otherwise specified. For all other crops, apply Fitness Fungicide in a minimum of 2.0 gallons of water per acre unless otherwise specified.

Chemigation Application: For tree crops, apply Fitness Fungicide in a minimum of 10.0 gallons of water per acre unless otherwise specified. For all other crops, apply Fitness Fungicide in a minimum of 2.0 gallons of water per acre unless otherwise specified. Chemigation application to labeled crops, apply in 0.1 to 0.25 inches of water unless otherwise specified. Chemigation with excessive water may lead to a decrease in efficacy.

Spray Drift Management
A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, relative humidity) and method of application can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

- Wind Speed: Do not apply at wind speeds greater than 15 mph.
- Droplet Size: Apply as a medium or coarser spray (ASAE Standard 572).
- Temperature Inversions: If applying at wind speeds less than 3 mph, the applicator must determine if a) conditions of temperature inversion exist, or b) stable atmospheric conditions exist at or below nozzle height. Do not make applications into areas of temperature inversions or stable atmospheric conditions.

- Other State and Local Requirements: Applicators must follow all state and local pesticide drift requirements regarding application of propiconazole. Where states have more stringent regulations, they must be observed.
- Equipment: All application equipment must be properly maintained and calibrated using appropriate carriers or surrogates.
- Aerial application:
  - The boom length must not exceed 75% of the wingspan or 90% of the rotor blade diameter.
  - Release spray at the lowest height consistent with efficacy and flight safety. Do not release spray at a height greater than 10 feet above the crop canopy unless a greater height is required for aircraft safety.
  - When applications are made with a crosswind, the swath must be displaced downward. The applicator must compensate for this displacement at the up and downwind edge of the application area by adjusting the path of the aircraft upwind.

Ground boom application:
Do not apply with a nozzle height greater than 4 feet above the crop canopy.

Spray Equipment
Thorough coverage is necessary to provide good disease control. Avoid spray overlap as crop injury may occur. Air assisted or air blast sprayers move spray droplets into the canopy using a forced air stream. Set up the fan to deliver only enough air volume to penetrate the canopy and provide good coverage. Adjust deflectors or other aiming devices to direct spray only to the target area. Equip sprayers with nozzles that provide accurate and uniform application. Be certain that nozzles are the same size and uniformly spaced across the boom. Calibrate the sprayer before use. Use a pump with sufficient capacity to maintain 35 to 40 psi at nozzles and provide sufficient agitation in tank to keep mixture in suspension (this requires recirculation of 10% of tank volume per minute). Use a jet agitator or liquid sparger tube for agitation. Do not use air sparging. Although Fitness Fungicide is an emulsifiable concentrate, it is suggested that screens be used to protect the pump and to prevent nozzles from clogging. Screens placed on suction side of pump should be 16-mesh or coarser. Do not place a screen in the recirculation line. Use 50-mesh or coarser screens between the pump and boom and, where required, at the nozzles. Check nozzle manufacturer’s recommendations.

For more information on spray equipment and calibration, consult sprayer manufacturers and state recommendations. For specific local directions and spray schedules, consult the current state agricultural experiment station recommendations.
CHEMIGATION INSTRUCTIONS

Precautions:
• Apply this product only through center pivot, solid set, hand move, or moving wheel irrigation systems. Do not apply this product through any other type of irrigation system.
• Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from non-uniform distribution of treated water.
• If you have questions about calibration, contact State Extension Service specialists, equipment manufacturers, or other experts.
• Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label-prescribed safety devices for public water systems are in place.
• A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.
• Public water system means a system for the provision to the public of piped water for human consumption if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year.
• Chemigation systems connected to public water systems must contain a functional, reduced-pressure zone (RPZ), backflow preventer or the functional equivalent in the water supply line upstream from the point of pesticide introduction. As an option to the RPZ, the water from the public water system should be discharged into a reservoir tank prior to pesticide introduction. There shall be a complete physical break (air gap) between the flow outlet end of the fill pipe and the top or overflow rim of the reservoir tank of at least twice the inside diameter of the fill pipe.

Note: Do not inject Fitness Fungicide at full strength or deterioration of valves and seals may occur. Use a dilution ratio of at least 10 parts water to 1 part Fitness Fungicide. Fitness Fungicide is corrosive to many seal materials. Leather seals are best. EPDM or silicone rubber seals can be used but should be replaced once a year. Do not use Viton, Buna-N, Neoprene, or PVC seals.

