KILLS RAT & MICE
Norway rats, roof rats and house mice may consume a lethal dose in one night’s feeding with first dead rodents appearing four or five days after feeding begins.

ACTIVE INGREDIENT: Bromadiolone (CAS #28772-97-1)......... 0.005%
“Contains Denatonium Benzoate TOTAL 99.955%”

KEEPS OUT OF REACH OF CHILDREN CAUTION

READ THIS LABEL. Read the entire label and follow all directions and use precautions. Use only for pests, sites and applications methods described on this label.

IMPORTANT: Do not expose children, pets, or nontarget animals to rodenticides. To help prevent accidents:

1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in temperate-resistant bait stations. These stations must be off limits to destruction by birds and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and eating bait. If bait can be shaken from bait stations when they are filled, units must be securely or otherwise immobilized. Stronger bait stations are needed in areas open to heavy bird, raccoon, bear, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled, or unseal bait as specified on this label.

NOTE: Bait stations are mandatory for outdoor, above ground use. Tamper-resistant bait stations must be used if children, non-target mammals or birds may access the bait.

USE RESTRICTIONS: This product can only be used to control: Norway rats, roof rats and house mice in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting nontarget infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port of terminal buildings and related structures around and associated with these sites. Fences and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

This product may only be applied to active burrows to control Norway rats, and roof rats within 100 feet of buildings and man-made structures constructed in a manner so as to

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and/or handling is contrary to label instructions.

DIRECTIONS FOR USE

KILLS WARFARIN RESISTANT NORWAY RATS

Norway rats, roof rats and house mice may consume a lethal dose in one night’s feeding with first dead rodents appearing four or five days after feeding begins.

DIRECTIONS FOR USE

be vulnerable to commensal rodent invasions and/or to harboring or attracting nontarget infestations provided that infestations of these rodents have been confirmed. Efforts should be made to remove food, trash, garbage, clutter and debris. Baits must be placed no less than 6 inches into active Norway/roof rat burrows. Do not broadcast bait.

Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used by USAID inspected facilities, this product must be applied in tamper-resistant bait stations. Do not use this product in sewers.

Do not sell this product in individual containers holding less than 16 pounds of bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are along walls, by grated openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

RATS: Apply 3 to 16 ounces of bait at intervals of 15 to 30 feet per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.

HOUSE MICE: Apply 1/4 to 1/2 oz. (1−2 level tablespoons) of bait per placement at 8 to 12 foot intervals. Larger placements (up to 3 oz.) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse activity cease.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinestation, limit sources of rodent food, water, and harborage as much as possible. If reinestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Do not get in eyes, on skin, or on clothing. Keep away from children, domestic animals, and pets.

All handlers (including applicators) must wear long sleeved shirt and long pants, shoes plus socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

User Safety Requirements

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to fish, birds and other wildlife. Dogs, cats, and predatory and scavenging mammals and birds might be poisoned if they feed upon animals poisoned by this product. Do not apply this product directly to water or to any surface water, marsh, or to tidal areas below the mean high water mark.
