DO NOT USE PLANT MATERIAL TREATED WITH DUPONT™ METHOD® 50SG FOR MULCH OR COMPOST

DuPont™ Method® 50SG herbicide

Dry Flowable
For Non-Crop Use

Active Ingredient
Aminocyclopyrachlor 6-Amino-5-chloro-2-cyclopropyl-4-pyrimidinecarboxylic acid
Other Ingredients

Other Ingredients

EPA Reg. No. 352-787
EPA Est. 352-IL-001

KEEP OUT OF REACH OF CHILDREN

CAUTION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Causes moderate eye irritation. Avoid contact with eyes or clothing.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Mixers and loaders must wear:
Long-sleeved shirt and long pants.
Shoes plus socks.
Applicators: After the product has been diluted in accordance with label directions for use, shirt, pants, socks, and shoes are sufficient Personal Protective Equipment (PPE). Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROL STATEMENT: When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

USERS SHOULD: Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin: Wash skin with cool water and soap. Change clothing. Get medical help.

If on clothing: Wash immediately and change clothing.

If inhaled: Get person fresh air. If not breathing, give artificial respiration. If in eyes, remove contact lenses. If irritation persists, get medical help.

If swallowed: If swallowed, do not induce vomiting. Give 1-2 cups of water or milk. Call a poison control center or doctor for treatment advice.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinses.

Surface Water Advisory: This product may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. This product is classified as having high potential for reaching surface water via runoff for several months after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of aminocyclopyrachlor from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

Ground Water Advisory: Aminocyclopyrachlor has properties and characteristics associated with chemicals detected in ground water. This chemical may leach into ground water if used in areas where soils are permeable, particularly where the water table is shallow.

See Directions for Use in accompanying labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: Store product in original container only. Store in a cool, dry place.

PESTICIDE DISPOSAL: Waste resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Refer to the Net Contents section of this product's labeling for the applicable "Refillable Container" or "Nonrefillable Container" designation.

Nonrefillable Paper or Plastic Bags, Fiber Sacks including Flexible Intermediate Bulk Containers (FIBC) or Fiber Drums With Liners: Nonrefillable container. Do not reuse or refill this container. Completely empty paper or plastic bag, fiber sack or drum liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application or manufacturing equipment. Then offer for recycling if available or dispose of empty paper or plastic bag, fiber sack or fiber drum and liner in a sanitary landfill, or by incineration. Do not burn, unless allowed by state and local ordinances.

Do not transport if this container is damaged or leaking. If the container is damaged, leaking or obsolete, or in the event of a major spill, fire or other emergency, contact DuPont at 1-800-441-3637, day or night.

STORAGE: Store in a cool, dry place.

DISPOSAL: Empty residue into application or manufacturing equipment. Then offer for recycling if available or dispose of empty paper or plastic bag, fiber sack or fiber drum and liner in a sanitary landfill, or by incineration. Do not burn, unless allowed by state and local ordinances.

Do not transport if this container is damaged or leaking. If the container is damaged, leaking or obsolete, or in the event of a major spill, fire or other emergency, contact DuPont at 1-800-441-3637, day or night.

**DuPont™ Method 50SG**

**broadsword herbicide**

**HERBICIDE USES**

- For non-selective weed and brush control in a variety of non-crop sites and unimproved grass turf.
- For weed control in established, unimproved grass turf.
- For weed control in established, unimproved grass turf.

**APPLICATION INFORMATION**

**AERIAL APPLICATIONS**

- When applying by air, apply only using nozzles which will deliver greater than 100 gallons (380 liters) per acre.
- Use an air-delivery system that delivers greater than 100 gallons (380 liters) per acre with a spray boom no greater than 60 feet (18 meters).

**GROUND APPLICATIONS**

- When applying by ground, apply only using nozzles which will deliver greater than 100 gallons (380 liters) per acre.
- Use a spray boom no greater than 60 feet (18 meters).

**LOW VOLUME FOLIAR APPLICATIONS**

- High volume ground applications may be applied at rates equivalent to broad-coverage treatments, but the total volume applied may be greater than the maximum indicated for the product.

**SPOT APPLICATIONS**

- Spot applications are generally used to treat specific areas or plants, rather than for broad-coverage treatments.

**USER SAFETY RECOMMENDATIONS**

**WEARING PROTECTIVE CLOTHING**

- Wear protective clothing and wash any exposed skin before eating, drinking, or using restroom.
- Turn off engine and do not refuel vehicle or equipment near spilled material until clean up is completed.

**STORAGE AND DISPOSAL**

- Store in a cool, dry place.
- Do not incinerate.

**Tables and Figures**

- **Table 1** presents the use rates and mixing guidelines for DuPont™ Method 50SG.
- **Table 2** lists the spot spray use rates for the product.

---

**Additional Information**

- For more detailed information, refer to the product label or contact the manufacturer.
- Ensure proper mixing and application techniques are followed to achieve effective weed control.
- Always follow the label instructions and safety precautions provided by the manufacturer.
INVERT EMULSION APPLICATIONS
METHOD® 50SG is labeled for use as an invert emulsion (water-in-oil) in the control of broadleaf weeds and brush listed in the application guide. It may be applied in the presence of susceptible broadleaf weeds such as white clover, dandelion, and clover, or bermudagrass, bahiagrass, and johnsongrass. Do not apply when the soil is frozen or covered by standing water or snow.

**SPECIFIC USE DIRECTIONS**

**BAREGROUND**

For the prevention of re-sprouting, after hand cutting or mechanical mowing of broadleaf weeds and brush listed in the application guide. The addition of a penetrating agent at 5% V/V or more can soon after cutting. The addition of a penetrating agent at 5% V/V or more can delay green-up. Apply METHOD® 50SG by ground equipment only. Use a minimum of 8 gallons of water per acre. The addition of an MSO adjuvant may increase the potential for burn down, results, and ground wetting. For improbable applications always check local regulations. Do not apply with microSpray or microSpray products. Do not apply with any methylated silicone products or wetting agents.

**NON-CROPLAND RESTORATION**

METHOD® 50SG is labeled for the control of broadleaf weeds and brush listed in the application guide. It may be applied in the presence of susceptible broadleaf weeds such as white clover, dandelion, and clover, or bermudagrass, bahiagrass, and johnsongrass. Do not apply when the soil is frozen or covered by standing water or snow.

**WEEDS CONTROLLED**

METHOD® 50SG is labeled for the control of broadleaf weeds and brush listed in the application guide. It may be applied in the presence of susceptible broadleaf weeds such as white clover, dandelion, and clover, or bermudagrass, bahiagrass, and johnsongrass. Do not apply when the soil is frozen or covered by standing water or snow.

**AERIAL APPLICATIONS**

Nozzle Type - Solid stream nozzles (such as disc and core with swirl or slit air aspirator). For M ETHO D® 50SG, use a narrow spray pattern with a high flow rate to apply the highest practical flow rate. For M ETHO D® 50SG, use a narrow spray pattern with a high flow rate to apply the highest practical flow rate. For M ETHO D® 50SG, use a narrow spray pattern with a high flow rate to apply the highest practical flow rate.

**GROUND APPLICATIONS**

Nozzle Type - Solid stream nozzles (such as disc and core with swirl or slit air aspirator). For M ETHO D® 50SG, use a narrow spray pattern with a high flow rate to apply the highest practical flow rate. For M ETHO D® 50SG, use a narrow spray pattern with a high flow rate to apply the highest practical flow rate. For M ETHO D® 50SG, use a narrow spray pattern with a high flow rate to apply the highest practical flow rate.