Specific Equipment Requirements
• The system must contain a functional check-valve, vacuum relief valve, and low-pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.
• The pesticide injection pipeline must contain a functional, automatic, quick-closing check-valve to prevent the flow of fluid back toward the injection pump.
• The pesticide injection pipeline, must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.
• The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.
• The irrigation line or water pump must include a functional pressure switch that will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
• Systems must use a metering pump, such as a positive displacement injection pump (p.e., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

• Do not apply when wind speed favors drift beyond the area intended for treatment.
• Do not apply after treatment is completed. Continue to operate the system until the solution of Fitness Fungicide has cleared the sprinkler head.

Solid-Set, Hand Move, and Moving Wheel Irrigation Equipment
• Determine the acreage covered by the sprinkler.
• Fill the injector solution tank with water and adjust flow rate to use the contents over a 20- to 30-minute interval. When applying Fitness Fungicide through irrigation equipment, use the lowest obtainable water volume while maintaining uniform distribution.
• Determine the amount of Fitness Fungicide required to treat the area covered by the irrigation system.
• Add the required amount of Fitness Fungicide and sufficient water to meet the injection time requirements of the solution tank.
• Make sure the system is fully charged with water before starting injection of Fitness Fungicide. Time the injection to last at least as long as it takes to bring the system to full pressure.
• Maintain constant solution tank agitation during the injection period.
• Stop injection equipment after treatment is completed. Continue to operate the system until the solution of Fitness Fungicide has cleared the sprinkler head.

CROP SPECIFIC INSTRUCTIONS

ALMONDS
Restrictions
• Do not apply more than 32.0 fluid ounces per acre per season of Fitness Fungicide.
• Do not apply more than 0.90 pound active ingredient propiconazole containing product per acre per season.
• Do not graze livestock in treated areas or cut treated cover crop for feed.
• Preharvest Interval (PHI) is 60 days.

Apply Fitness Fungicide by ground or aerial equipment (a minimum of 15.0 gallons of water per acre). Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

### Target Disease Application Application Timing and Remarks

<table>
<thead>
<tr>
<th>Rate</th>
<th>Application Rate (Ft Oz/A)</th>
</tr>
</thead>
</table>
| Brown rot blossom blight  
(Monilinia laxa, M. fructicola) | 4.0 to 6.0  
Apply Fitness Fungicide at 5 to 10% bloom and 55 to 100% bloom. Under severe disease conditions, use the highest rate. Minimum retreatment interval is 7 days. |
| Anthracnose  
(Colletotrichum acutatum) | 8.0  
Apply Fitness Fungicide beginning at bud break on a 7-to-14-day interval. |

### BERRIES

Bushberries (Bingleberry, Blackberry, Blueberry, Boysenberry, Currants, Dewberry, Elderberry, Gooseberry, Huckleberry), Cranberries (Loganberry, Lowberry, Marionberry, Ollieberry, Red and Black Raspberry, Youngberry), Juneberry, Lingonberry, Salal and cultivars and/or hybrids of these.

Restrictions
- Do not apply more than 30.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.84 pound active ingredient propiconazole containing product per acre per season.
- Preharvest Interval (PHI) is 30 days.

Apply Fitness Fungicide by ground (a minimum of 15.0 gallons per acre) or aerial equipment (a minimum of 5.0 gallons per acre). Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

### Target Disease Application Application Timing and Remarks

<table>
<thead>
<tr>
<th>Rate</th>
<th>Application Rate (Ft Oz/A)</th>
</tr>
</thead>
</table>
| Mummyberry disease  
(Monilinia vacciniorum) | 6.0  
Make first application of Fitness Fungicide beginning at green tip and repeat in 7 to 10 days. If conditions are favorable for disease development, additional applications may need to be made at pink bud and repeating every 7 to 10 days through petal fall. |
| Leaf spot and Stem canker  
(Septoria albipunctata)  
(Russula vaccinacena) | 6.0  
Apply when conditions favor disease development. Repeat applications on a 4-week spray interval. |
| Leaf and Cane spot  
(Septoria rubi) | 6.0  
Apply as a delayed dormant spray after training in the spring. Repeat this application in the late spring, again at bud break, and again once flowering has begun. |

### CARROTS

Restrictions
- Do not apply more than 16.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.45 pound active ingredient propiconazole containing product per acre per season.
- Preharvest Interval (PHI) is 14 days.

