It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

METALWORKING FLUIDS: Biocide MC 68 MW microbicidc is recommended for the control of bacteria, fungi and microbial biofilms in soluble and emulsifiable-type aqueous metalworking fluids.

For the maintenance of a non-fouled system, use Biocide MC 68 MW microbicidc at 32 fluid ounce per 1000 gallon of emulsion (2 pound) every 4 weeks or 32-148 fluid ounces per 1000 gallon emulsion (2-10 pounds) every 8-12 weeks. This corresponds to 250-1,167 ppm Biocide MC 68 MW microbicidc (3.84-17.5 ppm active ingredient).

For a noticeably fouled system, use an initial dose of 64-148 fluid ounce per 1000 gallon emulsion (4-10 pound) to be followed by subsequent maintenance dosages depending upon the treatment interval noted above. This corresponds to 500-1,167 ppm Biocide MC 68 MW microbicidc (7.5-17.5 ppm active ingredient).

The preservative should be dispensed into the use-dilution of the metalworking fluid using a metering pump and uniformly dispersed throughout the system.

Biocide MC 68 MW microbicide weighs 8.4 pound/gallon
