CHEMQUEST 211

INDUSTRIAL MICRONOCIDE FOR USE IN RECYCLING WATER COOLING TOWERS, AIR WASHER SYSTEMS, RECYCLING CLOSED LOOP WATER COOLING SYSTEMS.

ACTIVE INGREDIENTS:
5-Chloro-4-methyl-3-thiazolin-2-one 1.11%
2-Methyl-4-isothiazolin-3-one 0.39%
INERT INGREDIENTS 58.50%
TOTAL 100.00%

KEEP OUT OF REACH OF CHILDREN

DANGER

IN CASE OF MODERATE OR SEVERE INGESTION or INHALATION of this product, call your physician or local poison control center immediately. Do not induce vomiting.

FIRST AID

IF IN EYES: Hold open eyes and rinse slowly and gently with water for 15-20 min. Remove contact lenses, if present, after first 5 min., then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN: Take off contamination clothing. Rinse skin immediately with plenty of water for 15-20 min. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably mouth-to-mouth.

IF SWALLOWED: Do not induce vomiting unless told to do so by a poison control center or doctor. Have person sip a glass of water if feeling dry.

NOTE TO PHYSICIAN: Premature mortality may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be necessary.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

INDUSTRIAL RECYCLING WATER COOLING TOWERS

For the control of bacteria, algae, and fungi, add Chemquest 211 to the tower basin, distribution box, or some other point to issue uniform mixing.

INITIAL DOSE: When the system is noticeably fouled, apply 148-883 ppm Chemquest 211 (1.26-7.46 pound per 19-113 fluid ounce of Chemquest 211 per 1000 gallon of water in the system). Repeat until control is achieved.

SUBSEQUENT DOSE: When microbial control is evident, add 35-219 ppm Chemquest 211 (0.3-1.86 pound or 4.5-28 fluid ounce of Chemquest 211 per 1000 gallon of water in the system) weakly or as needed to maintain control. Badly fouled systems should be cleaned before treatment is begun.

AIR WASHER SYSTEMS

Add to the air washer tank or chill water tank to issue uniform mixing, 35-883 ppm Chemquest 211 (0.3-7.46 pound or 4.5-113 fluid ounce of Chemquest 211 per 1000 gallon of water in the system) depending upon the severity of contamination to control bacteria, fungi, and algae which cause fouling in industrial air washer systems.

INTERMITTENT OR SLUG METHOD

INITIAL DOSE: When the system is noticeably fouled, apply 148-883 ppm Chemquest 211 (1.26-7.46 pound or 19-113 fluid ounce of Chemquest 211 per 1000 gallon of water in the system). Repeat until control is achieved.

SUBSEQUENT DOSE: When microbial control is evident, add 35-219 ppm Chemquest 211 (0.3-1.86 pound or 4.5-28 fluid ounce of Chemquest 211 per 1000 gallon of water in the system) weekly or as needed to maintain control. Badly fouled systems should be cleaned before treatment is begun.

CONTINUOUS FEED METHOD

INITIAL DOSE: When the system is noticeably fouled, apply 148-883 ppm Chemquest 211 (1.26-7.46 pound or 19-113 fluid ounce of Chemquest 211 per 1000 gallon of water in the system).

SUBSEQUENT DOSE: Maintain this measured level by adding a continuous feed of 35-219 ppm Chemquest 211 (0.3-1.86 pound or 4.5-28 fluid ounce of Chemquest 211 per 1000 gallon of makeup water). Badly fouled systems must be cleaned before initial treatment.

NOTE: For use only in industrial air washing systems that maintain effective microbial eliminating components.

INDUSTRIAL RECYCLING CLOSED LOOP WATER COOLING SYSTEMS

For the control of bacteria, algae and fungi, add Chemquest 211 to the reservoir, recirculating line or some other point in the system to issue uniform mixing.

INITIAL DOSE: When the system is noticeably fouled, apply 148-883 ppm Chemquest 211 (1.26-7.46 pound or 19-113 fluid ounce of Chemquest 211 per 1000 gallon of water in the system). Repeat until control is achieved.

SUBSEQUENT DOSE: When microbial control is evident, add 35-219 ppm Chemquest 211 (0.3-1.86 pound or 4.5-28 fluid ounce of Chemquest 211 per 1000 gallon of water in the system) weekly or as needed to maintain control. Badly fouled systems should be cleaned before treatment is begun.
