**KEEP OUT OF REACH OF CHILDREN**

Caution: Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

**PRECAUTIONARY STATEMENTS**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Causes moderate eye irritation. Avoid contact with eyes or clothing.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Mixers and loaders must wear:

- Long-sleeved shirt and long pants.
- Shoes plus socks.

Applicators: After the product has been diluted in accordance with label directions for use, shirt, pants, and shoes are sufficient Personal Protective Equipment (PPE).

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Control Statement: When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

**USER SAFETY RECOMMENDATIONS**

USERS SHOULD:

- Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-441-3637 for emergency medical treatment information.

**ENVIRONMENTAL HAZARDS**

Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

**STORAGE AND DISPOSAL**

Do not transport if this container is damaged or leaking. If the container is damaged, leaking or obsolete, or in the event of a major spill, fire or other emergency, contact DuPont at 1-800-441-3637, day or night.

**CONSUMER INFORMATION**

Precautionary Statements: Divergente precautions and/or restrictions are indicated by Pictograms, Signal Words, and Statement of Danger.
DuPont Method® 50SG Herbicide

**IMPORTANT RESTRICTIONS**
- Do not apply this product in areas where the roots of desirable trees and vegetation are present under or near root zone exposure to desirable trees or vegetation. Root zone areas of desirable trees or vegetation are expected by local laws and/or regulations to be treated with a spray on or near these trees where the treated soil may be washed out by irrigation. The presence of undesirable trees or vegetation may result in injury to crops or other desirable vegetation. Do not spray applications and shut off spray to the spray boom while starting or stopping. Do not apply with drift control additives. You may apply drift control additives to the spray solution.
- Use spray nozzles and pressure that will aid the proper development of spray droplets. Do not use nozzles that will produce spray droplets larger than 400 microns in diameter. High volume applications may be applied at rates equivalent to broad-spectrum ground equipment. For best results, use shielded-impingement nozzle tips; use drift control additives; use shielded-gear, or other drift control systems; and/or use wind velocity.

**APPLICATION INFORMATION AERIAL APPLICATIONS**
When applying by air, apply only nozzles which will deliver the required ground impact rate. Manufacturers of aircraft must be able to advise you of the correct nozzles to use. DuPont Method® 50SG may be applied by either fixed wing or helicopter spray equipment. Fixed wing aircraft and helicopters can be used for aerial applications of DuPont Method® 50SG. Fixed wing aircraft are permitted to treat fabricoid non-crop sites and other non-crop sites where the treated surface is not subject to water erosion. Do not use a spray boom or nozzle height as low as possible; apply a nozzle height no greater than 4 feet above the nozzle or canopy unless necessary to achieve the recommended ground equipment. Apply with the spray boom or nozzle height at maximum. Do not apply during temperature inversion.

**USER SAFETY RECOMMENDATIONS**
USERS SHOULD: Wash thoroughly with soap and water after handling and before eating, drinking, or smoking. Avoid contact with eyes or clothing. Do not use soaps, detergents, or household cleaners that contain ammonia for washing or cleaning purposes. When using a sprayer, clean the sprayer immediately if it gets inside. Then wash thoroughly and put on clean clothing.

**FIRST AID**
If in eyes: Hold eye open with fingers and flush with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue flushing. Call a poison control center or doctor for treatment advice.
If swallowed: Call a poison control center or doctor for treatment advice. The container product label should be available when calling a poison control center or doctor, or for treatment. You may also contact: 1-800-441-3637

**ENVIRONMENTAL HAZARDS**
- Do not apply directly to water or to areas where surface water is present, or to areas below the ditch bank or side slope. Do not contaminate irrigation equipment or surface water when disposing of equipment washwater or rinsewater.
- This product may impact surface water quality due to runoff of the treated area. Do not apply this product on conservation tillage fields, soils with shallow water, or with shallow water. This product is classified as having high potential for maximizing sur- face runoff. This product should not be applied to fields that are designed to maximize surface runoff or to 

**PRODUCT INFORMATION**
DuPont Method® 50SG herbicide is a soluble granule that is mixed in water and applied as a suspension. DuPont Method® 50SG herbicide may be applied by aerial or ground equipment for control of broadleaf weeds and woody species. DuPont Method® 50SG herbicide is registered for general weed and brush control on private and public lands; as follows: uncultivated agricultural areas (such as airports, highways, railroad and utility rights-of-way, sewage disposal areas, etc.); uncultivated agricultural areas - non-crop production (such as vineyards, orchards, nurseries, farms), feedlots, ditches, banks, criss, etc.; industrial sites - outdoor (such as bluffs, terraces, and landfills); and non-agricultural areas - non-crop production (such as community gardens, recreation areas, wildlife management areas, wildlife openings, wildlife habitats). DuPont Method® 50SG may be used in the control of native perennial grasses and in established turf grasses. This product is also recommended for use in the control of broadleaf weeds and woody species on roadsides, fence rows, non-irrigation ditch banks, tree rights-of-way, non-irrigation ditches, canals including their outer banks. It is also recommended for use on roadsides, fence rows, non-irrigation ditch banks, tree rights-of-way, non-irrigation ditches, canals including their outer banks.

