NALCO® 60625

Stabilizing solution for use with active chlorine sources.

This product is to be used only with an EPA-registered source of sodium hypochlorite approved for use in pulp and paper.

PRINCIPAL FUNCTIONING AGENT:
- Dimethyl hydantoin: 15%
- Constituents ineffective as spray adjuvants: 85%
- Total: 100%

Not for aquatic environments such as lakes, streams, ponds

KEEP OUT OF REACH OF CHILDREN

CAUTION

MAY CAUSE MILD EYE AND SKIN IRRITATION

PRECAUTIONS:
Keep out of reach of children. Use with sufficient ventilation to prevent build-up of vapor. Wear safety glasses when handling. Wash thoroughly after handling.

HANDLING/STORAGE:
Keep out of sun and away from heat. Keep containers closed until used. Avoid contact with strong oxidizing agents. Do not store at elevated temperature. Keep from freezing. Avoid storing below 60 deg. F to prevent crystallization.

SPILL/DISPOSAL:
Absorb small spills with inert material (sand, earth, ...) and transfer into appropriate containers for recovery or disposal. Dike and contain large spills with inert material (sand, earth, ...). Transfer the solid and liquid into separate containers for recovery or disposal. Dispose of in accordance with all Federal, State and local laws and regulations.

FIRE:
In case of fire, use the following:
- Water Spray
- Foam
- Dry Chemical
- CO2
Must wear NIOSH/MSHA approved self-contained breathing apparatus and protective clothing.

03/24/2014

FIRST AID STATEMENTS:
EYE: For eye contact, flush eyes with plenty of water for several minutes. Seek medical attention if irritation develops.

SKIN: For skin contact, wash affected areas with plenty of water for several minutes. Seek medical attention if irritation develops.

INGESTION: If swallowed, give 3-4 glasses of water. Do not induce vomiting. If vomiting does occur, give fluids again. Get medical attention to determine if vomiting or evacuating of stomach is necessary. DO NOT induce vomiting or give anything by mouth to an unconscious or convulsing person.

INHALATION: If inhaled, remove from area to fresh air. If not breathing, clear airway and start artificial respiration. If victim is having trouble breathing, give supplemental oxygen, if available. Get medical attention.

60625 is a stabilizer for use with EPA registered active chlorine sources.

60625 when blended with an active chlorine source it produces a hydantoin-stabilized solution suitable for high performance paper machines.

60625 stabilizer is intended for use in process waters used in the manufacture of both food and non-food paper and paperboard.

DIRECTIONS FOR USE:

60625 stabilizer can be mixed with an EPA registered source of active chlorine prior to addition to paper machine waters, or added to a system currently treated with active chlorine.

If 60625 stabilizer is pre-blended with the active chlorine source, the mixture should then be added to process water streams at, or immediately prior to a point of sufficient mixing, such as the main water inlet, the fan pump, or wire pit. Use a metering pump of sufficient accuracy on each liquid, piped with back-flow prevention, to produce the liquid blend using an in-line-mixing device (such as a static T mixer).

DOSAGE:

Add 60625 stabilizer at a maximum of a 1:1 molar ratio of dimethyl hydantoin to active chlorine (12 lbs. of 60625 stabilizer to 1 lbs. of Cl₂ (from the active chlorine source)). For food contact paper and paperboard uses, do not exceed 6.7 lbs. of 60625 stabilizer per ton of dry paper.