Apply Fitness Fungicide by ground (a minimum of 15.0 gallons per acre) or aerial equipment (a minimum of 5.0 gallons per acre). Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

### Target Disease Application Application Timing and Remarks

<table>
<thead>
<tr>
<th>Rate</th>
<th>Application Rate (Ft Oz/A)</th>
</tr>
</thead>
</table>
| Leaf blights  
(Cercospora carotae)  
(suppression of Alternaria dauci) | 4.0  
Apply 4.0 oz of Fitness Fungicide when conditions favor disease suppression of Alternaria development. Continue applications on a 7- to 10-day interval, using the shorter interval when disease conditions are severe. If desired, a spreader-sticker may be used. |
| Leaf spot  
(Septoria spp.) | 6.0  
Apply first application any time prior to bloom and again after petal fall. If needed, repeat application just after harvest. |
| Leaf blights  
(Fusion Fungicide plus chlorothalonil)  
(Chlorothalonil Fungicide) | 2.0  
Apply 2.0 oz of Fitness Fungicide with 0.75 lb AI of chlorothalonil/A (1.0 pt Initiator® 720 Flowable Fungicide). Begin applications when conditions favor disease development. Continue applications on a 7- to 10-day interval. |

### CELERY

Restrictions
- Do not apply more than 16.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.45 pound active ingredient propiconazole containing product per acre per season.
- Preharvest Interval (PHI) is 14 days.

Apply Fitness Fungicide by ground (a minimum of 10.0 gallons per acre) or aerial equipment (a minimum of 5.0 gallons per acre). Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.
Celery cont’d:

Target Disease | Application | Application Timing and Remarks
---|---|---
Early blight | 4.0 | Apply on a 7-day schedule. If desired, a spreader-sticker may be used.
Late blight | | 

CEREALS

Barley, Buckwheat, Corn (see specific directions elsewhere on this label), Pearl Millet, Proso Millet, Oats, Rye, Rice (see specific directions elsewhere on this label), Teosinte, Triticale, Wheat, Wild Rice (see specific directions elsewhere on this label) and other commodities included in the cereal grains crop grouping.

Restrictions
- Do not apply more than 8.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 4.0 fluid ounces of Fitness Fungicide (0.11 pound active ingredient) per acre per season if forage or hay will be harvested.
- Do not apply more than 0.22 pound active ingredient propiconazole containing product per acre per season.
- Wheat only: Do not apply after Feekes growth stage 10.5 (straw and grain).
- Preharvest Interval (PHI) is 30 days for forage or hay.
- Cereals other than Wheat: Preharvest Interval (PHI) is 45 days for grain and straw.

Apply Fitness Fungicide by ground, aerial or chemigation equipment. Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

Target Disease | Application | Application Timing and Remarks
---|---|---
Powdery mildew | 4.0 | (Blumeria spp., Erysiphe spp.)
Rust | | (Puccinia spp.)
Spot blight | | (Rhizoctonia solani)
Tan spot | | (Pyrenophora tritic-repentis)

CITRUS (non-bearing)

(Calamondin, Citron, Citrus hybrids, Grapefruit, Kumquat, Lemon, Mandarin, Orange (sour and sweet), Pummelo, Satsuma Mandarin, Tangerine, Including all cultivars and/or hybrids of these.)

Restrictions
- Do not apply more than 24.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.67 pound active ingredient propiconazole containing product per acre per season.
- Preharvest Interval (PHI) is 12 months.

Apply Fitness Fungicide by ground or aerial equipment (a minimum of 15.0 gallons per acre). Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

Target Disease | Application | Application Timing and Remarks
---|---|---
Greasy spot | 6.0 to 8.0 | Begin applications in June. Apply on 30-day interval through August.

CORN

Restrictions:
- For Field Corn, Field Corn Grown for Seed, and Popcorn
  - Do not apply more than 16.0 fluid ounces per acre per season of Fitness Fungicide.
  - Do not apply more than 8.0 fluid ounces of Fitness Fungicide per acre per season on corn harvested for forage.
  - Do not apply more than 0.45 pound active ingredient propiconazole containing product per acre per season.
  - Preharvest Interval (PHI) is 30 days for forage, grain and stover.

