ALGAECIDE 60

Active Ingredient:
Polyoxymethylene(dimethylimino)ethylene
(dimethylimino)ethylene dichloride ...........60.0%
Inert ingredients: .....................................40.0%
Total ....................................................100.0%

This product contains 5.75 lb. of active ingredient per gallon and weighs 9.6 lb. per gallon.

FIRST AID

IF IN EYES
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED
Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a poison control center or doctor for further treatment advice.

IF ON SKIN OF CLOTHING
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor for treatment.

NOTE TO PHYSICIAN: Probable musculoskeletal damage may contraindicate the use of gastric lavage.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Algaecide 60 is used to control the growth of algae in swimming pools, exterior spas, whirlpools, hot tubs, decorative fountains, and ponds that do not contain fish.

For maximum effectiveness, pools, spas, whirlpools, hot tubs, decorative fountains, and ponds containing heavy growth of algae should be shocked and cleaned prior to using Algaecide 60.

For pools having just visible algae growth, add an initial dose of 1 to 2 fluid ounces of Algaecide 60 per 10,000 gallons of water. For treatment of freshly cleared and filled pools add initially 6 to 10 fluid ounces of Algaecide 60 per 10,000 gallons of water. Subsequent additions of 0.2 to 0.4 fluid ounces of Algaecide 60 per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

For pools having just visible algae growth and ponds having just visible algae growth, use an initial dose of 1 to 2 fluid ounces of Algaecide 60 per 1,000 gallons of water. For treatment of freshly cleared and filled spas, whirlpools, hot tubs, decorative fountains, and ponds having just visible algae growth, use an initial dose of 0.2 to 0.4 fluid ounces of Algaecide 60 per 1,000 gallons of water. For treatment of freshly cleared and filled spas, whirlpools, hot tubs, decorative fountains, and ponds having just visible algae growth, use an initial dose of 1 to 2 fluid ounces of Algaecide 60 per 10,000 gallons of water. Subsequent additions of 0.2 to 0.4 fluid ounces of Algaecide 60 per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Algaecide 60 will prevent growth of most algae during the off-season winter months when pools are not in use. For pools which have been properly treated during the swimming season and are free of visible algae, add 6 to 10 fluid ounces of Algaecide 60 per 10,000 gallons of water. For pools which have been properly treated during the swimming season and are free of visible algae, add 6 to 10 fluid ounces of Algaecide 60 per 10,000 gallons of water. It is necessary that a uniform distribution of algaecide throughout the water and the pool be made for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the season.

Algaecide 60 is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. Algaecide 60 can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Algaecide 60 with concentrated dry or liquid chlorine products.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. STORAGE: Keep container closed when not in use. Leaking or damaged containers should be placed in a plastic bag and discarded in trash. Mop up spills with clear water. All pesticides should be kept out of reach of children and stored away from food.

HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.
