- Indazole 0.17%
- Clotrine 0.07%

**OTHER INGREDIENTS**

- 30.78%
- TOTAL 100.00%

**GUARANTEED ANALYSIS**

- 6-6 Fertilizer

**DIRECTIONS FOR USE**

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**BEFORE YOU USE**

- Read and follow these directions when using:
  - Do not apply to bare soil, sawdust or dry peat moss.
  - Do not apply to plants grown for food.
  - Do not apply to plants grown in pots, flower boxes or other containers.
  - Do not apply to areas which are waterlogged or frozen.
  - Do not use mulching systems such as mulching cups and measuring systems used for feeding or watering purposes to measure this product.
  - Do not apply to grassed areas for outdoor residential use only.

**WHEN TO USE**

- Apply when pruning.
- For established plants, use any time after growth appears.
- Apply again every 6 weeks during the growing season.

**HOW MUCH TO USE**

- Fill measuring cap to top of inner circle for sale.
- 1/2 cupful per plant height
- 1 cupful per plant
- 1/2 cupful per foot of plant height
- 1 cupful per plant
- 1/2 cupful per plant
- 1/2 cupful per foot of plant height
- 1/2 cupful per foot of plant height

**HOW TO APPLY**

- Apply granules to soil around base of plant, sprinkling evenly over the area under the branches.

**HOW TO APPLY (cont'd)**

- Do not allow pets or people to enter the treated area until the product has been watered in and allowed to dry.

**DIRECTIONS FOR USE (cont'd)**

- 2. Work granules into top 1 to 2 inches of soil.
- 3. Water thoroughly after applying.

**FOR BEST RESULTS**

- Begin using this product in the spring when plants are actively growing.
- Reply every 6 weeks for a total of 6 applications per season. In areas where disease occurs frequently and the soil is sandy, the application interval may be shortened to 4 - 6 weeks for a total of 8 applications per year, except for flower beds, where you are limited to 3 applications.
- Ensure the product gets down into the rootzone by:
  - Plowing mix thoroughly into the soil to be treated.
  - Building a platform around individual plants.
  - Sprinkling granules evenly around the plant and water in thoroughly.
- Keep soil, flower and shrub beds clean. This lowers crop damage sites for diseases and insects. For additional cultural practices, consult your local Cooperative Extension Service.

**HOW IT WORKS**

- Water moves the product down into the root zone where it is taken up and moved into the plant. The entire plant, even new growth, is fed and protected against insects and diseases. Rain or watering cannot wash off this long-lasting systemic protection.
