<td>5.5 - 8.0 (0.09 - 0.13)</td>
<td>Begin applications prior to disease development and continue throughout the season on a 7-10 day interval. Make no more than 2 consecutive applications before switching to an effective non-Group 40 fungicide. For resistance management, no more than 50% of the sprays should be Revus. Use the shorter interval and/or higher rates under high pressure or when conditions are conducive to disease. Revus may be tank mixed with another fungicide labeled for downy mildew that has a different mode of action. The addition of a spreading/penetrating type adjuvant such as a non-ionic based surfactant or blend is recommended.</td>

**Application:** For best results, use sufficient water volume to provide thorough coverage. Revus may be applied by ground, chemigation, or aerial application.

**Specific Use Restrictions:**
- Do not apply more than 24 fl oz of product/A/season (0.40 lbs. a.i./A/season).
- Do not apply within 7 days of harvest (7 day PHI).
