mycodex All-in-One® Flea & Tick Spray

READ ENTIRE LABEL BEFORE EACH USE
USE ONLY ON DOGS, CATS, PUPPIES, AND KITTENS

This product combines the adult flea killing power of pyrethrin with the long-lasting egg killing power of PRECISE® insect Growth Regulator. The highly effective combination of ingredients provides quick relief from biting fleas and continuous killing of flea eggs laid on the animal, breaking the flea life cycle. The elimination of both adult fleas and flea eggs is important because adult fleas live on your pet, causing discomfort and skin irritation, while the vast number of eggs that they lay fall off and develop in your house. Effective flea control requires treatment of your pets, house, and yard.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING.

FOR DOGS AND CATS

For Fleas: A tight, even coverage of the hair coat will provide effective flea control. Do not allow spray to come into contact with painted or finished surfaces, including wood floors, furniture, leather, or vinyl materials, or other surfaces of concern. For best results, remove the coat while spraying.

Storage and Disposal: Do not contaminate water, food, or feed by storage or disposal. Store at room temperature and protect from freezing. Do not store near heat or open flame. Remove from children and animals.

FIRST AID: Call a poison control center or doctor immediately for treatment advice.

In case of emergency, contact customer service at 1-888-241-9545.

PRECAUTIONARY STATEMENTS

HAZARDS TO ANIMALS - CAUTION: Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or animals on medication. Sensitivity may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. Some cats may be sensitive to products containing pyrethrin. Excessive salivation and ear and paw flicking may occur; however, these effects are temporary and not harmful. May cause dermal sensitization (skin allergy).
