**Fenvastar EcoCap**

**ACTIVE INGREDIENT:**
Cypermethrin (CAS 496230-04-4) 3.5% 
OTHER INGREDIENTS 96.5%

**TOTAL** 100.0%

Contains 0.3 lbs active ingredients per gallon

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

See additional precautionary statements and directions for use inside this booklet.

**FIRST AID**

**IF SWALLOWED:**
- Call a poison control center or doctor immediately for treatment advice.
- Give 1-2 teaspoons of water to drink if able to swallow.
- Do not induce vomiting unless told to by a poison control center or doctor.
- Do not give anything if unconscious.

**IF IN EYES:**
- Hold open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

**NOTE TO PHYSICIAN:** Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For information regarding medical emergencies or pesticide incident, call 1-800-926-9372.

**Formula for determining the active ingredient content at the finished spray mixture:**

The following formula may be used to determine the percent active ingredient that is in the sprayer tank after mixing Fenwaster EcoCap.

\[ \text{Percent Active Ingredient of Spray Mix} = \frac{\text{Gallons of finished spray mix} \times \text{X} \times \text{Percent Active Ingredient of Spray Mix}}{\text{Tank Mixing}}

**Tank Mixing:**

- **Fenwaster EcoCap** may be tank mixed with an insect growth regulator such as NuGuard® IGR Concentrate or persimmon containing products or any other currently registered pesticides unless expressly prohibited by the product label. The resulting tank mix may be applied in areas where these products are allowed to be sprayed. Do not tank mix Fenwaster EcoCap with products containing dichlorvos (DCAV).

**Crawling Insects Pest Indicators:**

- Apply as a coarse, wet spray to surfaces where pests are normally found. Treat floors, baseboards, around doors and windows. In attics, crawlspaces, eaves, corners, closets, walls, utility pipes, areas behind pipes, and in all places where these insects shelter. Contact as many insects as possible with direct spray. Repeat applications as needed, but do not exceed more than one (1) application every seven (7) days.

**For Ant Control Indications:**

- Apply to trails, around garage receptacles, and near food sources. Also apply around doors and windows and other places where these pests may find entrance to the structure. Remove sources of food through basic hygiene practices whenever possible.

**Flying Insect Pest Indicators:**

- Treat insect resting areas such as walls and ceilings, screens, around windows, doors, and light fixtures, and other surfaces that attract flying insects. Initiate treatments at the beginning of the fly season, and repeat treatments during periods of heavy infestation.

Stinging Insect Pest Indications:

**Application to nests late in the evening when stinging insects are at rest.** Thoroughly spray nest, nest entrance, and surrounding areas where insects land or wander. Treat around doors and windows, in attics, crawl spaces, and possible harborage sites or entry points for feeders.

- **For Control of Brown Dog Tick:** Thoroughly apply as a spot treatment to infested areas such as pet beds and resting areas, nearby cracks and crevices, along and behind baseboards, windows and door frames, and localized areas of floor and wall coverings where these pests may be present. DO NOT SPRAY PETS WITH THIS PRODUCT. Treat dogs and cats with a product registered for use on animals.

- **For Control of Fleas:** Thoroughly apply as a fine particle broadcast spray to infested logs, carpets, and pet resting areas. Prior to treatment, all pets should be covered, and pet animals should be removed from the area being treated. Do not permit human or pets to contact treated surfaces until spray has dried. Do not pet bedding should be removed and replaced with clean, fresh bedding after treatment. DO NOT SPRAY PETS WITH THIS PRODUCT. Treat dogs and cats with a product registered for use on animals.

For Control of Stored Product Pests:

Spray thoroughly around and into floor drains, non-food conveyors, benches, pipes, pallets, moist areas, storage racks, piles of equipment, and other areas where stored product pests may be found. Tank-mix or sequential use of an insect growth regulator such as NuGuard® IGR Concentrate, is recommended to break the insect reproduction cycle. Do not apply this spray to surfaces or exteriors that may come in contact with food, since excessive residues in food may result.

**To Treat Void in Equivariant and Structures:**

- To kill insects harboring in voids and other inaccessible spaces in equipment and structures, use injection equipment designed for deep void applications. Follow the injection equipment manufacturer’s recommendations for proper set up and air pressures. Place the applicator tip or jet into the void space to be treated. For inaccessible voids, it may be necessary to drill and access hole(s). Inject product into the void space in short bursts, allowing air pressure to push insecticide deep into the space. Avoid applying to the point of runoff or drip. Ventilate area thoroughly before re-entry. Do not apply more than every fourteen (14) days.