For Sweet Corn:
- Do not apply within 14 days of harvest for ears.
- Do not apply within 14 days of harvest for forage.

Apply Fitness Fungicide by ground, aerial or chemigation equipment. Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

Target Disease | Application | Application Timing and Remarks
---|---|---
Powdery mildew | 4.0 | (Blumeria spp., Erysiphe spp.)
Rust | | (Puccinia spp.)
Spot blight | | (Rhizoctonia solani)
Tan spot | | (Pyrenophora tritic-repentis)

Fusarium head blight suppression | 4.0 | Apply Fitness Fungicide at approximately 50% flowering. Addition of a penetrating type of adjuvant may increase Fusarium head blight suppression.

Control of Leaf Diseases:
Barley scald | | (Cochliobolus carbonum)
Barley stripe | | (Pyrenophora graminea)
Glume blotch | | (Stagonospora nodorum)
Leaf blight | | (Septoria tritic-repentis)
Net blotch | | (Pyrenophora teres)

### PEANUTS

**Restrictions**
- Do not apply more than 16.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.45 pound active ingredient propiconazole containing product per acre per season.
- Do not feed hay from treated fields to livestock if the high rate is used (8.0 fluid ounces per acre).
- Preharvest Interval (PHI) is 14 days with the low use rate (4.0 fluid ounces per acre).
- Preharvest Interval (PHI) is 21 days with the high use rate (8.0 fluid ounces per acre).

**Target Disease**
- Early leaf spot (Cercospora arachidicola)
- Late leaf spot (Cercosporidium personatum)
- Rust (Puccinia arachidii)
- Web blotch (Phoma arachidicola)

<table>

### PECANS

**Restrictions**
- Do not apply more than 32.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.90 pound active ingredient propiconazole containing products per acre per season.
- Do not apply after shuck split.
- Do not graze livestock in treated areas or cut treated cover crop for feed.

**Target Disease**
- Southern stem rot (Sclerotium rolfsii)

<table>
<thead>
<tr>
<th>Application Rate (Fl Oz/A)</th>
<th>Application Timing and Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.0</td>
<td>Apply to the crown and pegging zones of the plant by chemigation or directed ground application using one of the following schedules: A. Apply 4.0 fl oz/A. Begin applications 45 days after planting or at the first appearance of disease. Repeat on a 14-day interval. B. Apply 8.0 fl oz/A. Make the first application at pegging (approximately 60 days after planting) or at the first appearance of disease. Make the second application 3 to 4 weeks later. When applying in irrigation water for Southern stem rot control, use a minimum of 0.25 to 0.5 inch of water/A. Use enough water so the fungicide penetrates the peanut canopy and reaches the crown of the plant where the disease is most active. When applying via irrigation or as a directed ground application, additional methods should be employed for Leaf spot control.</td>
</tr>
</tbody>
</table>

The active ingredient in this product may have effects on federally listed threatened and endangered species or critical habitat in some counties. When using this product, you must follow the measures contained in the County Bulletin for the county in which you are applying the pesticide. To determine whether your county has a bulletin consult http://www.epa.gov/opp/bulletins.htm. Bulletins may also be available from local pesticide dealers, extension offices, or state pesticide agencies.

#### Other listed foliar diseases:
- Apply 4.0 fl oz/A with other products registered for pecans and labeled for these mid- to late-season foliar diseases. Observe all directions, precautions, and limitations for the other products.

### PINEAPPLE (Hawaii Only)

#### Restrictions
- Do not use treated crowns for food or feed.
- Do not graze while plant is growing.
- Do not graze tops until fruit is harvested.
- Dispose of used dip solution according to local state and federal regulations.

### RICE

#### Restrictions
- Do not apply to stubble or ratoon crop rice.
- Do not use in rice fields where commercial farming of crayfish will be practiced.
- Do not drain water from treated rice fields into ponds used for commercial fish farming.
- Do not use water drained from treated fields to irrigate other crops.
- Do not release flood water within 7 days of an application.
- Do not apply more than 12.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.34 pound active ingredient propiconazole containing product per acre per season.
- Preharvest Interval (PHI) is 35 days

Apply Fitness Fungicide by aerial equipment only. Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

### WILD RICE (Minnesota only)

#### Restrictions
- Do not apply to stubble or ratoon crop rice.
- Do not use in rice fields where commercial farming of crayfish will be practiced.
- Do not drain water from treated rice fields into ponds used for commercial fish farming.
- Do not use water drained from treated fields to irrigate other crops.
- Do not release flood water within 7 days of an application.
- Do not apply more than 12.0 fluid ounces per acre per season of Fitness Fungicide.

