RANCONA® Crest WR
SEED PROTECTANT

Active Ingredients: (% by weight)
- ipconazole (CAS No. 125225-28-7) ................................................................. 0.439%
- metalaxyl (CAS No. 57837-19-1) ................................................................. 0.585%
- imidacloprid (CAS No. 138261-41-3) ......................................................... 2.950%

Other Ingredients: .................................................................................... 96.026%

Total: ........................................................................................................ 100.000%

*Contains 0.0385 pounds ipconazole per gallon, or 4.61 grams per liter.
**Contains 0.0513 pounds metalaxyl per gallon, or 6.15 grams per liter.
***Contains 0.259 pounds imidacloprid per gallon, or 31 grams per liter.

KEEP OUT OF REACH OF CHILDREN
CAUTION

FIRST AID

IF SWALLOWED
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN: No specific antidote is available. Treat the patient symptomatically.

EMERGENCY ASSISTANCE: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove contaminated clothing and wash before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE):

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for Category C on an EPA chemical-resistance category selection chart.

Applicators and Other Handlers Must Wear: Long-sleeved shirt and long pants; chemical-resistant gloves (such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride (PVC) or Viton); and shoes plus socks.

When handlers use closed systems in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170-240 (d) (4)], the handler PPE may be reduced or modified as specified in the WPS. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions exist for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is highly toxic to birds and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Cover or incorporate spilled treated seeds. Do not contaminate water when disposing of equipment washwater or rinsewater or by disposal of wastes.

Groundwater Advisory: Metalaxyl is known to leach through soil into groundwater under certain conditions as a result of agricultural use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional office of the EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all label directions carefully before use.

Do not apply this product in a way that will contact workers or other persons. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval (REI). The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

After seeds have been planted, do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

Exception: Once the seeds are planted in soil, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area without restriction if there will be no worker contact with treated seed.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is coveralls; chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile rubber, or Viton; shoes plus socks and protective eyewear.
**USE INFORMATION**

RANCONA® Crest WR is a systemic and contact broad-spectrum fungicide plus systemic insecticide for seed treatment that protects against wireworms and a wide variety of diseases. RANCONA Crest WR is effective against the diseases Fusarium, Cochliobolus sativus, Pythium, smuts, bunt and leaf stripe. It is also effective against seed rot fungi such as Aspergillus and Penicillium.

RANCONA Crest WR provides suppression of wireworm activity on seed and young seedlings.

Do not use RANCONA Crest WR in combination with other seed treatment products unless compatibility has been verified. Read and follow carefully all label directions of each combination product. When using combinations of products, the most restrictive of label limitations and precautions must be followed.

**ALWAYS SHAKE OR STIR WELL BEFORE USE**

**SEED TREATMENT EQUIPMENT**

RANCONA Crest WR is formulated both for commercial and for on-farm application. **DO NOT** apply this product as a planter box or hopper box treatment. Apply RANCONA Crest WR with mechanical, slurry, or mist-type seed treating equipment, provided that the equipment can be calibrated to accurately and uniformly apply the product to seed. Uniform application to seed is necessary to ensure best disease and insect protection and optimum performance. For best activity of this product, seed must be sound and well-cured before treatment. Refer to the APPLICATION INSTRUCTIONS below for label rates.

In most cases, RANCONA Crest WR is ready to use and may be applied to seed as is; however, dilution with water may be appropriate for some types of treaters and/or when treating under dry and/or hot conditions, to achieve more uniform product to seed coverage. Mix RANCONA Crest WR and water thoroughly into a slurry prior to treating seed. Recalibrate treating equipment to compensate for the addition of water. The amount of dilution water that is most suitable depends on the seed, treater type and temperature. Contact your local Chemtura representative or supplier for specific recommendations.

*Use the higher rate when disease pressure is expected to be high, or when there is a history of high disease levels in the field.
USE RESTRICTIONS
Do not use treated seed for food, feed or oil purposes.
Care must be exercised in the handling of treated seed. Augers
used for handling treated seed should not be used to move seed
for feed, food or oil processing.
Do not re-use bags from treated seed to handle food or feed
products.
Wheat, Barley, Oats, Rye, Triticale: Do not graze or feed livestock
on treated areas for 45 days after planting.

TREATED SEED LABELING
The Federal Seed Act required that bags containing pesticides
treated seeds shall be labeled with the following statements:
This seed has been treated with imidacloprid, ipconazole and
metalaxyl. DO NOT use for feed, food or oil purposes. Store
away from food and feedstuffs. DO NOT allow children, pets,
or livestock to have access to treated seed. Wear long-sleeved
shirt, long pants and chemical resistant gloves when handling
treated seed.
User is responsible for ensuring that the seed bag meets all
requirements under the Federal Seed Act.
Treated seeds exposed on soil surface may be hazardous to
wildlife. Cover or collect treated seed spilled during loading.
Dispose of all excess treated seed. Leftover treated seed may
double sown around the headland or buried away from water
sources in accordance with local requirements. Do no con-
taminate water bodies when disposing of planting equipment
wash waters.
"Wheat, Barley, Oats, Rye, Triticale: Do not graze or feed live-
stock on treated areas for 45 days after planting."

