CHLORINATING STICKS

Slow Dissolving For Lasting Protection Against Organic Contaminants.

Active Ingredient:
Trichloro-S-triazinetrione ............. 50%  
Other Ingredients: .......................... 1%  
Total ........................................ 100%  
Available Chlorine ..................... 90%

Net Wt. 25 lbs.

KEEP OUT OF REACH OF CHILDREN
DANGER
SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS AND FIRST AID.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or other emergency service and then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Call poison control center, or doctor. Immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

You may also contact 1-888-402-9236 for emergency medical treatment information.

NOTE TO PHYSICIAN: Prone to mucosal damage may complicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible DEATH AND DAMAGE. DO NOT BREATHE FOG OR VAPOR. DO NOT INHALE OR ABSORB THROUGH SKIN. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles, face shield, or safety glasses, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

PHYSICAL OR CHEMICAL HAZARDS

Strong Oxidizing Agent. Use only clean dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including other pool chemicals) or other foreign matter may alter a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flammable or burning material such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with any inorganic or unsubstituted chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label.

FOR SWIMMING POOL DISINFECTANT: When used as directed, this product is effective as a swimming pool water disinfectant. The dosage necessary for your pool will change considerably depending upon the factors that dilute or vary the required dosages are water temperature, bather load, exposure to wind direction, on-site storms and the length of filtration cycle.

For start up of newly filled pools: Before using this product, make sure that the filtration system is clean and operating properly. Adjust the flow of the water to the range of 70-75 gpm using suitable products and a reliable test kit. Adjust the alkalinity of the water to be a minimum of 35 ppm TAPN (ppm) based on the test kit reading. To initially achieve 1.0 ppm available chlorine, add 1.25 oz. product per 1,000 gallons of water. Add 1/4 oz. product per 1,000 gallons of water daily or as needed to maintain that level.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Wash hands after handling.

Disposal of Container: Follow State or Local Regulations. Do not dispose of as trash.

Disposal of Unused Product or Pesticide: Do not contaminate water, food, or feed by storage or disposal. Wash hands after handling.

Emergency Information: To report a spill or leak, contact your nearest EPA Regional Office. For additional information, contact the USEPA’s National Pesticide Information Retrieval System (NPIS) at 1-800-858-7378 or visit their website at https://www.epa.gov/pesticide-landscaping.

HOW TO CALCULATE POOL CAPACITY

To calculate pool capacity, follow these steps:

1. Measure the dimensions of the pool:
   - Length (L)
   - Width (W)
   - Depth (D)

2. Calculate the volume of the pool:
   - Volume (V) = Length (L) x Width (W) x Depth (D) x 8

3. Determine the capacity of the pool:
   - Capacity (C) = Volume (V) / Desired Chlorine Level

Example:
- Pool dimensions: 15 ft x 30 ft x 5 ft
- Desired Chlorine Level: 3 ppm
- Volume of pool: 15 ft x 30 ft x 5 ft x 8 = 6000 cubic feet
- Capacity: 6000 cubic feet / 3 ppm = 2000 gallons