The active ingredient(s) in this product may have effects on federally listed threatened and endangered species or critical habitat in some counties. When using this product, you must follow the measures contained in the County Bulletin for the county in which you are applying the pesticide. To determine whether your County has a Bulletin, consult www.epa.gov/ops/bulletins.htm. Bulletins also may be available from local pesticide dealers, extension offices, or State pesticide agencies.
Wild Rice (Minnesota only) cont’d:

- Do not apply more than 0.34 pound active ingredient propiconazole containing product per acre per season.
- Preharvest Interval (PHI) for forage is 35 days

Apply Fitness Fungicide by aerial equipment only. Fitness Fungicide is most effective when applied and allowed to dry before a rainfall. The active ingredient(s) in this product may have effects on federally listed threatened and endangered species or critical habitat in some counties. When using this product, you must follow the measures contained in the County Bulletin for the county in which you are applying the pesticide. To determine whether your County has a Bulletin, consult www.epa.gov/espp/bulletins.htm. Bulletins also may be available from local pesticide dealers, extension offices, or State pesticide agencies.

</tbody>
</table>

SORGHUM

Restrictions

- Do not apply more than 16.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 8.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.45 pound active ingredient propiconazole containing product per acre per season.
- Preharvest Interval (PHI) for forage is 30 days
- Preharvest Interval (PHI) for grain and stover is 21 days.
- Do not graze livestock or cut for green chop or silage within 30 days of application.
- Do not apply more than 0.45 pound active ingredient propiconazole containing product per acre per season.

Apply Fitness Fungicide by ground (a minimum of 15.0 gallons per acre) or aerial equipment (a minimum of 10.0 gallons per acre). Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

<table>
<thead>
<tr>

</tbody>
</table>

STONE FRUITS

Apricot, Chickasaw Plum, Damson Plum, Japanese Plum, Nectarine, Peach, Plum, Plum-Cot, Prune, Sweet Cherry, Tart Cherry, and cultivars and/or hybrids of these included in the stone fruits crop grouping

Restrictions

- Do not apply more than 20.0 fluid ounces per acre per season of Fitness Fungicide.
- Do not apply more than 0.56 pound active ingredient propiconazole containing product per acre per season.
- Preharvest Interval (PHI) is 0.

Precaution

Applications of Fitness Fungicide during bloom to Stanley plums have occasionally caused fruit to be less oval in shape and smaller in size at harvest. To avoid this, do not apply to Stanley plums earlier than 21 days before harvest.

Apply Fitness Fungicide by ground or aerial equipment (a minimum of 15.0 gallons per acre). For best control of stone fruit diseases, apply by ground application. Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

<tr>
<td>Brown rot blossom blight (Monilinia spp.)</td>
<td>4.0</td>
<td>Apply at early bloom stage. If disease pressure is low, a second application may be made as needed through petal fall. Under conditions of high disease pressure and/or very susceptible varieties, make a second application from 75 to 100% bloom and a third application at petal fall. Apply a maximum of 2 sprays as needed during the preharvest period up to the day of harvest. If high inoculum and severe disease conditions persist, apply another registered fungicide after applying Fitness Fungicide twice. See Brown rot blossom blight. Make up to 2 additional applications on a 10 to 14 day interval from the end of petal fall to harvest.</td>
</tr>
</tbody>
</table>
SUGARCANE
Restrictions
• Dispose of used dip solution according to local state and federal regulations.
• Do not use treated seed pieces for food or feed.

Target Disease | Application Rate (Ft Oz /100 Gal of Water) | Application Timing and Remarks
--- | --- | ---
Pineapple disease (Ceratocystis paradoxa) | 0.75 (1:17,000) | Cold water dip: Immerse seed pieces to give thorough wetting, remove, and allow to drain. Hot water dip: Maintain water temperature at 125 °F (52 °C). Soak seed pieces for 20 to 30 minutes, remove, and allow to drain. Conveyor belt treatment: Treat seed pieces with a solution of Fitness Fungicide and water using in-line directed spray sufficient to wet cut ends.

