STAB

PENETRANT / DEPOSITION AID / DRIFT CONTROL AGENT

PRINCIPAL FUNCTIONING AGENTS:
Lecithin, methyl esters of fatty acids,
alcohol ethoxylate ........................................ 100%
TOTAL .......................................................... 100%

WA Reg. No: 73127-10007
All ingredients are exempt from tolerance under 40 CFR 180.

CAUTION
KEEP OUT OF REACH OF CHILDREN

Causes moderate eye irritation. Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or smoking tobacco. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment: Wear chemical-resistant gloves, long-sleeved shirt and long pants, and shoes plus socks.

SN: 000-042512

FIRST AID

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on Skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

GENERAL INFORMATION

STAB is a non-ionic, low foam penetrating adjuvant. STAB may be used as a surfactant to enhance the activity and effectiveness of agricultural and industrial chemicals. STAB provides more uniform coverage of spray solutions and aids in penetration.

STAB improves deposition and retards drift by producing a more uniform spray pattern. The degree of drift hazard varies with the type of pesticide and application conditions. Common sense and sound application technology must be followed when spraying pesticides.

STAB will retard, but not eliminate drift. STAB is compatible with most pesticides formulations including water-soluble, flowable and wettable powders. Application may be by ground or air.

DIRECTIONS FOR USE

Some pesticides have stated adjuvant use rates. In all cases, the pesticide manufacturer’s label should be consulted regarding specific adjuvant use recommendations and that rate followed. Do not add adjuvant at a level that would exceed 5% of the finished spray volume unless otherwise specified by the pesticide label.

**Herbicides, Defoliants, Desiccants:**
1 to 5 pints per 100 gallons of solution when used as a surfactant /penetrant.

**Insecticides, Fungicides, Acaracides, Plant Growth Regulators, Foliar Nutrients:**
½ to 2 pints per 100 gallons of spray solution.

STAB improves deposition and retards drift by producing a uniform spray pattern of commonly used water soluble and dispersible pesticides. The degree of drift hazard varies with the type of pesticide and application conditions. This product will retard drift but not eliminate drift. When managing the spray pattern to reduce drift, use 4 to 8 pints per 100 gallons of solution or 8 to 16 ounces per acre.

NOT FOR AQUATIC USE

Do not use on grape foliage.

ALWAYS FOLLOW THE LABEL DIRECTIONS PROVIDED BY THE PESTICIDE MANUFACTURER.

STORAGE AND DISPOSAL

**Storage:** Store in original container. Do not reuse container. Keep container tightly closed when not in use. Product will become thick at cooler temperatures but remains stable.

**Disposal:** Do not contaminate water, food, or feed by storage or disposal. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading and add rinse water to spray tank. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

Warranty Statement

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
