WHITNEY FARMS

**FOR ORGANIC GARDENING**

Unconsumed bait will degrade and become part of soil.

- Rain-proof formula

Whitney Farms’ Slug & Snail Killer is effective against a wide variety of slugs and snails and will provide protection to home lawns, gardens, outdoor ornamentals, vegetable gardens, flowers, berries, citrus and crop plants. The bait is best applied directly to soil around the base of vegetable plants, flowers, fruit trees or bushes to be protected.

**GUARANTEED RESULTS**

This product is a unique blend of iron phosphate active ingredient, originating from soil, with slug and snail bait additives. After eating the bait the slugs and snails cease feeding, become less mobile and begin to die within three to six days.

**READ THE LABEL.**

**DIRECTIONS FOR USE**

Use in a solution of water and do not use this product in a manner inconsistent with its labeling.

**HOME AND GARDEN: HOW TO APPLY**

Scatter the slug and snail bait granules on the soil around or near the plants to be protected. For broadcast applications, use standard broadcast spreaders. For row application, use standard section row banders. Apply bait evenly at the rate of 0.5 to 1 lb per 1,000 square feet, or for smaller areas, 0.15 to 0.3 oz, or 1 level teaspoon per yard square, and reapply at 7-10 day intervals if necessary. Do not place in or near garden flowers, shrubs, vegetables or ornamental gardens. May be hand broadcast in or near or around vegetable plantings, places where snails and slugs will be found. May be applied in rain or by hand while banding a new application. The product works best when soil is moist and little or no standing water is present. The bait is consumed at least every two weeks. Do not place near grazing areas as it may be taken by livestock if left unattended. Consult a soil and water conservationist for proper use in the grazing area.

Apply more heavily if the infestation is severe, if the area is heavily watered or after long periods of heavy rain. See specific directions for different plant types.

**WHEN TO APPLY:**

Apply the bait during the evening, when slugs and snails travel and feed most frequently. Early evening, just before or early morning. **WHERE TO APPLY:**

Apply to all likely areas of infestation, especially around the perimeter of the lot, near the home or on the outer edges of lawns and flower areas. Apply to lawns, tomatoes, lettuce, cabbage and other vegetables. Other favorite areas are flower gardens, rockeries, hedges, shrubbery and ornamental plantings, flower and shrub beds and any part of the yard or garden where they obtain shelter from day to day.

**Vegetables:** Use the bait to protect any vegetables you wish to grow. If you are uncertain about which (not limited to): artichokes, asparagus, beans, beets, black-eyed peas, broccoli, brussels sprouts, cauliflower, celery, corn, eggplant, garlic, lettuce, onions, peas, peppers, potatoes, radishes, rhubarb, spinach, squash, Swiss chard, tomatoes and turnips.

**FRUITS (Including Citrus):** Use the bait to protect fruits from slugs and snails, including (but not limited to): apples, avocados, apricots, cherries, grapes, melons, peaches, plums, citrus, and pears.

**For sodding:** Spread bait along the base of the sod. At a rate of 0.5 oz per 1,000 square feet, or for smaller areas, 0.25 oz, or 1 level tablespoon per yard square.

Apply the bait at the rate of 0.5 lb per 1,000 square feet for orchards using standard fertilizer granular spreaders. **BERRIES:** Use the bait at the rate of 0.5 lb per 1,000 square feet.莓

**berries from slugs and snails, including (but not limited to): strawberries, blackberries, boysenberries, blueberries, currants, raspberries, and blackberries. When berries are already in the plant, then carefully broadcast snails in the berries and heavy clay or loam soil. If slugs and snails are already in the plant, then carefully broadcast snails in the berries and heavy clay or loam soil. If slugs and snails are already in the plant, then carefully broadcast snails in the berries and heavy clay or loam soil.**

**PESTICIDES:**

Do not contain water, food or food by diet or storage.

Storage:

**Pesticide Storage:** Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals.

**CONTAINER DISPOSAL:**

Non-refillable Container. If Empty: Do not renew or refill the container. Offer for recycling of hazardous waste.