TREE NUTS
Almond (see specific directions), Beechnut, Brazil Nut, Butternut, Chestnut, Chincapin, Filbert (see specific directions elsewhere on this label), Hickory, Macadamia, Pecan (see specific directions elsewhere on this label), Hickory, Macadamia, Pecan
Restrictions
• Do not apply more than 32.0 fluid ounces per acre per season of Fitness Fungicide.
• Do not graze livestock in treated areas or cut cover crop for feed.
• Do not apply more than 0.90 pound active ingredient propiconazole containing product per acre per season.
• Preharvest Interval (PHI) is 60 days.

Apply Fitness Fungicide by ground or aerial equipment (a minimum of 15.0 gallons per acre). For best control of tree nut diseases, apply by ground application. Fitness Fungicide is most effective when applied and allowed to dry before a rainfall.

Target Disease | Application Rate (Fl Oz/A) | Application Timing and Remarks
--- | --- | ---
Foliar Diseases | 4.0 to 8.0 | Apply Fitness Fungicide at first sign of disease. Repeat on a 7- to 14-day interval.

TURFGRASS GROWN FOR SEED (For use only in Idaho, Minnesota, Nebraska, Oregon, and Washington)
Restrictions
• Do not apply more than 32.0 fluid ounces per acre per season of Fitness Fungicide.
• Do not graze treated areas within 140 days of the last application.
• Do not feed hay cut within 20 days of the last application.

Apply Fitness Fungicide by ground or aerial equipment (a minimum of 10.0 gallons per acre). Fitness Fungicide may also be applied by chemigation.

Target Disease | Application Rate (Fl Oz/A) | Application Timing and Remarks
--- | --- | ---
Ergot stem disease | 4.0 to 8.0 | Apply when Powdery mildew infections, Selenophoma infections, infections, and/or Rust pustules are noticeable and increasing in number in late spring or early summer. Apply on a 14- to 21-day interval. To maximize control of severe Rust pressure, apply 8.0 fl oz/A and reapply at 14-day intervals until the seed is mature. Make the last application at least 20 days before seed matures. For bluegrass, it is important to begin applications early in the growing season.

TURFGRASS AND ORNAMENTAL INSTRUCTIONS
(Not for Turf and Ornamental use in California)
Product Information
Fitness Fungicide is a systemic fungicide for use on turfgrass for the control of dollar spot (Sclerotinia homeocarpa), brown patch (Rhizoctonia solani), anthracnose (Cylindrocladium graminicola), red thread (Laetisaria fuciformis), pink patch (Limaomyces rosea), rust (Puccinia graminis), powdery mildew (Erysiphe graminis), stripe smut (Ustilago striiformis and Urocystis agropyri), summer patch (Magnaporthe poae), necrotic ring spot (Leptosphaeria korrae), spring dead spot (Leptosphaeria korrae, Leptosphaeria narmari, Opiloasphaera herichii, Gaumannomyces graminis), take-all patch (Gaumannomyces graminis), leaf spot (Bipolaris spp., Drechslera spp.), gray leaf spot (Pyricularia grisea), pink snowmold (Microdochium nivale), Fusarium patch (Fusarium nivale), gray snowmold (Typhula spp.), yellow patch (Rhizoctonia cerealis), and zonya patch (Rhizoctonia solani). Fitness Fungicide also controls numerous diseases on ornamentals and other landscape and nursery plantings, including powdery mildews, rusts, leaf spots, scabs, and blights. Refer to the appropriate section for specified diseases and plants.

Use Restrictions
• Do not use this product as a tree injection treatment.
• Do not use Fitness Fungicide in greenhouses.
• Do not apply more than 5.8 fluid ounces of Fitness Fungicide per 1000 square feet per calendar year.
• Chemigation: Do not apply this product through any type of irrigation system.

Use Precautions
Failure to follow the directions for use and precautions on this label may result in plant injury or poor disease control.
Tank Mixes of Fitness Fungicide for Turfgrass and Ornamental Applications

See Mixing Instructions Section

Add E-Z Mix compatibility agent (3.0 pints per 100 gallons) to tank mixes that are incompatible. Observe all directions, precautions and limitations on the labels of all products used in the tank mix. Tank mixes or other applications of products referenced on this label are permitted only in those states where referenced products are registered.