ROTATIONAL PLANT-BACK INTERVALS
Treated areas may be replanted with any crop specified on this
product label, or any crop for which a tolerance exists for the
active ingredients, as soon as practical following the last ap-
lication. The following plant-back intervals must be observed
for listed crops:
Immediate Plant Back:
Artichoke; Barley; Brassica (cole) leafy vegetables; Canola; Cl-
lantro; Corn, Sweet; Corn, Field; Cotton; Cranberry; Cucurbitas;
eggplant; Leafy vegetables; Ground cherry; Leaf petiole vege-
tables; Legume vegetables (succulent or dried); Mustard Seed;
Oats; Okra; Pecan; Pepper; Popcorn; Potato; Rapeseed; Root
and Tuber Vegetables; Rye; Sorghum; Soybeans; Strawberry;
Sugarbeet; Tomato; Tomato; Triticale; Watercress; Wheat
30-Day Plant-Back: Buckwheat, Millet, Rice, Safflower
10-Month Plant-Back: Onion and bulb vegetables
12-Month Plant Back:
For all other crops not listed on this product label, or for crops
for which no tolerance for the active ingredients in this product
has been established, a 12-month plant-back interval must be
observed.
Cover crops for soil building or erosion control may be planted
any time, but do not graze or harvest for food or feed.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
Pesticide Storage: Store in original container only. After
partial use, replace lid and close tightly. Store in a secure place
that is temperate, dry and out of direct sunlight. Avoid excess
heat. Do not freeze. ALWAYS SHAKE OR STIR WELL BEFORE USE.
Pesticide Disposal
Wastes resulting from the use of this product may be disposed
of on site or at an approved waste disposal facility. Cover or
incorporate spilled treated seeds.
Equipment Cleaning: Following applications, all seed
treatment equipment should be thoroughly rinsed with
water. Do not contaminate water by disposal of equipment
washwater or rinsate.
Container Disposal: Nonrefillable container
Plastic Containers: Do not reuse or refill this container. Triple
rinse container (or equivalent) promptly after emptying.
Then offer container for recycling if available, reconditioning
if appropriate, or puncture and dispose of in a sanitary landfill,
by incineration, or if allowed by State and local authorities,
by burning. If burned, stay out of smoke.
Triple rinse as follows: For containers with capacity equal
to or less than 5 gallons: Empty the remaining contents
into application equipment or a mix tank and drain for 10
seconds after the flow begins to drip. Add water - at least
2% of the container volume, and up to 1/3 of the volume of
water needed to make the proper slurry composition, with a
maximum of 1/4 of the container volume - and recap. Shake
for 30 seconds. Pour rinsate into application equipment or
a mix tank or store rinsate for later use or disposal. Drain for
10 seconds after the flow begins to drip. Repeat this pro-
cedure two more times. If used in application equipment,
adjust the slurry volume application rate to account for any
added rinsate water.
For containers with capacities greater than 5 gallons: Triple rins
as follows: Empty the remaining contents into application
equipment or a mix tank. Add water - at least 2% of the con-
tainer volume, and up to 1/3 of the volume of water needed
to make the proper slurry composition, with a maximum of
1/4 of the container volume. Replace and tighten closures.
Tip container on its side and roll it back and forth, ensuring
at least one complete revolution, for 60 seconds. Stand the
container on its end and tip it back and forth several times.
Turn the container over on its other end and tip it back
and forth several times. Empty the rinsate into application
equipment or a mix tank or store rinsate for later use or
disposal. Repeat this procedure two more times. If used in
application equipment, adjust the slurry volume application
rate to account for any added rinsate water.
Refillable Container
Refill this container with pesticide only. Do not reuse this
container for any other purpose. Replacing the container
before disposal is the responsibility of the person
disposing of the container. Cleaning before refilling is the
responsibility of the refiller.
To clean the container before final disposal, empty the remaining contents into application equipment or mix tank. Add water - at least 2% of the container volume, up to 1/3 of the volume of water needed to make the proper slurry composition, with a maximum of up to 1/4 of the container volume. Replace and tighten closure. Agitate vigorously or recirculate the rinsate with a pump for at least 2 minutes, ensuring that the rinsate rinses the walls of the container. Empty the rinsate into application equipment or rinsate collection system, for later use or disposal. Repeat this procedure two more times. If used in application equipment, adjust the slurry volume application rate to account for any added rinsate water.

Recycling: Once cleaned, some agricultural plastic pesticide containers can be taken to a container collection site or picked up for recycling. To find the nearest site, contact your chemical dealer or manufacturer, or contact the Ag Container Recycling Council (ACRC) at 1-877-952-2272 (toll free) or www.acrecycle.org.

IMPORTANT NOTICE - Seller warrants that this product conforms to the chemical description and is reasonable fit for the purposes stated on the label only when used in accordance with the directions and instructions specified on the label under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product, contrary to label instructions, or under conditions not reasonably foreseeable to seller, and, to the extent consistent with applicable law, the buyer assumes the risk of any such use.

Treatment of highly mechanically damaged seed, or seed known to be of low vigor and poor quality, except for the purpose of curative control of existing disease pests, may result in reduced germination and/or reduction of seed and seedling vigor. Treat and conduct germination tests on a small test sample of seed before treating commercial quantities with a selected chemical treatment. Due to seed quality and seed storage conditions beyond the control of Chemtura, Chemtura makes no claims or guarantees as to germination of carry-over seed.
