Directions for Use.
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Use Glyco-San® to disinfect on-board potable water storage tanks and components associated with these tanks such as pipes, plumbing fixtures, aircraft water storage tanks, and nozzles. Glyco-San® is an effective disinfectant against Staphylococcus aureus (ATCC 6538), Salmonella enterica (ATCC 10708) and Escherichia coli (ATCC 11229).

Application Instructions:
Prior to disinfection, pre-clean water storage tanks and associated components with Glyco-San® by preparing a use-solution consisting of 1 part Glyco-San® to 5 parts of water (1:4). Prepare the Glyco-San® cleaning solution by either pumping the appropriate amount of water into the water storage tank or system followed by Glyco-San® addition, or by making up the Glyco-San® cleaning solution in a tank, drum or water cart and then pumping the Glyco-San® cleaning solution into the potable water tank. Pre-clean for a minimum of 30 minutes and, when necessary, up to 4 hours. After the pre-cleaning period is completed, thoroughly rinse the storage tank and associated components with potable water.
To disinfect, prepare a use-solution of 1 part of Glyco-San® to 7 parts of water (1:8) by either pumping the appropriate amount of water into the potable water tank followed by Glyco-San® addition, or by making up the Glyco-San® disinfectant solution in a tank, drum or water cart and then pumping the disinfectant use-solution into the potable water tank. After the disinfectant use-solution has filled the potable water tank, flush through the potable water system for 1 minute by opening all taps, excluding the coffee maker and vacuum toilets (where appropriate). This will allow the disinfectant use-solution to come in contact with all surfaces that contact potable water. Flush the lavatory 1-2 times. After the use-solution to soak in-place for at least 30 minutes and then flush to a sanitary sewer drain. Once drained, flush the potable water system with water to remove any traces of the disinfectant use-solution. In order to determine whether the system is completely flushed, half-fill a small jar with the rinse water, cap and shake. If the water in the jar does not foam, the system has been thoroughly flushed.
Glyco-San® can also be used to disinfect the aircraft coffee maker during shop cleaning. If heavily soiled, pre-clean the coffee maker with a suitable detergent or a 1/4 dilution of Glyco-San®. To disinfect, prepare a use-solution 1 part of Glyco-San® to 7 parts of water (1:8). Make a full pot of hot water using the Glyco-San® use-solution and allow to soak in-place for at least 30 minutes. Continue to make pots of hot water using only tap water until hot water DOES NOT FOAM when shaken in a small, capped jar. Absence of foam indicates that the disinfectant solution has been flushed from the coffee maker.

Precautionary Statements
Hazard to Humans and Domestic Animals
Caution. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wear protective eyewear and gloves when handling. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.
First Aid
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
Call a poison control center or doctor for treatment advice.
If on skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
Hot Line Number
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-3300 for emergency medical treatment information.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
Pesticide Storage: Store in cool, dry, well-ventilated area inaccessible to children. If leak or spill occurs - ventilate area of leak or spill. Remove all sources of ignition. Dilute with water and mop-up or absorb with an inert material (e.g., vermiculite, dry sand, earth) and place in a chemical waste container.
Pesticide Disposal: Waste resulting from the use of this product must be disposed of on-site or at an approved waste disposal facility.
Container Disposal: Nonrefillable container. Do not reuse or refill this container.
Triple rinse as follows: Empty the remaining contents into application equipment or mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip the container on its side and roll it back and forth several times, ensuring at least one complete revolution, for 30 seconds. Stand container on its end and tip back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat the procedure two more times. Then offer for recycling or dispose of in a sanitary landfill.