Uses

Turfgrass and Dichondra
- Use Fitness Fungicide in a preventative disease control program.
- Apply in sufficient water to ensure thorough coverage.
- Apply after mowing or allow sprayed area to dry completely before mowing.
- For control of foliar diseases, allow sprayed area to dry completely before irrigation.
- For control of soilborne diseases, Fitness Fungicide can be watered in immediately after application.
- Under conditions that are optimum for high disease pressure, use the higher rate and shorter interval.
- For optimum turfgrass quality and disease control, use Fitness Fungicide in conjunction with turf management practices that promote good plant health and optimum disease control.
- Evaluate spray additives prior to use. Label directions are based upon data obtained with no additives.
- Before using any fungicide, proper diagnosis of the organism causing the disease is important. Using diagnostic kits or other means of identification of the disease organism is essential to determine the best control measures.

</tr>
</tbody>
</table>
Fitness Fungicide may be used at rates of 0.75 to 8.7 fluid ounces per 100 gallons of water for disease control in ornamentals (see Tables 1, 2 and 3). For best control, begin applications before disease development. For general disease control in landscapes, apply 2.2 to 3.0 fluid ounces per 100 gallons water every 21 days. For best control, begin Fitness Fungicide applications before disease development.

Use Restrictions
To avoid possible illegal residues, do not apply to apple, Bartlett pear, cherry, citrus, nectarine, peach, pecan, plum, or walnut trees that will bear harvestable fruit within 12 months.

For outdoor uses, up to 2.0 gallons of Fitness Fungicide may be applied per acre per calendar year.

Use Precautions
Plant tolerances to Fitness Fungicide have been found acceptable for the specific genus and species of plants listed under the Directions for Use.

Do not apply Fitness Fungicide to African violets, begonias, Boston fern, or geraniums.

Other plant species may be sensitive to Fitness Fungicide and diseases other than those listed may not be controlled.

Before using Fitness Fungicide on plants or for diseases that are not listed in the Directions for Use, first test Fitness Fungicide on a small scale basis. Apply according to listed rates for a particular disease type, i.e. Rust, Powdery mildew, etc., and evaluate for phytotoxicity and disease control prior to widespread use.

   - Ovulinia spp. [B]

3. Leaf blights/spots
   - Alternaria spp. [B]
   - Cercospora spp. (Brown leaf spot) [C]
   - Cladosporium spp. (Scab) [C]
   - Coccomyces hiemalis [A]
   - Collectrichum spp. [B]
   - Cristulariella spp. (Zonate leaf spot) [C]
   - Diplocarpon rosae (Blackspot) [B]
   - Discula spp. (Anthracnose) [A]
   - Fabraea maculata (syn. Entomosporium maculata) [B]
   - Gnomonia leptostyla (Anthracnose) [C]
   - Heterosporium echinulatum [B]
   - Mycosphaerella carriigena (Downy spot) [C]
   - Mycosphaerella fructicola (Greasy spot) [E]
   - Septoria spp. (Leaf scorch) [D]
   - Spilocaea pyracanthae [B]
   - Tubakia dryinii [D]
   - Venturia inaequalis (Scab) [A]

4. Powdery mildew
   - Erysiphe spp. [B]
   - Microsphaera spp. [C]
   - Ostium spp. [B]
   - Podosphaera spp. [B]
   - Sphaerotheca pannosa [B]
   - Phyllactinia spp. [B]

5. Rust
   - Gymnosporangium juniperi-virginianae [A]
   - Melampsora occidentalis [D]
   - Podosphaera spp. [B]
   - Puccinia spp. [B]
   - Pucciniastrum goeppertianum [D]
   - Typhula cinerea [B]
   - Uromyces dianthi [B]

Table 3. Application Regimes
[A] Mix 0.75 to 1.5 fluid ounces of Fitness Fungicide in 100 gallons of water and apply as a full coverage spray to the point of drip. Reapply every 14 to 21 days during the period of primary infection. If disease is present, tank mix with an EPA-registered contact fungicide. For Flower blight, apply Fitness Fungicide when
once in May. For Tip blight, make an initial application in mid- to late-winter, and when conditions favor disease development. For Douglas fir needle rust, apply a full coverage spray to the point of drip. Apply every 14 to 28 days beginning 
Mix 6.0 fluid ounces of Fitness Fungicide in 100 gallons of water and apply as