To Kill the Accessible Stages of Listed Insecticides:

Use this concentrate to treat grain storage facilities in areas that do not contain grain for stored product pest control. For control of exposed adult and immature stages of stored product pests, apply to cracks, crevices, and other surfaces that are not exposed to grain where the pests have been seen or have harborage. Apply to the areas listed above, using one gallon of spray mix per 1,000 square feet of surface area to be treated. Cleaning all areas prior to use will lower levels of control. Any foodstuffs infested with pests should be removed and destroyed. Do not apply when food-processing operations are occurring.
RESIDENTIAL COMMERCIAL USE HODDER:
Application within residential and non-residential buildings including homes, apartment buildings, kennels, and non-food areas of institutional, commercial buildings, such as hospitals, hotels, warehouses, truck trailers, railroad cars, theaters, offices, buildings, and schools.
Apply as a coarse wet spray to thoroughly treat holding places, such as cracks, crevices, and non-food areas around pipes, under refrigerators, and along baseboards to control pests listed below. Spray directly on insects when possible. Do not permit humans or pets to contact treated surfaces until the spray has dried. Repeat as necessary. Do not treat establishments where livestock feed is present. In the home, cover exposed food and do not allow spray to contact food surfaces. If spray does contact these surfaces, clean surfaces with soap and water.

MIXING INSTRUCTIONS:
Fenvistar EcoCap should be mixed with water and applied with hand pressed or power-operated sprayers. Shake well of Fenvistar EcoCap before diluting. Clean spray equipment before use. For dilution, add approximately the half the required water to the spray tank and then add the appropriate amount of Fenvistar EcoCap. Agitate and slowly add the remaining water. Agitate spray thoroughly before using and also occasionally during use to ensure dispersion. If spray filter screens are used, they should be 50 mesh or larger. Use 1.0 fluid ounces (30 cc.) of Fenvistar EcoCap in 1 gallon of water to make a spray mix containing 0.05% active ingredient. Use 2.0 fluid ounces (60 cc.) per gallon of water to make a spray mix containing 0.1% active ingredient. Use 0.025% solution for light infestations or as a maintenance control rate. Use 0.05% for heavy infestations or as an initial clean out rate. Apply two-second bursts of spray per square foot of area being treated. Avoid excessive application. Damper surfaces or not to the point of saturation or run-off. Only dilute Fenvistar EcoCap with water.

Formula for determining the active ingredient content of the finished spray mixture: The following formula may be used to determine the percent active ingredient that is in the spray tank after mixing Fenvistar EcoCap:

\[(\text{Gallons of finished spray mix} \times \text{128}) / \text{Percent Active Ingredient of Spray Mix} = \text{Volume of Fenvistar EcoCap added to tank}.\]

For Control of Fleas:
Thoroughly apply as a fine particle broadcast spray to infested rugs, carpets, and past resting areas. Prior to treatment, aquariums and fish bowls should not be treated, and pet animals should be removed from the area being treated. Do not use near pets or pets who have contact with treated surfaces until spray has dried. Old pot bedding should be removed and replaced with fresh, clean bedding after treatment. DO NOT SPRAY PETS WITH THIS PRODUCT. Treat dogs and cats with a product registered for use on animals.

Control of Bedbugs:
Thoroughly clean and sanitize mattresses and box springs. Treat mattresses and box springs with an approved pesticide, such as a pyrethroid aerosol. Apply Fenvistar EcoCap as a spot treatment to potential harborage sites and migration paths, cracks and crevices, around baseboards, doorframes, headboards, and walls.

Control of Stored Product Pests:
Spray thoroughly around and into floor drains, non-food conveyors, bench, pipes, palettes, moist areas, storage tanks, pieces of equipment, and other areas where stored product pests may be found. Tank-mix or sequential use of an insect growth regulator, such as Neudar® INGR Concentrate, is recommended to break the insect reproduction cycle. Do not apply this spray to surfaces or utensils that may come in contact with food, since excessive residues in food may result.

For Control of Ants, Termites, and other Insects:
Apply to ant trails, around garbage receptacles, and near food sources. Also apply around doors and windows and wherever these pests may find entrance to the structure. Remove sources of food through basic hygiene practices whenever possible.

For Control of Fleas:
Thoroughly apply as a fine particle broadcast spray to infested rugs, carpets, and past resting areas. Prior to treatment, aquariums and fish bowls should not be treated, and pet animals should be removed from the area being treated. Do not use near pets or pets who have contact with treated surfaces until spray has dried. Old pot bedding should be removed and replaced with fresh, clean bedding after treatment. DO NOT SPRAY PETS WITH THIS PRODUCT. Treat dogs and cats with a product registered for use on animals.

For Control of Ants, Termites, and other Insects:
Apply to ant trails, around garbage receptacles, and near food sources. Also apply around doors and windows and wherever these pests may find entrance to the structure. Remove sources of food through basic hygiene practices whenever possible.
have harborage. Apply at the rates listed above, using one gallon of spray mix per 1,000 square feet of surface area to be treated. Cleaning all areas prior to use will increase levels of control. Any feedstuffs intended for pets should be removed and destroyed. Do not apply when feed-processing facility is in operation or boots are exposed. Do not apply this spray to surfaces or utensils that may come into contact with food.

Repeat application as needed but DO NOT exceed more than one application every 2 weeks.

USE IN AND AROUND LIVESTOCK HOUSING: For use in and around unoccupied areas of livestock facilities, such as: Barns, Cow and Calf Pens & Hutches, Dairy Barns & Milk Rooms, Hog Barns, Horse Barns, Sheep Barn, Poultry Houses, and Rabbit Hutches. Do not contaminate milk, food, or drinking water. Remove animals from area being treated. Cover feeders and waterers. Do not apply or allow insects to drift onto animals. Do not allow animals to enter treated areas until spray solution has dried.

