The ingredients in HOOK provide combined effect of wetting, sticking, spreading and penetration of fungicide, insecticide, herbicide or defoliants.

As a general rule, adjuvants are applied to the tank mix; however, since HOOK is self-emulsifiable it can also be incorporated in herbicide or insecticide emulsifiable concentrates for use in low-volume formulations.

HOOK is a multipurpose adjuvant that has non-ionic surfactants that make it compatible with most of today's chemicals.

HOOK's surfactant action helps to keep the solution in suspension, reduces surface tension, giving spray an even coverage.

HOOK cuts leaf wax and increases the penetrations of spray.

HOOK reduces foam, controls drift of spray solutions, helps stick spray solutions to the target.

HOOK helps place spray on target, creates uniform droplets for more efficient coverage.

This results in
Greater disposition for efficient control.
- Controls drift of spray solutions
- Helps stick spray solutions to the target

NOTICE
Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use but neither this warranty nor any other warrant of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to Seller And Buyer assumes the risk of any such use.

CAUTION
KEEP OUT OF REACH OF CHILDREN
Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID
If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If swallowed: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also want to call 911, or an ambulance for emergency medical treatment.

STORAGE AND DISPOSAL
Store in original container only. Do not contaminate water, food or feed by storage or disposal. Follow all governmental procedures for the disposal of pesticide spray solutions. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Dispose of empty container according to approved local practices; contact county agricultural commissioner for disposal information.

Atlantic-Pacific Trading Company, Inc
625 Plumas Street, Reno, NV 89509

HOOK is a registered trademark of Atlantic-Pacific Trading Co., Inc
California Reg. No. 1051086-50001-AA
Washington Reg. No. 95865-10001

Gross Contents - 2.5 Gallons

MIXING INSTRUCTIONS
Add HOOK to the spray tank with good agitation, after all other spray materials have been added.

"ADD HOOK LAST"

PRINCIPAL FUNCTIONING AGENTS
Alkylphenol ethoxylate and polymerized alkylphenol resin, triethanolamine 17.6%
Constituents ineffective as Spray Adjuvant 82.4%
TOTAL 100.0%

DIRECTIONS FOR USE - DOSAGE PER 100 GALLONS SPRAY MIX

Hook

Defoliants and Desiccants
1 - 4 pints

Insecticides
4 - 32 ounces

Fungicides and Acaricides
4 - 32 ounces

Wettable Powders
8 - 48 ounces

Herbicides
1 - 4 pints

Concentrated Sprays:
Use 4 to 32 fluid ounces per acre on field crops such as cotton, foliage, grain, and row crops

DRIFT CONTROL:
Use at least 1 quart per 100 gallons spray mix as needed.

These directions for use do not constitute a recommendation to use any pesticide in a manner contrary to the directions of the manufacturer.

NOTE: The above use recommendations are considered to be adequate for most uses. Some pesticides, however may require higher rates for optimum effect. Follow pesticide label directions when this occurs.

GENERAL INFORMATION
HOOK is a self-emulsifiable spreader, surfactant adjuvant designed to improve the efficiency of herbicide, insecticide, and fungicide sprays by increasing contact activity, penetration and adhesion to plant surfaces.

RESTRICTIONS: For Terrestrial Use Only - Not for Aquatic Use