For walnuts, apply 3.0 fluid ounces every 14 to 21 days. For ray blight, apply 4.5

Storage & Disposal cont’d.: Recycling Council (ACRC) at www.acrecycle.org. If not recycled, then puncture and dispose of in a sanitary landfill, or incinerate after proper notification by state and local authorities, by burning. If burned, stay out of smoke. Triple rinse or pressure rinse container (or equivalent) promptly after emptying. For packages up to 5 gallons: Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip. For packages greater than 5 gallons and less than 56 gallons: Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Triple rinse or pressure rinse container (or equivalent) promptly after emptying before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

For refillable containers: Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. PESTICIDE STORAGE: Store in original container in secured dry storage area. Prevent cross-contamination with other pesticides and fertilizers. For minor spills, leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup and disposal of wastes. PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law and may contaminate groundwater. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL: Nonrefillable container. Do not reuse this container or hold materials other than pesticides or dilute pesticides (rinsate). After emptying and cleaning, it may be allowable to temporarily hold rinsate or other pesticide-related materials in the container. Contact your state regulatory agency to determine allowable practices in your state. Once cleaned, some agricultural plastic pesticide containers can be taken to a container collection site or picked up for recycling. To find the nearest site, contact your chemical dealer or manufacturer, or contact The Agricultural Container

CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

BEFORE BUYING OR USING THIS PRODUCT, read the entire Directions for Use

and the following Conditions of Sale and Limitation of Warranty and Liability. By buying or using this product, the buyer or user accepts the following Conditions of Sale and Limitation of Warranty and Liability, which no employee or agent of LOVELAND PRODUCTS, INC. or the seller is authorized to vary in any way.
Follow the Directions for Use of this product carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop or other plant injury, ineffectiveness, or other unintended consequences may result from such risks as weather or crop conditions, mixture with other chemicals not specifically identified in this product's label, or use of this product contrary to the label instructions, all of which are beyond the control of LOVELAND PRODUCTS, INC. and the seller. The buyer or user of this product assumes all such inherent risks.

Subject to the foregoing inherent risks, LOVELAND PRODUCTS, INC. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use when the product is used in strict accordance with such Directions for Use under normal conditions of use. EXCEPT AS WARRANTED IN THIS LABEL AND TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THIS PRODUCT IS SOLD "AS IS," AND LOVELAND PRODUCTS, INC. MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ELIGIBILITY OF THIS PRODUCT FOR ANY PARTICULAR TRADE USAGE.

IN THE UNLIKELY EVENT THAT BUYER OR USER BELIEVES THAT LOVELAND PRODUCTS, INC. HAS BREACHED A WARRANTY CONTAINED IN THIS LABEL AND TO THE EXTENT REQUIRED BY APPLICABLE LAW, BUYER OR USER MUST SEND WRITTEN NOTICE OF ITS CLAIM TO THE FOLLOWING ADDRESS: LOVELAND PRODUCTS, INC., ATTENTION: LAW DEPARTMENT, P.O. BOX 1286, GREELEY, CO 80632-1286.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE BUYER’S OR USER’S EXCLUSIVE REMEDY FOR ANY INJURY, LOSS, OR DAMAGE RESULTING FROM THE HANDLING OR USE OF THIS PRODUCT, INCLUDING BUT NOT LIMITED TO CLAIMS OF BREACH OF WARRANTY OR CONTRACT, NEGLIGENCE, STRICT LIABILITY, OR OTHER TORTS, SHALL BE LIMITED TO ONE OF THE FOLLOWING, AT THE ELECTATION OF LOVELAND PRODUCTS, INC. OR THE SELLER: DIRECT DAMAGES NOT EXCEEDING THE PURCHASE PRICE OF THE PRODUCT OR REPLACEMENT OF THE PRODUCT. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, LOVELAND PRODUCTS, INC. AND THE SELLER SHALL NOT BE LIABLE TO THE BUYER OR USER OF THIS PRODUCT FOR ANY CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES, OR DAMAGES IN THE NATURE OF A PENALTY.
