- Turf Products
- Heritage 15-0-0
- Contains NutriSphere-N®

KEEPS OUT OF REACH OF CHILDREN

CAUTION
PRECAUTIONARY STATEMENTS
Hazardous to Humans and Domestic Animals
Caution: Do not allow children, pets, or livestock to enter the treated area. Avoid contact with skin or clothing. Avoid breathing dust. Wash hands and exposed skin with soap and water after handling. Hydrochloric or frequently rinsed skin can cause skin disorders in some situations.

FIRST AID
If in eyes: Hold open and keep gently with water for 15-30 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a doctor or a poison control center; or doctor for advice
If on skin: Take off contaminated clothing. Wash skin immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for advice
If inhaled: Get victim to fresh air. Give 2 liters of oxygen by a self-contained breathing apparatus. Do not give anything by mouth to an unconscious person.

Environmental Hazards
Do not contaminate water, food, or feed by spills. Storage: Store in original container. Closely蕾 him of rats, mice, or any other pest not used on food or food contact surfaces. Do not store in places where water or rain may come in contact with the area treated. Do not use in or near fish-bearing streams or water bodies. Do not apply more than 50 lbs. per acre (12.5 kg/ha) per year to fish-bearing streams or water bodies.

DIRECTIONS FOR USE:
For a mixture of herbicide to be effective, the treated area must be free from water. Do not apply if there is evidence of water in the area where treatment is desired. Do not apply if the water levels are below the mean high water mark. Do not apply if the water level in the area would result in the treatment being applied at a rate of 2.5 gallons per acre (1 liter per m²) or more. Do not contaminate water when applying this product.

APPLICATION DIRECTIONS:
Apply evenly throughout the treatment area, puddled or lugged application equipment.

ESTABLISHED TURF:
This product is a preemergence herbicide that, when properly applied as directed, will control certain grass and broadleaf weeds in established turf grasses and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species.

Most effective weed control in turf grasses will be obtained when the product is activated by about 0.5 inch of rainfall or irrigation prior to weed growth and prior to 14 days following application. See the map below for approximate 0.5 inch rainfall or irrigation periods.

Use Restrictions and Precautions
This product must not be applied to grass or broadleaf weeds that are actively growing. Do not apply over a speed limit of 15 mph after seeding or until the second harvest, whichever is later. Do not apply to the same field more than once every 3 years. Do not apply to turf grass species that are not listed in the table below.

RATES OF APPLICATION
This product can be applied as a single application or in two applications to control weeds growing in turfgrass (Table 1). Do not apply the product at a rate of more than 50 lbs. per acre (12.5 kg/ha) per year. Do not apply more than 50 lbs. per acre (12.5 kg/ha) per year to turf grass species listed in the table below. Do not apply more than 50 lbs. per acre (12.5 kg/ha) per year to turf grass species listed in the table below. Do not apply more than 50 lbs. per acre (12.5 kg/ha) per year to turf grass species listed in the table below.

Maximum Annual Rates
This product is recommended for use on the turf grass species listed in the following table. Do not apply more than 50 lbs. per acre (12.5 kg/ha) per year to turf grass species listed in the table below.

Maximum Annual Rate Table

<table>
<thead>
<tr>
<th>Turf Species</th>
<th>Maximum Annual Rate (lbs/ac)</th>
