Once-a-Month Topical Treatment for Fleas and Lice
On Dogs and Puppies 7 Weeks and Older and Weighing Over 55 lbs.

- Kills all flea life stages
- Prevents fleas on treated dogs from infesting your home
- Treats, prevents and controls lice infestations

Active Ingredient % by Weight
Imidacloprid........................................... 9.00%
Permethrin........................................... 0.46%
Other Ingredients .......................... 90.44%
Total ............................................. 100.00%

Net Contents: 6 Tubes, each 0.175 fl oz (4.0 mL)

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panel for First Aid, Directions for Use, and Storage and Disposal, see supplemental labeling inside.

FIRST AID
If on skin: Wash with plenty of soap and water. Go to Physician. Treat the patient symptomatically.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

HOW TO OPEN
1. Be careful not to cut close to the blister cantilevers, take scissors and cut off one section of the card containing a single tube.
2. Take the separated section, and cut into the blister cavity across the small side, close to the cap of the tube.
3. Peel off the foil, and take out the tube.
4. Repeat steps 1 to 3 for each tube.
5. Pull out the applicator tube in an upright position.
6. Twist cap off tube.
7. Turn the cap around and place other end of cap back on tube.
8. Twist cap to break seal, then remove cap from tube.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS:
Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and warm water after handling.

HAZARDS TO DOMESTIC ANIMALS:
For external use only. Do not use on puppies under seven weeks of age. As with any product, consult your veterinarian before using this product on debilitated, aged, pregnant or nursing animals. Individual sensitivities, while rare, may occur after using any pesticide product for pets. If signs persist, or become more severe, consult a veterinarian immediately. If your animal is on medication, consult your veterinarian before using this or any other product.

For consumer questions call 1-800-535-6316.
For medical emergencies call 1-800-442-9977.

6. The dog should be standing for easy application. Apply the entire contents of the tube every three or four spots on the top of the back from the shoulder to the base of the tail. At each spot, part the hair until the skin is visible. Place the tip of the tube on the skin and gently squeeze to expel a portion of the solution on the skin. Do not apply an excessive amount of solution at any one spot that could cause some of the solution to run off the side of the dog.

7. Do not get this product in your pet's eyes or mouth.
8. Discard empty tube as described in Storage and Disposal.

**CAUTION**
See below for First Aid and Precautionary Statements.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS:** Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and warm water after handling.

**HAZARDS TO DOMESTIC ANIMALS**
For external use only. Do not use on puppies under 7 weeks of age. As with any product, consult your veterinarian before using this product on debilitated, aged, pregnant or nursing animals. Individual sensitivities, while rare, may occur after using ANY pesticide product for pets. If signs persist, or become more severe, consult a veterinarian immediately. If your animal is on medication, consult your veterinarian before using this or any other product.

For consumer questions call 1-800-255-6826. For medical emergencies call 1-800-422-9874.

**FIRST AID**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

If swallowed: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin: Wash with plenty of soap and water.

To Physician: Treat the patient symptomatically.

**DIRECTIONS FOR USE**
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**HOW TO OPEN**
1. Being careful not to cut close to the blister cavities, take scissors and cut off one section of the card containing a single tube.
2. Take the separated section, and cut into the blister cavity across the small side, close to the cap of the tube.
3. Peel off the foil, and take out the tube.
4. Repeat steps 1 to 3 for each tube.

**HOW TO APPLY**
1. Use only on dogs. Do not use on other animals.
2. Remove one applicator tube from the package. See "HOW TO OPEN" section.
4. Turn the cap around and place other end of cap back on tube.
5. Twist cap to break seal, then remove cap from tube.

6. The dog should be standing for easy application. Apply the entire contents of the tube evenly to three or four spots on the top of the back from the shoulder to the base of the tail. At each spot, part the hair until the skin is visible. Place the tip of the tube on the skin and gently squeeze to expel a portion of the solution on the skin. Do not apply an excessive amount of solution at any one spot that could cause some of the solution to run off the side of the dog.

Do not get this product in your pet's eyes or mouth.
7. Discard empty tube as described in Storage
and Disposal.
8. Under normal conditions the product is
effective for a month. However, in case of
severe flea infestation, retreatment may be
necessary earlier than four weeks. Do not
re-treat more often than once every seven
(7) days. After flea control is obtained,
return to a monthly retreatment schedule.

ADDITIONAL INFORMATION
The successive feeding activity of fleas on
dogs frequently elicits a hypersensitivity skin
disorder known as flea allergy dermatitis
(FAD) or flea bite hypersensitivity. Treatment
of dogs with Advantage II rapidly kills fleas
within 12 hours which may reduce the
incidence of this condition.
Advantage II kills existing fleas on dogs within
12 hours. Reinfecting fleas are killed within
2 hours with protection against further flea
infestation lasting for four (4) weeks. Pre-
exisiting pupae in the environment may
continue to emerge for six (6) weeks or longer
depending upon the climatic conditions.
Fleas, flea eggs, and flea larvae in the dog's
environment are killed following contact with
an Advantage II treated pet. Advantage II
provides multi-stage flea control effectively
breaking all flea life-cycle stages for quick and
lasting control of flea populations.
Advantage II kills adult fleas quickly (within 12
hours), inhibits the development of immature
dog species and prevents them from
reaching the biting adult stage.
Advantage II kills chewing lice that infest dogs
and puppies, and prevents further
infestations.
Advantage II is waterproof and remains
effective following a shampoo treatment,
swimming or after exposure to rain or
sunlight.
Monthly treatments are required for optimal
care of dogs and prevention of fleas.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by
storage or disposal.
Pesticide Storage: Store in a cool, dry place.
Pesticide Disposal and Container Handling:
Nonrefillable container.
If empty: Do not reuse or refill this container.
Place in trash or offer for recycling if available.
If partly filled: Call your local solid waste
agency or 1-800-422-9184 for disposal
instructions. Never place unused product
down any indoor or outdoor drain.
