STERIPLEX™ HC (Part A)
DIRECTIONS FOR USE

Mix Date:
SEE ATTACHED INSERT FOR COMPLETE DIRECTIONS FOR USE

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

USE STATEMENT
STERIPLEX™ HC Part A is formulated as one component of a two-part system and therefore must not be used alone as a disinfectant or as a sterilant. Activate STERIPLEX™ HC prior to use by combining STERIPLEX™ HC (Part A), with the STERIPLEX™ HC Activator (Part B) (included), into the one-gallon container as instructed below.

PREPARATION for STERIPLEX™ HC, two-part disinfectant or sterilant system:

STERIPLEX™ HC (Part A):
Main ingredient of one gallon container, and
STERIPLEX™ HC Activator (Part B):
four ounce container.

1 Using appropriate personal protective equipment (PPE), remove the cap on the STERIPLEX™ HC (Part A) container to expose the opening.

2 Obtain the STERIPLEX™ HC Activator (Part B) and remove the child protective cap. CAREFULLY pour the STERIPLEX™ HC Activator (Part B) into the main container and shake small bottle to release entire contents.

3 Replace cap and safely discard the spent STERIPLEX™ HC Activator (Part B) container in an approved waste receptacle as directed. Replace the cap on the main container.

4 Thoroughly mix the combined solution for approximately 15 seconds.

Once Part A and Part B are mixed, the mixed solution can only be used as a sporicide for 10 days and as a disinfectant for 40 days. Dispose of any solution that has exceeded these timeframes after activation. Mark the date that the solution was mixed on the container with a permanent marker in the space provided above.

This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the human body, either into or in contact with the bloodstream, or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not normally penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.
STERIPLEX™ HC (Part A)

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION - Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wear protective eyewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Harmful if absorbed through skin. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL EFFECTS

Minimal corrosion effects may occur with natural rubber and soft iron products. Stainless steel, plastics and polymers exhibit no corrosive effects. Never bring mixture in contact with other sanitizers, cleansers or organic substances. This product is not flammable or explosive.

ENVIRONMENTAL EFFECTS

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters, unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

FIRST AID FOR MIXED STERIPLEX™ HC SOLUTION

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. Call a poison control center or physician for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or physician for treatment advice.

STORAGE AND DISPOSAL

Storage

Do not store near recycling agents, fuels or other incompatible materials. Store in a dark, cool, dry, well-ventilated area. Avoid exposure to temperatures above 95°F. Do not store in direct sunlight. Do not stack pallets. Use first in first out storage system.

Container Disposal and Pesticide Residue Removal

Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. Triple rinse follows: (1) empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. (2) Fill the container to full with water and recap and shake for 10 seconds. (3) Empty and discard rinse. Drain for 10 seconds. Allow the flow to drip. (4) Repeat the procedure two more times, and then discard container and caps.

KILLS

Bacillus subtilis, Clostridium sporogenes, Mycobacterium, Pseudomonas aeruginosa, Salmonella enterica, and Staphylococcus aureus.

Achieve FAST, broad-spectrum PATHOGEN KILL.*

STERIPLEX™ HC Mixed Solution is an effective sporicide on hard, nonporous surfaces within the medical industry.
