EPA Est. No. 10897-WA-2
SANITIZATION OF SOURCES

**Kitchen (Food Contact)**

Applications: For Cutting Boards

**Rinse Method** - Prepare a sanitizing solution by thoroughly mixing 6.4 fl. oz. of this product with 10 gallons of water to provide approximately 600 ppm available chlorine by weight. Rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizer for at least 2 minutes. Do not rinse equipment overnight.

Prepare a 200 ppm sanitizing solution by thoroughly mixing 4.4 fl. oz. of this product with 10 gallons of water. Prior to using equipment, rinse all surfaces and appliances with a 200 ppm available chlorine solution. Do not rinse and do not soak equipment overnight.

**Sanitization of Non-Porous Non-Food Contact Surfaces**

Bathroom Applications: For Toilet Bowls

**Rinse Method** - Prepare a sanitizing solution by thoroughly mixing 4.4 fl. oz. of this product with 10 gallons of water to provide approximately 300 ppm available chlorine by weight. Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizer for at least 2 minutes. Do not rinse equipment with water after treatment and do not soak equipment overnight.

**Disinfection of Non-Porous Non-Food Contact Surfaces**

Bathroom Applications: For Showers, Bath Tubs, Sinks, Floors, vinyl and tile

**Rinse Method** - Prepare a disinfecting solution by thoroughly mixing 12 fl. oz. of this product with 10 gallons of water to provide approximately 600 ppm available chlorine by weight. Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the disinfecting solution, maintaining contact with the solution for at least 10 minutes. Do not rinse equipment with water after treatment and do not soak equipment overnight.

**Immersion Method** - Prepare a disinfecting solution by thoroughly mixing, in an immersion tank, 12 fl. oz. of this product with 10 gallons of water to provide approximately 600 ppm available chlorine by weight. Clean equipment in the normal manner. Prior to use, immerse equipment in the disinfecting solution for at least 10 minutes and allow the sanitizer to drain. Do not rinse equipment with water after treatment.

**Laundry Bleaching**

**Brightens Whites and Removes Stains** - This bleach works with detergent to remove tough dirt and stains that detergent alone cannot.

**Safe for Color-Fast Fabrics** - Washables - Use to bleach white and color-fast fabrics only. Test fabrics made of acrylic, cotton, nylon, polyester, and rayon to be sure product is safe for use. To check if a garment is bleach safe, try the following BLEACH SAFE TEST: Apply one drop of a test solution (1 tablespoon of bleach plus 1/4 cup of water) to a hidden part of the fabric. Check all colors including tan. Let stand one minute, then rinse off. No color change means the article can be bleached safely. DO NOT USE ON ACETATE, LEATHER, SILK, SPANDEX, CRYSTAL, OR VELOUR.

**Pre-Treat Stains and Heavy Soils** - Stubborn stains may be soaked for 5 minutes in a solution of 1 cup of bleach to one gallon of cold water.

**Laundry Dye** - Add 1/4 cup of bleach and laundry detergent to wash water. This bleach may be added to the wash water before laundry is put in, or for best results, dilute 1/4 cup of bleach with a quart of water and add the diluted solution to the wash water after the wash cycle has begun. For very large laundry loads, add slightly more bleach.

**Hand Washing** - Mix one tablespoon of bleach per gallon of water, wash as usual.

**Laundry Sanitizer**

**Sanitizes and Eliminates Odors** - This bleach sanitizes and deodorizes laundry by eliminating most germs and their odors.

**Household Laundry Sanitizers** - In Seaking Suds: Thoroughly mix 4.4 fl. oz. of this product to 10 gallons of water to wash 200 ppm available chlorine. Wait 5 minutes, then add soap or detergent, follow wash cycle for at least 15 minutes prior to starting the wash/line cycle.

In Washing Suds: Thoroughly mix 4.4 fl. oz. of this product to 10 gallons of water containing clothes to provide 200 ppm available chlorine. Wait 5 minutes then add soap or detergent and start the wash/line cycle.
