**Motomco Farm & Home**

**Tomcat®**

**WITH Bromethalin**

**PELLETED BAiT**

This Product May Only be Used Inside and Within 100 Feet of Man-made Structures and For All Burrow Baiting.

KILLS RATS, MICE & MEADOW VOLES*

**ACTIVE INGREDIENT**: Bromethalin (CAS #63333-35-7): 0.01%

**OTHER INGREDIENTS†**: 99.99%

**TOTAL**: 100.00%

†Contains Denatonium Benzoate

**NET WT.** 5 lbs (2.2 kg)

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

See back panels for First Aid and additional precautionary statements.

EPA Reg. No. 12455-96-3240  EPA Est. No. 12455-WI-1

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

For Use In and Around Agricultural Buildings and Homes

Kills Anticoagulant Resistant Norway Rats, Roof Rats & House Mice

Norway Rats, Roof Rats & House Mice

Cease Feeding After Consuming a Toxic Dose

Keep Out of Reach of Children
FIRST AID

IF SWALLOWED:
• Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.
• Have person sip a glass of water if able to swallow.

IF ON SKIN:
• Wash with plenty of soap and water.

TREATMENT FOR PET POISONING:

IF AN ANIMAL EATS THIS BAIT, CALL A VETERINARIAN AT ONCE.

NOTE TO PHYSICIAN OR VETERINARIAN:

Contain the nervous system Bromethalin. This product is not an insecticidal type rodenticide. For humans or animals ingesting bait or showing poisoning signs (such as muscle tremors, loss of food intake, or seizures for animals), immediate absorption by either stomach or gastric lavage. Sublethal symptoms, if present, would be the result of central soma and should be treated accordingly through administration of an anesthetic diuretic and corticosteroids.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THE LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT:
• Do not expose children, pets, or nontarget animals to rodenticides.
• To help prevent exposure:
  1. Store unused product out of reach of children and pets.
  2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations.
• These stations must be resistant to destruction by dogs and by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait station after they are filled, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to tipped livestock, raccoons, bears or other potentially destructive animals, or in areas prone to vandalism.
• Dispose of product container and unused, spoiled or unconsumed bait as specified on this label.

Bait stations are recommended for outdoor, above-ground use. Tamper-resistant bait stations must be used wherever children, pets, non-target mammals or birds may have access to the bait placement location.

USE RESTRICTIONS:
This product may only be used to control the following rodent pests in and around man-made structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys humuli), Golden mouse (Calomyscus natalis), Polyethrodonts rat (Rattus exulans), Meadow vole (Microtus pennsylvanicus), White-throated woodrat (Neotoma albicollis), Southern plains woodrat (Neotoma micropus), and Mexican woodrat (Neotoma montana). This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to housing or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (trucks, trains, aircraft), docks and port and temporary structures and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited.

This product must not be applied directly to food or feed crops.

This product may be applied to active rodent burrows to control rats, mice and meadow voles in and around man-made structures, provided that infestations of these rodents have been confirmed. Burrows must be placed no less than 6 inches into active rodent burrows. Do not broadcast bait. Because rat infestations may occur in areas farther than 100 feet from buildings and man-made structures when the rodents have ample supplies of food and cover, efforts should be made to remove food, trash, garbage, clutter, and debris. Do not place bait near or inside ventilation duct openings. Do not contaminate water, feed, foodstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA impounded buildings, this product must be applied in tamper-resistant bait stations.

APPLICATION DIRECTIONS:

Determine areas where rats, mice or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, or in burrows, burrows, and in or around crevices, between floors and walls, or in locations where signs of rodents have been seen. Prerelent bait from base and above. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

Rate: Apply 1 to 5 ounces of bait per placement (usually at intervals of 15 to 30 feet). Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

For treating burrows, use a long-handled spade to place 1 to 5 ounces of bait deep into each active burrow entrance. Close burrows with soil 3 to 7 days after bait placement. Retained burrow entrances that are reopened by rats. If the area where treated burrows are located to accessible to children and nontarget animals, check burrows every morning and evening to make sure that the baits have not been pushed out of burrows. Remove and properly dispose of any bait that has become accessible to children or nontarget animals.

Contamination Risk:
• Apply 1 to 5 ounces of bait per placement. Space placements at intervals of at least 8 to 12 feet in treated areas. Larger placements, up to 2 ounces, may be used at points of extremely high “mouse and meadow vole” activity.

Bait Stationing: Highest bait consumption is expected to occur on the first or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity. Normally, the volume of bait consumed will be significantly less than the amount projected to sufficient. Although one cannot predict feeding levels, will typically continue to feed at least once a week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

FOLLOW-UP: Replace contaminated or spoiled bait immediately using water- and oil-proof gloves, collect and properly dispose of all dead, exposed bait, and leftover bait. To discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of rodent infestation is present, establish permanent bait stations and replenish them as needed.

PRECAUTIONARY STATEMENTS:

Hazards to Humans and Domestic Animals
CAUTION: Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Do not get in eyes, on skin or in clothing. All handlers (including applicators) must wear long-sleeve shirts, long pants, shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements:
• Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions exist, wash exposed areas with detergent and hot water. Keep and wash PPE separately from other laundry. Use detergent and hot water. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions exist, wash exposed areas with detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling the product. Wash the outside of gloves before removing them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS:
This product is extremely toxic to mammals and birds. Dogs and other predators and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Product also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsates.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polyethrodonts rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

KILLS RATS, MICE & MEADOW VOLES*

Norway rats, roof rats and house mice cease feeding after consuming a toxic dose.

ACTIVE INGREDIENT: Bromethalin (CAS #63333-35-7): 0.01% TOTAL: 0.010%

Contains Doseimator Baitsee

KEEP OUT OF REACH OF CHILDREN CAUTION

See side panels for First Aid and additional precautionary statements.

STORAGE AND DISPOSAL:
Do not contaminate water, food or feeding area with storage or disposal. 

PESTICIDE STORAGE:
Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL:
Waste resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

CONTAINER HANDLING:
Nonrefillable containers. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash, at an approved disposal facility or by incineration.

WARRANITY:
To the extent consistent with applicable law, seller makes no warranty, express or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
