PRECAUTIONARY STATEMENTS

CAUTION Hazards to Humans and Domestic Animals

• Harmful if absorbed through skin. Harmful if swallowed.
• Avoid contact with skin, eyes, or clothing.
• Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.
• Remove and wash contaminated clothing before reuse.

FIRST AID +

NEOTYLCINOXIN Insecticide

IF SWALLOWED

• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a lot of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF INHALED

• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration.
• Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING

• Take off contaminated clothing.
• Wash skin immediately with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.

IF IN EYES

• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

NOTES: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may contact 877-229-3763 for emergency medical treatment information.

Active ingredients: 0.74% imidacloprid (EC 94-11860-41-18) and 0.33% chlorantraniliprole (CAS No: 213880-90-1)

ENVIRONMENTAL HAZARDS

• This pesticide is toxic to aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not apply where runoff is likely to occur.
• To protect the environment, do not allow pesticide to enter or run off into ditches, brooks, drainage ditches, gutters, or surface waters. Applying this product in calm weather when drift is not produced (or the next 24 hours will help) to ensure that wind or rain does not blow or wash pesticide off the treated area. Failing application equipment over the treated area will help avoid runoff to water bodies or drainage systems.
• This product is highly toxic if exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow to drift to blooming crops or weeds if bees are visiting the treated area.

NOTES: Research and testing have determined that the "Directions for Use" are appropriate for the proper use of this product under expected conditions. The Bayer to the extent consistent with applicable law, assumes responsibility for lack of performance or safety if not used according to the directions.

*Money Back Guarantee: If you are not satisfied with this product, we will gladly refund your original purchase price.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Before use, read and follow all label directions.

RESTRICTIONS:
- Do not apply near lakes, streams, rivers, or ponds.
- Do not apply to soils which are waterlogged or saturated.
- Bucket or measuring utensils should not be used for any food or drinking water purposes after use with this product.
- Do not apply when bees are actively foraging in the area.
- Children and pets may re-enter the treated area after it has dried.
- Do not apply this product, by any application method, to linden, basswood, or other Tilia species.

HOW TO USE

Determine the amount to use by measuring the distance around the tree trunk or height of the shrub. Pour the required amount of this product into a bucket of water and empty the bucket around the base of the tree/shrub.

FOR CONTAINERIZED PLANTS, determine container size and pour required amount of this product into enough water to wet the potting soil thoroughly but not causing loss of water from bottom of container.

FOR USE ON:
Outdoor ornamental trees, shrubs and containerized plants not intended to be used as edible food. This product is only for non-bearing fruit and nut trees. Non-bearing fruits and nuts are plants that do not bear edible fruits or nuts and for at least 12 months after application of pesticides.

CONTROLS:
- Apple rust
- Armored Scales (suppression)
- Boxelder Bugs
- Boxwood Leafminers
- Mealworms
- Pine Tip Moth Larvae
- Psyllids
- Royal Palm Bugs
- Scales (including mealybugs, soft scales, and red scale)
- Spider Mites
- White Grub (such as Japanese Beetles, Chafer, Oriental Beetle, Asian Garden Beetle)

HOW MUCH TO APPLY

Measure the distance in inches around the tree trunk at approximately 4.5 feet from ground level. This measurement is the amount of ounces of product to add to 1 gallon of water. Example: A tree measuring 8 inches around, pour 8 ounces of product into 1 gallon of water.

THINGS TO CONSIDER:
- Trees and Shrubs:
  - Fill a bucket or watering can with 1 gallon of water. For trees with circumference greater than 36", use 2 gallons of water.
  - Shake the bottle well.

- Containerized Plants:
  - Apply the solution evenly on top of the soil and water thoroughly. For the first 10 days, avoid flushing through the container to the point where it flows out the bottom. For indoor containerized plants, bring outdoors, make treatment, and return indoors when necessary.

DIRECTIONS FOR USE (cont'd)

TREES (cont'd)

If the tree measures greater than 50 inches around, pour the required product into 2 gallons of water. A flexible tape measure is the recommended method for measuring the distance around a tree.

TREES WITH 2 OR MORE TRUNKS

Measure the distance in inches around each tree trunk at approximately 4.5 feet from ground level, add together, and multiply by 7.5. This measurement is the number of ounces of product to add to one gallon of water.
Example: A tree has 4 trunks. They measure 10, 10, 5, and 5 inches or a total of 40 inches. 40 x 0.75 = 30 ounces, pour 30 ounces of product into one gallon of water. If 50 or more ounces of product are required, pour into 2 gallons of water.

SHRUBS

Measure the height of the shrub to the nearest foot. Multiply the number of feet by 3 - this is the number of ounces of product to add to 1 gallon of water.

CONTAINERIZED PLANTS

HOW MUCH TO APPLY (cont'd)

Pour the required product into sufficient water to wet the potting soil thoroughly. To help assure that roots absorb the insecticide, do not water too heavily for the first 10 days. Note: 3 teaspoons = 1 Tablespoon 2 Tablespoons = 1 fl oz.

Restrictions: Do not make more than one application per year. Regardless of formulation or type of application, DO NOT APPLY more than a total of 0.4 lbs. clothianidin per acre.

TREES:
- Fill a bucket or watering can with 1 gallon of water. For trees with circumference greater than 36", use 2 gallons of water.
- Shake the bottle well.
- Carefully measure required amount of product into bucket. Slowly pour the solution evenly around the tree. For best results, pour as close to the TRUNK/main stem of the tree/shrub as possible.
- Fill the bucket with clear water and pour it around the trunk as well.
- Containerized Plants:
  - Apply the solution evenly on top of the soil and water thoroughly. For the first 10 days, avoid flushing through the container to the point where it flows out the bottom.
  - For indoor containerized plants, bring outdoors, make treatment, and return indoors when necessary.
