### Remarks
- For use in conventional, non-irrigated, or irrigated situations, whole-plant covers or whole-root systems are not required. Prior to planting, the plant stems and other above-ground parts must be treated with a registered insecticide.
- **Counter 20G at 3 oz. per 1,000 lbs. of seed** must be applied to the soil before planting or in the fall the previous year, with the treated seed buried at least 2 inches. The treated seed must be covered with soil to ensure that the whole seed cover is not exposed to the elements.
