Dryacide® 100 is a grain storage insecticide designed to protect stored grains from a variety of pests. It consists of the skeletal remains of fresh water diatoms, specifically Diatomaceous Earth, which is an effective physical barrier against insects. The product is highly effective against pests such as Sawtoothed Grain Beetles, Rusty Grain Beetles, and Merchant Grain Beetles, as well as other insects, including Granary Weevils, Red Flour Beetles, Rice Weevils, and mold mites. It is particularly useful in controlling pests in stored grain, as it can be applied as a dust or slurry treatment.

**APPLICATIONS:**
- As a post harvest treatment to control insects in stored grains, treating only the top 2-3 feet of grain at the time of storage. A mechanical treatment prior to storage of grain is recommended for best results.
- As an alternative to treating the entire grain mass, treating only the top 2-3 feet of grain at the time of storage. A mechanical treatment prior to storage of peanuts.
- As a slurry treatment to empty bins, bulk grain storage areas, peanut, seeds, and feed.
- As a surface treatment in combination with the layer treatment technique described above. Indian Meal Moth populations can be controlled with a surface treatment alone.

**HOW TO USE:**
- **SURFACE TREATMENT:** As an alternative to treating the entire grain mass, treating only the top 2-3 feet of grain at the time of storage. A mechanical treatment prior to storage of grain.
- **LAYER TREATMENT:** For best results, use a surface treatment in combination with the layer treatment technique described above. Indian Meal Moth populations can be controlled with a surface treatment alone.

**LIMITED LIABILITY**
- The manufacturer and seller disclaim all warranties, expressed or implied, and assume no responsibility for personal injury or property damage resulting from the use of this product. The manufacturer and seller are not liable for any damages, whether direct or incidental, resulting from the use or misuse of this product. The user assumes all risk for personal injury or property damage resulting from the use of this product.

**INSTRUCTIONS FOR USE**
- Wear personal protective equipment, including a dust mask approved by NIOSH/MSHA, when applying Diatomaceous Earth. Immediately wash hands and other exposed areas thoroughly with soap and water if dust exposure occurs.

**FOR COMMERCIAL/AGRICULTURAL USE ONLY**
- EPA Reg. No. 69261-3-1381        EPA Est. No. 69261-OR-1

**IN CASE OF SPILL:**
- Dampen with water and sweep. Waste resulting from treatment should be disposed of as per applicable federal, state, and local regulations.

**DIRECTIONS FOR USE**
- Apply one to two pounds per ton of grain (28 to 56 gallons of finished spray per 1,000 sq. ft.). Apply evenly for thorough treatment.
- For best results, treat grains and seed immediately after harvest.

**NOTICE TO BUYER:**
- This product is intended for use in grain storage. It is not intended for use in retail food or animal feed.

**LABEL DISCLAIMER:**