**APPLICATION INFORMATION AERIAL APPLICATIONS**
When applying by air, apply only nozzles which will deliver the required ground impact rate. For aerial applications, apply with a "Microfoil" or "Thru-Valve" boom, or use an equivalent high volume equipment system. Do not apply DuPont Method® 50SG with air under the conditions expected for air application and/or if you have no spare equipment and/or if you have no system for system, or if you have no system for continuous additive system. Do not apply DuPont Method® 50SG with air under the conditions expected for air application and/or if you have no spare equipment and/or if you have no system for system, or if you have no system for continuous additive system.

**APPLICATION INFORMATION GROUND APPLICATIONS**
When applying by ground, apply only nozzles which will deliver the required ground impact rate. The broadcast application of DuPont Method® 50SG should be applied in a manner so as not to over spray the intended rotational crop. You may apply DuPont Method® 50SG at the rate of 0.3 to 2.0 gallons per acre (1.3 to 8.0 liters per hectare) using flat-fan or hollow cone nozzles. You may apply DuPont Method® 50SG at the rate of 0.3 to 2.0 gallons per acre (1.3 to 8.0 liters per hectare) using flat-fan or hollow cone nozzles. You may apply DuPont Method® 50SG at the rate of 0.3 to 2.0 gallons per acre (1.3 to 8.0 liters per hectare) using flat-fan or hollow cone nozzles. You may apply DuPont Method® 50SG at the rate of 0.3 to 2.0 gallons per acre (1.3 to 8.0 liters per hectare) using flat-fan or hollow cone nozzles.

You may apply DuPont Method® 50SG at the rate of 0.3 to 2.0 gallons per acre (1.3 to 8.0 liters per hectare) using flat-fan or hollow cone nozzles.
SPRAY EQUIPMENT

Be sure the sprayer is calibrated before use. Use a sufficient volume of water to uniformly distribute the herbicide over the target brush or weeds. The sprayer should be equipped with an agitation system to help keep METHOD® 50SG® suspended in the spray tank.

• 1. Fill the tank 1/3 to 1/2 full of water.
• 2. Add the correct amount of METHOD® 50SG®.
• 3. Continue agitation until the METHOD® 50SG® is fully dispersed, at least 10 minutes.
• 4. Once the METHOD® 50SG® is fully dispersed, maintain agitation and continue to operate the equipment. Toss any solution that gets spotty mixed with water before adding any other material.
• 5. If a tank is mixed, add a mixture of products desired, if desired, the necessary volume of spray adjuvant. Always add spray adjuvants after the Method 50SG.
• 6. If the mixture is not continuously agitated, settling will occur. If set -
ing happens, re-agitate the spray tank before use.
• 7. Apply METHOD® 50SG® spray mixture within 24 hours of mixing to avoid product degradation.

SPRAY CLEANER

The container must be cleaned before METHOD® 50SG® is sprayed. Follow the cleanup procedures specified on the labels of the previously approved products.

AT THE END OF THE DAY

It is important to follow proper periods when multiple loads of METHOD® 50SG® herbicide are applied. At the end of each day of spraying the interior of the container, the rinseate from the cleaning, set- ting, dropping, or twisted lines may occur. Do not apply METHOD® 50SG® to grasses under stress or other environmental conditions.

• 1. Empty the container and drain the contents completely.
• 2. Clean the container by hand or by using an agitator. Method 50SG may not be completely removed from the container. The necessary procedure should be followed.

Notes:

1. Always start with a clean spray tank.
2. Steam-cleaning airless spray tanks is recommended for the Method 50SG. After the tank is rinsed. The tank must be rinsed with clean water.
• 3. METHOD® 50SG® is tank mixed with other pesticides, all the properties of the pesticide should be examined and the most rigorous procedure should be followed.

In addition to this cleaning procedure, all pre-clean guidelines on the labels of other products should be followed as per the individual labels.

In the cleaning of the container, METHOD® 50SG® can kill or severely injure most crops. Following a METHOD® 50SG® application, the use of spray equipment, nozzles, and tips that have been used with other pesticides should not be used on crops sensitive to any of these pesticides.

CONTROLLING DROPLET SIZE

DROPLET SIZE AND ENVIRONMENTAL CONDITIONS

Volume - Use high flow rate nozzles to apply the highest practical volume. Nozzles with higher flow rates produce larger droplets. The droplet size is determined by the nozzle, the speed of application, and the height of the boom. The droplet size is determined by the nozzle, the speed of application, and the height of the boom. The droplet size is determined by the nozzle, the speed of application, and the height of the boom. Larger droplets reduce DROPLET SIZE AND ENVIRONMENTAL CONDITIONS