MIXING INSTRUCTIONS: Fenwisk Ecowash 80 should be mixed with water and applied with hand pressurized or power operated sprayers. Shake container of Fenwisk Ecowash 80 before diluting. Clean spray equipment before diluting. For dilution, add approximately half of the required water to a spray tank and then add the appropriate amount of Fenwisk Ecowash 80. Agitate and slowly add the remaining water. Spray spray thoroughly before using and also occasionally during use to ensure dispersion. If spray filter screens are used, they should be 50 mesh or larger. Use 1.0 fluid ounce (30 cc) of Fenwisk Ecowash 80 in 1 gallon of water to make a spray mix containing 0.025% active ingredient.

Flying Insect Pests in Livestock and Poultry Premises:
For residual control of flying insects, treat insect nesting areas such as walls, ceilings, screens, around windows, doors, light fixtures, and other surfaces that attract flying insects. Insecticide treatments at the beginning of fly season and repeat treatments during periods of heavy infestation.

OUTDOOR USE:
Do not spray in or near fishponds or other bodies of water.
Not for use on plants being grown for sale or other commercial use. Not for use in nurseries, or all turf types such as golf course, lawns, and lawns and on sod farms.

MIXING INSTRUCTIONS: Fenwisk Ecowash 80 should be mixed with water and applied with hand pressurized or power operated sprayers. Shake container of Fenwisk Ecowash 80 before diluting. Clean spray equipment before use. For dilution, add approximately half of the required water to a spray tank and then add the appropriate amount of Fenwisk Ecowash 80. Agitate and slowly add the remaining water. Spray spray thoroughly before using and also occasionally during use to ensure dispersion. If spray filter screens are used, they should be 50 mesh or larger. Use 1.0 fluid ounce (30 cc) of Fenwisk Ecowash 80 in 1 gallon of water to make a spray mix containing 0.025% active ingredient. Use 2.0 fluid ounces (60 cc) per gallon of water to make a spray containing 0.05% active ingredient.

</tbody>
</table>

Apply with sufficient water to adequately cover the area being treated, but do not allow dripping or run-off to occur. Alternate mixing directions are to use 4 to 8 fluid ounces of concentrate per 50 gallons of water.

For yellow jackets, combine broadcast application with mound treatments to control foraging workers and newly mated flying queens. Apply Fenwakter EcoCap as a broadcast application at a rate of 16 oz. of concentrate per 1,000 square feet. Treat mounds with a registered and mound-targeted treatment.

To control chinch bugs, use a broadcast application of Fenwakter EcoCap at a rate of 1 oz. of concentrate per 1,000 square feet. Treat plants with a registered and mound-targeted treatment.

Every seven (7) days, apply the recommended rate of Fenwakter EcoCap to the targeted area. Do not allow the treated area to come into contact with any plants or objects that may come into contact with the treated area. Apply the recommended rate of Fenwakter EcoCap to the targeted area every seven (7) days. If necessary, repeat the treatment as necessary until the desired results are achieved.
STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in a warm, dry area. Always store pesticides in the original container. Store away from food and pet food.

PESTICIDE DISPOSAL: To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. In case of spill or leak, clean up with sand, earth or synthetic absorbents. Do not use alkaline absorbents or clean area of spill with alkaline detergents.

PESTICIDE DISPOSAL AND CONTAINER HANDLING (RESIDENTIAL USE): Nonrefillable container. Do not reuse or refill this container. If empty, place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. If empty, place in trash or offer for recycling if available, or puncture and dispose of in a sanitary landfill.

STORAGE AND DISPOSAL (continued)
Triple Rinse as follows (for containers of 5 Gallons (19 L) or less): Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¾ full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Triple Rinse as follows (for containers greater than 5 Gallons (19 L)): Empty the remaining contents into application equipment or a mix tank. Fill the container ¾ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinse into application equipment or a mix tank or store rinse for later use or disposal. Repeat this procedure two more times.

Conditions of Sale and Limitation of Warranty and Liability
NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying and using this product. If the terms are not acceptable, return this product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of LG International (America) Inc. or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold LG International (America) Inc. and Seller harmless for any claims relating to such factors.

LG International (America) Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or LG International (America) Inc. and Buyer and User assume the risk of any such use. To the extent permitted by law, LG International (America) Inc. MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

To the fullest extent permitted by law, LG International (America) Inc. or Seller shall not be liable for any incidental, consequential or special damages resulting from the use or nonuse of this product. TO THE EXTENT PERMITTED BY LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF LG INTERNATIONAL (AMERICA) INC. AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF LG INTERNATIONAL (AMERICA) INC. OR SELLER, THE REPLACEMENT OF THE PRODUCT.

LG International (America) Inc. and Seller offer this product, and Buyer and User accept it, subject to the foregoing conditions of sale and limitations of warranty of liability, which may not be modified except by written agreement signed by a duly authorized representative of LG International (America) Inc.
