INDOORS: Cluster Flies, Houseflies, Fruit Flies, Mosquitoes, Gnats, Wasps, Hornets, Bees, Black Flies, Skipper Flies, Blow Flies and Small Flying Moths: Close all doors and windows and direct spray upward into center of room with a slow sweeping motion. Spray 5-10 seconds for average room, moving toward the door. Direct spray to all parts of the room especially windows and other light sources which attract these insects. Keep nozzle in constant motion. Leave room and keep area closed for 15 minutes after spraying. Ventilate room thoroughly before re-entry. Sweep up and discard fallen insects. Repeat treatment as necessary. Cockroaches, Waterbugs, Palmetto Bugs, Silverfish, Firebrats, Crickets, Scorpions, Spiders, Millipedes, Centipedes, Sawbugs and Pillbugs: Spray into hiding places such as cracks and crevices, behind sinks, cabinets, along baseboards and floors, around drains and plumbing, hinging insects with spray wherever possible. Repeat treatment as necessary. Ants: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

IN ANIMAL QUARTERS AND MILK ROOMS: For rapid control of House Flies, Mosquitoes, Gnats, Wasps, Hornets, Bees and Small Flying Moths: Remove animals prior to treatment. Close windows and doors and spray at the rate of 0.2 percent per 1000 cu. ft. of space. For best results, keep area closed for 10 minutes after spraying. Do not remain in treated area and ventilate after treatment is completed.

OUTDOORS: Not for use on plants being grown for sale or other commercial use, production, or research purposes. Point spray nozzle away from face. Hold can on slight downward angle. For best results, spray when air is calm. Allow a few minutes for product to take effect. Spray with wind if breeze is blowing. FLYING INSECTS: Flies, Mosquitoes, Gnats, Small Flying Moths, Hornets, Wasps and Yellow Jackets: Allow fog to drift over area. Direct spray toward bushes or grass from at least 4 to 8 feet away. Give special attention to hiding areas such as garbage cans and compost piles. Repeat as necessary. Mud Daubers and Wasp Nests: Spray mist directly on insects and their nests from approximately 2 feet away. Contorted insects will fly away from fog. Applications should be made in late evening when insects are at rest. Spray into hiding and breeding places contacting as many insects as possible. CRAWLING INSECTS: Ants, Cockroaches, including Asian Cockroaches, Crickets, Mole Crickets, Centipedes, and Silverfish: Spray infested surface of patio or picnic area, hinging as many insects as possible. Also spray legs of tables and chairs to repel ants. Spray ant hills for best control. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
