PROXEL® BC INDUSTRIAL MICROBIOSTAT

FOR INDUSTRIAL USE ONLY AS A MICROBIOSTAT PRESERVATIVE SUCH AS LATEXES, INK, PAINTS AND VARNISHES, INK, PAINTS AND VARNISHES, PAINTS, WATER-BASED ADESIVES, CASHERDINS, MILITARY, TEXTILE, SPIN, FRESH SOLUTONS, PESTICIDE FORMULATIONS, AQUEOUS SLURRIES, TITANIUM DIODE SLURRIES, TINE JOINT COMPOSITES, LEATHER PROCESSING FORMULATIONS, AND FOR THE PRESERVATION OF FRESH ANIMALS, HUMANS, AND SKINS.

ACTIVE INGREDIENTS:

1.2-0.00000000000000000000016
5-Chloro-2-methyl-4-nitroaniline-3-one... 0.01%
2.01% + 2.01% = 0.02%

KEEP OUT OF REACH OF CHILDREN

DANGER

SEE FIRST AID & ADDITIONAL PRECAUTIONARY STATEMENTS ON SIDE PANEL

MANUFACTURED FOR:

PROXEL® BC is a trademark of Arch UK Brands, Ltd.

ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S., MIXTURE OF: 5-CHLORO-2-METHYL-4-ISOTHIAZOLIN-3-ONE AND 2-METHYL-2-SISOXAZOL-3-ONE (3:1)

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal.

PESTICIDES STORAGE: Store from frost. If frozen, allow to thaw and stir well before use.

PESTICIDES DISPOSAL: Pesticides are extremely hazardous. Improper disposal of excess pesticide, spray runoff, or drainage from site is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not refill or reutilize this container. For recycling or disposal, refer to the manufacturer or the owner of the container. For your safety, do not use this equipment or these containers for any product other than suggested uses. Some restrictions on the use of these containers exist. Read and follow the instructions on the container. Store in a cool, dry place. Do not use for other purposes.

DIRECTIONS FOR USE:

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

PROXEL® BC is an effective preservative in most aqueous compositions. Typical applications, and the suggested range of concentrations on what tanks can be based are:

Product

Latices and polymer solutions: Epoxy and natural rubber latexes. Such as acrylic, styrene-butadiene, butadiene-styrene, ethylene/methyl acrylate, and butylpolymers intended for industrial use, such as emulsion gum, gum latex, binder gum, and calcium derived polymers.

Paints, stains, and coatings, including coatings for paper:

Acrylics, vinyls, and water-based systems. Also for wallcoverings derived from various sources.

Adhesives: Carboxymethylcellulose (CMC) and derivatives, animal gums, vegetable gums, adhesives based on gelatin and natural rubber and synthetic latexes. Also for wallcoverings derived from various sources.

Adhesive materials: Including bonding compounds, waxes and paraffins, adhesive compounds, and cationic preservatives such as glutaraldehyde, 2-chloro-2-methyl-1-propanol, and methylurea.

For preservation of building materials: Stabilized joint compounds, epoxies, grouts, gluing compounds, wood fillers, sealants, and resins.

Dyes, pigments, food colorings, and inks:

0.5 - 2.5

Pesticide formulations:

0.5 - 2.5

General Recommendations: The concentration required to give protection depends on several factors. These include the susceptibility of the system to biochemical degradation, the dose at which microorganisms can grow, the species of microorganisms to which the treatment is applied, and the type of treatment, and the presence of any other inhibitors such as chelating agents, and the type of treatment, and the presence of any other inhibitors such as chelating agents. For protection against bacterial and fungal attack, a concentration within the range of 0.05 - 0.1% PROXEL® BC is almost invariably sufficient.

% PROXEL® BC (based on total volume of product)

0.05 - 0.50
