FIRST AID

If in eyes: • Hold eye open and rinse slowly and gently with water for 15 - 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If on skin or clothing: • Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If inhaled: • Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

If swallowed: • Call a poison control center or doctor immediately for treatment advice.
• Have the person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

FOR A MEDICAL EMERGENCY INVOLVE THIS PRODUCT CALL: 1-866-944-6565.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

ENVIRONMENTAL HAZARDS

This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwater.

If material is spilled: • Contain and sweep up material of soil for disposal or use per label instructions. Wash disposal equipment to prevent contamination elsewhere. Excess quantities above normal application rates could result in damage to plants subject to spill. Water-in-rainfall: disc under, cover with layer of soil, or leave exposed to sunlight, as general, appropriate to the situation.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in original container away from other fertilizer, feed, or food stuffs and separated from other pesticides.

PESTICIDE DISPOSAL: Waste resulting from the use of this product may be disposed of on site or as an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Completely empty bag into a labeled applicator equipment by shaking and tapping feeder and bottom to loosen clinging particles. Offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration. Do not burn, unless allowed by state and local ordinances.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product is a selective preemergence herbicide that provides residual control of many grass and broadleaf weeds:

• Established turf grasses (excluding golf course putting greens) and lawns
• Landscape ornamentals (including established perennials &illard flower plantings)
• Covers up to 16,930 square feet

KEEP OUT OF REACH OF CHILDREN

CAUTION

See the following section, Precautionary Statements, Hazards To Humans and Domestic Animals, for additional information.

GENERAL APPLICATION GUIDELINES:

Rate

lbs. Product
per 1,000 sq. ft. lbs. Nitrogen
per 1,000 sq. ft. lbs. A.I.
per acre

Low 3.05 0.85 0.50
Medium 4.60 1.29 0.75
High 6.14 1.75 1.00

Spreader Setting Bighoof Earthway Lesco Rotoray AccuPro 2000

Low L 16 J N
Medium N 17 K 0
High P 18 L P

These settings are approximates for the application rates shown per 1,000 square feet. You may need to adjust the spreader setting depending on rolling speed, spreader condition and product.

DISTRIBUTED BY

Loveland Products, Inc.
P.O. Box 1286, Greeley, Colorado 80632-1286

ESTABLISHED TURF

This product is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grasses and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species in the Pesticide Annual Rate section of this label. Most effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inches of rainfall prior to weed seed germination and within 14 days following application.

APPLYING TURF

Apply uniformly with a calibrated applicator equipment.
Signature Crabgrass Preventer with EVADE .375% Plus
EPA REG. NO. 34704-776

See the map below for approximate crabgrass seed germination dates.

CRABGRASS SEED GERMINATION DATES

Approximate Date
1 After May 24
2 After May 11
3 After May 4
4 After April 27
5 Jan 1 to Mar 20

Contact your Loveland products Sales Representative or local Agricultural Extension Agent for crabgrass germination information for your area.

Use Precautions
The following precautions apply to the use of this product in turf grasses and lawns:
Application of this product may thin emerged annual bluegrasses and newly overseeded grasses.
Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seeding secondary rows are in the second inch of soil, not thatch plus soil.
Do not cut (harvest) treated soil before 120 days after application. Do not apply to newly set sod until the following year.
Application of this product to turf stressed by drought, low fertility, or pest damage may result in turf injury.
Restrict the herbicide barer with cultural practices such as slashing may result in reduced weed control.
Do not apply this product to paths or driveways or even where dichtona, colonial bentgrass, velvet bentgrass or annual bluegrass (Poa annua) are desirable species.

Rates of Application
This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made prior to germination of the target weeds. This product will not control established weeds.

Maximum one rate selection should be based on turf species. The length of time of residual weed control provided by this product is related to the rate applied.

Maximum Annual Rates
This product is recommended for one use on the turf grass species listed in the following table. Do not exceed the maximum annual rate as given in the following table:

Landscaper Ornamentals
(IncludingEstablished Perennials and Wildflower Planting)
This product may be applied for residual preemergence weed control in ornamentals.

Use Rates
Apply this product at 175 to 400 lbs/ac in fall and/or spring. Use higher rates of application for longer control periods. Sequential or single applications are allowed as long as the total amount of product applied does not exceed the maximum annual application rate of 400 lbs/ac.

Application Timing and Information
This product is a preemergence herbicide and will not control emerged weeds. Most effective weed control in ornamentals will be obtained when this product is activated at least 0.5 inches of rainfall or irrigation, or with mulch (3 to 4 inches) mechanical incorporation, prior to weed seed germination and until 14 days following application.
