KEEP OUT OF REACH OF CHILDREN
CAUTION

Causes moderate eye irritation. Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or smoking tobacco. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment: Wear chemical-resistant gloves, long-sleeved shirt and long pants, and shoes plus socks.

FIRST AID
Call a poison control center or doctor immediately for treatment advice.

Have the product container with you when calling a poison control center or doctor, or going for treatment.

If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.
GENERAL INFORMATION

**SAP 17** is an excellent sticking agent intended for use with most crop protection products, in which the label permits the use of a spreader-sticker. **SAP 17** is compatible in spray solutions with most commercial crop protection and foliar feed micronutrients. It forms a sticky, elastic film that bonds the pesticide to the crop foliage. This protective coating decreases the effects of environmental stress conditions which reduce the effectiveness of pesticide sprays.

DIRECTIONS

Add **SAP 17** to the spray tank as it is filling, with the agitator running. It is recommended to pre-mix **SAP 17** with water before adding to the spray solution and to add it as the last component. Apply **SAP 17** at least one hour, under sun up, prior to an anticipated rainfall.

Sunlight in this time frame is necessary, so that the bond can adhere to the plant surface. To increase the efficiency of insecticidal, fungicidal and hormonal herbicide sprays, use 1 pint of **SAP 17** per acre, when applied by ground equipment. For use in air blast, free sprayers or hydraulic gun type sprayers, use at the rate of 6 to 8 oz. per 100 gallons of water. When applied by aircraft, use at the rate of 1 pint per acre for all applications.

To ensure maximum activity of glyphosate, add **SAP 17** to the spray mix at the rate of 1 pint per acre. To ensure maximum absorption of Foliar Nutrient Sprays, use 6-8 oz. of **SAP 17** per acre.

NOT FOR AQUATIC USE

STORAGE AND DISPOSAL

Keep from freezing. Store in a cool dry place. Keep in original container tightly closed. Do not reuse empty container.

Triple rinse (or equivalent) during mixing and loading and add rinse water to spray tank. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

Warranty Statement

Selle warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. the warranty to the product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
