CHEMQUEST 211

INDUSTRIAL MICROBICIDE FOR USE IN RECYCLING WATER COOLING TOWERS, AIR WASHER SYSTEMS, RECYCLING CLOSED LOOP WATER COOLING SYSTEMS

ACTIVE INGREDIENTS:
5-Chloro-2-methyl-4-isothiazolin-3-one  ...  1.116%
3-Methyl-4-isothiazolin-3-one  ...  0.59%

INERT INGREDIENTS: 94.59%

TOTAL: 100.00%

KEEP OUT OF REACH OF CHILDREN

DANGER

IF ON SKIN:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 min.
- Call a poison control center or doctor for treatment advice.

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15-20 min.
- Remove contact lenses, if present, after first 5 min., then continue rinsing eyes.
- Call a poison control center or doctor for treatment advice.

IF INHALED:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance and give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

IF SWALLOWED:
- Call a poison control center or doctor immediately for advice.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Have person sip a glass of water if able to swallow.
- Do not give anything to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contra indicate the use of gastric lavage. Measure against convulsive shock, respiratory depression and convulsions may be necessary.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For the control of microbial biofilms, bacteria, algae, and fungi, add Chemquest 211:11 to industrial recirculating water cooling towers, and industrial recirculating loop water cooling systems. Add Chemquest 211 at some point in the system to prevent biofilm growth.

INITIAL DOSE: When the system is noticeably fouled, apply 148 - 383 ppm Chemquest 211(1.26 - 3.46 pound or 19 - 113 fluid ounce of Chemquest 211 per 1000 gallon of water in the system). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

SUBSEQUENT DOSE: When microbial control is evident, add 35 - 219 ppm Chemquest 211(0.3 - 1.86 pound or 4.5 - 28 fluid ounce of Chemquest 211 per 1000 gallon of water in the system) weekly or as needed to maintain control.

AIR WASHER SYSTEMS

Add to the air washer system to control biofilm growth, bacteria, fungi, and algae which cause fouling in industrial air washer systems.

INTERMITTENT OR SLUG METHOD

INITIAL DOSE: When the system is noticeably fouled, apply 148 - 383 ppm Chemquest 211(1.26 - 3.46 pound or 19 - 113 fluid ounce of Chemquest 211 per 1000 gallon of water in the system). Repeat until control is achieved. SUBSEQUENT DOSE: When microbial control is evident, add 35 - 219 ppm Chemquest 211(0.3 - 1.86 pound or 4.5 - 28 fluid ounce of Chemquest 211 per 1000 gallon of water in the system) weekly or as needed to maintain control. Badly fouled systems should be cleaned before treatment is begun.

CONTINUOUS FEED METHOD

INITIAL DOSE: When the system is noticeably fouled, apply 148 - 383 ppm Chemquest 211(1.26 - 3.46 pound or 19 - 113 fluid ounce of Chemquest 211 per 1000 gallon of water in the system.) SUBSEQUENT DOSE: Maintain this treatment level by adding a continuous feed of 33 - 219 ppm Chemquest 211(0.3 - 1.86 pound or 4.5 - 28 fluid ounce of Chemquest 211 per 1000 gallon of entering water). Badly fouled systems must be cleaned before initial treatment.

NOTE: For use only in systems that maintain effective micro-eliminating properties.
